The date of the ual meeting was changed from September to to Fool the Jury. At the Court of Sessions yesterday Lappin and Patterson were placed on trial on a charge of having on March 19 last committed a somewhat atrocious assault on Miss McEachren, a clerk in Burns' coal office, at Bathurst and Queen-streets, and attempted to rob the till. Miss McEachren identified the prisoners, who called in their defence a 17-year-old lad named Rudd. The latter testified that he was in the company of Lappin from 10½ a.m. on the day in question until his arrest, and that he was with Patterson from 3%. If Rudd's story was true the prisoners could not have committed the offence. After the witness had given his testimony the prisoner Lappin stood up in the dock and striking a dramatic attitude called out: "Tchalenge you to tell that jury whether I am guilty or not. You were with meal day and you know." The witness began to weep and waving aloft a red bansh handkerchief yelled. "Not guilty." The jury, however, thought oth-rwise, and athough it took them two or threes hours to make up their minds eventually returned a ver-dict of guilty. At a previous trial the jury dis-agreed. In Aurgust, 1889, it is alleged, defendant was shooting in the bushess of Ashbridge's Bay and fired at a bird, but missed the the feathered biped and the shot lodged in Mrs. Bedigan's face and body. No negligence was proved and the suit was dismissed. Richard Fahmer was charged with assaulting an old man named Alexander Durham. It appeared from the evidence that the two men, who live at Richarol Hall, had been disputing over a line fence and during an altercation Palmer's struck Durham. The evidence was contradictory as to the extent of the beating plaintiff received. The fact came out that after Durham and Palmer's summoned for the assault the latter swore out a warrant and had Durham arrested as a lunatic, but the magistrate discharged him. The old yachtsman did say the Vrada was bad. Na you say she was behind the Orloide at the easter buoy 20 minutes. I say 23. How was she when she reached the bell buoy the socond time? Only 10 minutes behind; how about outsailing? You say on the first round they both had the same wind. So do 1; but bad sniing beat the Vreda. SAN FRANCISCO, Sept. 12.—A sad and bloody tragedy was enacted, here this morn-ing. Adolph Jordan, propristor of a little saloon and grocery store, has for some time been nearly crased with business troubles. About 3 o'clock this morning he determined to kill himself. His wife saw him with a knife and he told her his object. She threw her arms about him and, asked if he would leave her alone. He persuaded her that the place would support her alone, but she main-tained that if he disc'he wanted to die, too. There Jordan stood looking at her for the moment.

Inere Jordan stood looking at her for the moment. "So you want to die with me," said he. "I do," replied the with sa sa he bared her left arm and extended it towards him. Jordan was like a static. For several minutes he was powerless to act. Then he drew the keen blade across the wrist, sever-ing the artery and veins. She fell at his feet with the blood gushing from the ter-rible gash. Then he drew the knife across both his wrists and threw himself at her side.

both his wrists and threw himself at her side. "We will die together," he said. Then he became unconscious. About daylight he he picked up the knife and plunged it into his breast below the heart. He sank back unconscious, and both of them lay on the thor until 1 o'clock this afternoon, when they were discovered. The wife is not yet dead, but her chances of recovery are slight. W. Gibson of Hamilton will superintend the masonry work on the approach to the tunnel. It will be built of large blocks of stone and will be a massive pile. General Managar Hiekson of the Grand Trunk assured a Sunday Herald represent-ative when in Port Huron on his return from Chicago, that it would be only a mat-ter of a few months before work was begin on another tunnel. The first thing to be done, of course, is to get the approaches built to the present tunnel and trains running; there is still a great deal of work to be done at the tunnel before it will be ready for traffic Mr. Hillman, who is the engineer in charge, told the editor of The Herald that trains would be running through the tunnel before May 1. In building the approaches 500,000 yards of earth have to be removed. <u>Educational Notes.</u>

her. The chairman explained that the Smart Com-pany was in splendid financial standing m Brockville, employing 300 men all the year round. Brockville had not been doing exactly right and the concern was willing to move to To-rount if the city would undertake to place it in routo if the city would undertake to place it in the same position if was in in Belleville. This meant some \$35,000 for buildings and a site of five acres as a free gift. Mr. Clendenan offered a five-acre site for nothing located 'kt Coxwell and Lakreview-avenues. He did this, he said, because he had no doubt the fastory would benefit his other process. Just Arrived.

