## The Colonist.

FRIDAY, NOVEMBER 23, 1900.

POINT ELLICE BRIDGE.

The Third Bridge S and of a large with the first of the control of list week of January, when the there memeters showed — deg, in this city, and somewhat lower on the Mainland. There were several feet of snow on the ground at that time. There was heavy onnow in 1870, 7 feet having fallen on Puget Sound in two days. In the winter of 1891-92, there was scarcely more than a trace of snow in any of the Coast cities, and only on one or two accombined to Mr. Bodwell, and we shall leave that generature seems to be general all over the North American continent. Such weather is not unusual east of the Rockies at this season, but it is very seld on the proposal was first made, the Rockies at this season, but it is very seld on the Proposal was first made, the Rockies at this season, but it is very seld on the Proposal was first made, the Socretary of the Bureau of Information about the Socretary of the Duited States government has a specific or the number and a statement in regard to the number and such as the season with any scheme for ferry connection with any scheme for ferry connection. We handled the winter, and not left intil after parliament is prorogued.

ADVERTISING A CITY.

It is proposed in Seattle that a general all over the lowiness houses in that city, with such modifications as may be made during the winter, and not left intil after parliament is prorogued.

ADVERTISING A CITY.

It is proposed in Seattle that a general and almost as great a quantity was shipped last year. There are vest quantity in the state of Washing too condition as possible.

Most of Mr. Higgins' letter is directed to Mr. Bodwell, and we shall leave that general letter head and envelope suggested by all the business houses in that city, with such modifications as may be occurrent and condition as conditions as many because the water works, the water work is a claiment. The finds at Cla-coase, which are very condition as

The United States government has a commission looking into the question of a canal across the Isthmus. When the commission was first talked of, the idea was that it would certainly recommend the Nicaraguan route. The belief is gaining ground that the conclusion may be in favor of the line via Panama. Work is being steadily pushed along the de Lesseps route, and although the expenditure is not very large, decided progress is being made. It is thought that the United States government would declare itself behind the Panama schemes the United States government would declare itself behind the Panama schemes the United States government would declare itself behind the Panama schemes the completion of the work would big greatly hastened. The Panama Canal Company was originally a Frence corporation, but all the franchises and works have passed into the control of a company organized under the laws of New Jersey, which makes it an American company, as far as its domicile is concerned, no matter who may be its stockholders. This company is employed. stockholders. This company is employ. public opinion in tavor of the ranking route, and apparently with some measure of success. The almost certain result of the controversy between the two companies is that delay will ensue. We are inclined to think that the Panama people will in the end prevail. They have ple will in the end prevail. They have a shorter route; the cost of construction a shorter route; the cost of construction saved. Moreover, the Panama route is building a seaworthy car ferry with mer will be brought about. Heretofore all through one jurisdiction, while that extensive passenger accommodation, in the Liberal party have not been very

# THE BERLINER GRAM-O-PHONE

It is the instrument you will want these long winter evenings for it brings the world's best singuis the best bands orchestras and soloists to your own fireside.

It is simple—a child of five can operate it.

### IT IS GUARANTEED FOR FIVE YEARS

The records are HARD, FLAT and INDESTRUCTIBLE-all of the latest songs and music will be found in our catalogues.

Aylwin Bros., of New Denver, B. C., say: "The GRAM-O-PHONE bought of you is highly satisfactory." etc. Thousands of other testimonials of the same kind on file at our office. It is loud enough to be heard in every part of the largest church or hall yet can be subdued to suit the smallest room.

A CURE FOR RHEUMATISM. A CUBE FOR RHEUMATISM.

Mr. S. Mann, Stittsville, Carleton Co., Ont., writes: "I was afflicted with rheumatism, had severe pains in the knees, hid joints and across the back. Rheumatism remedies did not help me and I began using Dr. Chase's Kidney-Liver Pilis, which have since completely cured me. There is not the least trace of rheumatism left and I am no longer subject to biliousness, headache and atomach sickness, which formerly attacked me frequently." One pill a dose, 25 cents a box.

Miller-McKitrick.—At the residence of

Miller-McKitrick.—At the residence of the bride's father there was a very pretty wedding yesterday morning, Rev. Dr. Campbell uniting in marriage Harley D. Miller, electrician of the telephone company, Victoria, and Ethel Loren, second daughter of William McKitrick, Kane street, Albert Marett acted as best man, and the bridesmaids were Helena McKitrick and little Hazel, the bride's sisters. The bouquets carried by the bride and bridsmaids were very beautiful. The bride's dress was a becoming brown tailor-made gown. The popularity of the bride and bridegroom was shown by the large number of presents received. The happy couple left by the morning boat for the Sound cities, where they will spend their honeymoon.

Masquerade Ball.—From year to year the annual ball of the Sons and Daughters of St. George has grown in popularity, until now it is looked upon as the leading attraction of the winter season. This year's ball takes place this evening in A. O. U. W. hall, and the committee of management promise that, it will exceed in excellence all other efforts.

### ATTACK Of Royal Canadians at Paardeberg.

The dyeing of cotton rags for the making of Mats, Rugs, and Carpets was for years a difficult and very unsatisfactory operation owing, to the crude and common dyestuffs home dyers were obliged to use.

By the introduction of the special Diamond Dye Fast Colors for Cotton, the work of dyeing is now a source of pleasure and profit for every home.

The manufacturers of the famed Diamond Dyes prepare special Cotton colors such as Fast Pink, Fast Orange, Fast Purple, Fast Garnet, Fast Navy, Fast Crimson, Fast Seal Brown, Fast Yellow, Fast Scarlet, Fast Cardinal, Fast Turkey Red, Fast Dark Green, Fast Black and other colors that are unfading in washing or when exposed to sun.

No other dyes in the yorld can give cook may cond may college, and pleasing results on the plant of the sour refigures speaks only too well of the Boer refigure. LANT MAJOR ARNOLD met death unfinchingly. Indeed, it is only too true that many of these called the GAL-LANT MAJOR ARNOLD met death unfinchingly. ### ...... MINES AND

A Weekly Summ \*\*\*\*\*\*\*\*\*\*\*\*\*\*\*\*\*\*

ST. EUGENE OUTPUT. Last month the output of the St. Eugene was 3,007 tons of concentrates. which conservatively estimated at a si value of \$40 per ton nett-that is after all costs of milling, mining, transportation and smelting have been allowed for. places the profit from the operation of this mine for a single month at the resspectable sum of over \$120,000. further comment is necessary.

OCTOBER ORE SHIPMENTS. No less than 34,000 tons of ore from the mines of Kootenay and Boundary camps were carried by the C.P.R. dur-ing the month of October, the greater ing the month of October, the greater proportion of the ore being consigned to the Trail, Nelson or Grand Forks smelters. Commenting on this circumstance the Nelson Tribune pertinently asks: "If the one railway system alone is handling so large a tonnage now, what will the tonnage of the country be when the

CLA WHILL SOLL WASHING FOR

mines are fully developed?" To which the reply is made; "That the output of the mines of southeastern British Columbia will, within five wars, be greater than that of the mines of Montana or of Colorado." This is a somewhat large order, one district in Colorado, alone, Cripple Creek, having already this year produced upwards of twenty millions worth of gold. It is nevertheless the right sort of spirit, and if every man in British Columbia had as strong a faith in the potentialities of the mineral industry of the province as Mr. John Houston, of Nelson, things would move n, of Nelson, things would mo a deal faster.

OUTPUT OF THE GRANBY SMEL-

TER.

The capacity of the Granby smelter is now 600 tons daily. To a great many people this really conveys very little, when, however, dollars and cents are substituted for the word tons, a very much clearer idea is given of the industry's importance. The Phoenix Pionee has evidently realized this point, and in a recent leading article publishes some interesting particulars regarding the value of the smelter's ore supply, of which I extract the following: "Since the second furnace was blown in, and the 600 ton daily rate begun, the works, it is said, have been running out matte at the rate of \$211,200 worth every sixty days or \$1,267,200 per year. This virtually means that crude ore of the value of about \$3,500 is treated at the smelter each day."

THE SLOCAN SOVEREIGN..

The Slocan Sovereign Company of Montreal is about to attempt to prove the Madison group of claims, about on mile north of Sandon. There are five claims in the group, but most of the work has been contained in the Madison and Argenta. The general belief around Sandon is that the property will turn out to be a valuable one. A dozen met have been placed at work on the Argenta The property has five tunnels in 800 825, 200, 95, and 75 feet respectively, and there are 325 feet of upraises, and 50 feet of winzes. All told some 4t tons of ore have been shipped from the workings. The ore having an average value of 135 ounces silver and 10 per cent. lead. On the Madison there are three tunnels in 425, 170 and 95 fee respectively. Lately in prospecting, a vein of rich cube galena has been found in a cutting. No regular work has been done for some time on the property. THE SLOCAN SOVEREIGN..

A NELSON FREE MILLING CAMP There are several localities in the vicinity of Nelson which are certain in the near future to attract much attention from the premising nature of the miner all prospects found there. I have already referred to some of them, Another camp from which excellent accounts have been referred to some of them. Another cam from which excellent accounts have been received. Whaleback Mountain, elever miles east of Nelson on Five-Mile creel. The ore here is generally free milling, the gold values running from \$20 to \$90 During the past summer development work has been in progress at severa claims in this camp, the result being that quartz veins have been well extended to the posed, varying in width from eighteet posed, varying in width from eighteet posed, varying in width from eighted inches to four feet.