proach that east of the Don was a goose pasture should be removed. Mr. Hurst showed himself a strong advocate of the scheme. Instead of costing \$35,060 to pro-vide proper buildings the figure would be nearer \$75,000, but any portion of cost over and above \$35,000 would be met by the com-pany. He had first resolved to contribute \$300, but rather than see the present chance go by he was willing to give \$1000. John Russell and a second property-owner had each promised an equal amount. In fact, nearly half the \$35,000 had been pledged in addition to the site. The factory would be followed by an electric or cable road connecting the city with and in all the new and razmonable shades. If you want something nobby in the hat line we advise you to call at J. & J. Lugsdin's, 101 Yonge street. New Accommodation

New Accommodation. A very nice style of folding bed is made in the form of a martel and contains bed and bedding, although not appearing on the outside. This would certainly make a splendid convenience for the fair time when accommodation is required, for besides holding a perfect bed, made up and ready for use, it makes a handsome ornament for any room. These are sold only by Messrs. H. P. Davies & Co., 81 Yonge-street. 246

Texas say the Rio Grande River is on the rampage. At Eagle pass it is higher than it has been for 10 years. All the lower part of the city, which is densely populated by Mexicans, is six feet under water and much property has been swept away but no lives have been lost. All communication with Piedras Negras on the Mexican side of the river is broken and the track of the Mexican International Railway is washed out and travel suspended. The San Fernan-do River, four miles west of Piedras Negras, is also at flood height and has washed away all houses and improvements just erected at the mines of the Piedras Coal Company. Fugged Out.-None but those who have be-come fagged out know what a depressed, miser-able feeling it is. All strength is gone, and de-spondency has taken hold of the sufferers. They feel as though there is nothing to live for. There, however, is a oure-one box of Parmelee's Vege-table Pills will do wonders in restoring heath and strength. Throat and Lung Diseases. The plan of treatment 1 have laid down is the only one which ever has arrested or cured a case of Consumption 16 has proved its healing pow-ers in that disease in thousands of instances, after all other means have been tried in vain. It has the rare merit of being direct-common-sense-based on scientific truth and supported by practi-cal experience and accomplished success. And it is as necessary for the ours of the other diseases of the air passages and lungs-Cattarrh, Bronchitis, Ashma and Pasumonia-as it is for Consumption. Lothair & Modis' planing factory and the W. H. Plummer Lumber Company's lumber yards were destroyed by fire early this morning. The total loss is about \$14,000; in-surance, \$10,000; cause of fire unknown.

diseases of the air passages and lungs-Cattarrh. Bronchits, Astima and Pneumonia-as it is for Consumption. The ordinary routine treatment by the stomach generally employed by physicians has never ac-complished anything in these diseases beyond the merest temporary relief. It has not saved one case out of every million so treated. The history of the diseases the authori-ty of medical teachers all over the world, and the universal experience of mankind unite in pro-claiming its utter worldlessness as a remedy for ing diseases. Instead of helping the patients to get well it makes their death certain, by praven-ing them from adopting the only course which could save them. The sooner the prople come to understand this the better it will be for themselves. Every lung case requires for its proper treatment the patient to be surrounded by a zone of medicated air and every breath he draws made to bear a healing balm to the lungs, or no cure will result. This is accomplished without the least discomfort or in-terference with business. The autor of this pathet was the first to introduce this treatment. He has made it the study of his life; and has had greater exper-ence in its application than any living physician, and accomplished by it cures in every staye and form of lung complaint, and is therefore justi-fied in previous afflicted with weak or dis-cased lungs. Since resuming practice it is pleasant to be itself to all persons afflicted with weak or dis-assed luings. Since resuming practice it is pleasant to be remembered by old and valued friends, many of vhom have owed their lives for the past twenty years to the curative efficacy of this initialations. It is his aim and purpose to make Toronto the head and source of everything pretaining to the treatment of throat and lung diseases by Medi-cated Inhalations for the Dominion.
