The Dreaded Visitor Makes His Appearance, But His Advent Too Late to Do Much Damage.

Frost was the subject matter of discussion at Grain Exchange yesterday. The weather, abol map was carefully scrutinized, and those o had received information either by mail or graph conveyed it to their fellow-grain men, mes Carruthers & Co. received this despatch in Campbell & Green of Portage la Frairie:

Ree this morning thickness of window glass water in pans; danger here lessened by clouds: sit two nights; in the West about half the crop ut. "" remarked Presi-

on water in pans; danged in the free front two nights; in the West about half the crop is cut."

You ought to remember, "remarked President Baird, "that in Manitoba they have got from 80 to 75 per cent, of the crop cut. It is apparently of excellent quality, too, and not withstanding these reports their crop is going to be in pretty good shape."

This was the consensus of opinion.

The weather symbol map showed that the temperature in the Northwest Territories had risen since yesterday. In Qu'Appelle and Cairies since yesterday. In Qu'Appelle and Manitoba the lowest point at that hour was 82, and that was in Minnedosa. The temperature in Dakota and Minnesota was lower than in the Canadian Northwest, the maximum being 48 and minimum 34. The highest temperature, as revealed by the map, centered Lakes Ontario and Erie. In the lower provinces the temperature ranged from 60 to 65 degrees.

Frost first appeared in Manitoba last year on Aug. 22, a week earlier than this season, and the farmers are handling their crops more expeditiously now than then. After the grain is cut the danger from injury by frost is reduced to a minimum.

AT THE CITY HALL,

ms of Interest During the City Father ent between the C.P.R. and Goods provides that the railway compa

Rooderham & Worts now ask that this be done, but the City Solicitor thinks they should entoreneir own agreement. The Board of Works will consider the request.

The Street Commissioner has 125 men working in King-street taying the temporary pavement at the sides. The work will be completed and the street swept on Thursday night. Electric cars will be running in King-street, from Sherbourne to Dufferin, during the fair, but horses will provide power on other lines.

The city will appeal from Justice Falconbridge's decision in the \$14,000 dispute with the old street railway company, and has given notice to that effect. The case will be argued next month.

brice of expropriation is to be served on the case of the Union and C.P.R. yards.

The Lake Ontario's Passengers.

List of saloon passengers per Beaver Line steamship Lake Ontario, from Liverpool, Saturday night, the 20th inst., Capt. H. Campbell, commander, which passed Fame Point at 2.50 on Sunday afternoon: Mrs. Aitken, Mr. John Barratt, Mrs. C. H. Binks, Miss Binks, Miss Binks, Mr. O. O. Billings, Mrs. Air J. F. Binch, Mr. Backbarner, Mr. A. A. Rrown. The Lake Ontario's Passengers.

ant-Governor of Ontario will officially open the great Industrial Exhibition for the year 1892. Mr. Hunt, agent for Messrs. James Pain & Sons of London, Eng., arrived in the city Satur-Sons of London, Eng., arrived in the city Saturday, and the work of preparing for the brilliant spectricle, "Sardanapalus," or "The Fall of Nineveh," which concludes the magnificent firework displays has been commenced. Over 300 people gorgeously costumed appear and Roman sports and colossal paintings are introduced.

Intending exhibitors are reminded that entries for the dog show close Sept. 1.

Intending axundors are remined that entries for the dog show close Sept. I.

Yesterday was a busy one at the Exhibition offices, 82 King-street east. Hundreds, ladies as well as gentlemen, called to make enquirles about space, to pay entry fees and to have this that and the other matter set right. The staff worked long into the night. Next Saturday Mamager Hill and his assistants move to the Exhibition Grounds and the offices on King-street will be vacated.

The judging of heavy horses and cattle this year at the Toronto Industrial Exhibition will be in the morning instead of in the afternoon as heretofore. This arrangement will give visitors a better chance to see who has won prizes. Yesterday the manager of the Toronto Street Railway Co. assured Mr. McWilliams, solicitor of the Industrial Exhibition Association, that Church, King, West Queen and Front-streets would be ready for the electric cars by Monday, Sept. 5.

t. 5. sesterday the new grand stand was completed the contractor, Mr. Dinnis, caused flags to be sted on the building in celebration of the nt. The seats are now being put in.

The Temperance Representative.

Mr. F. S. Spence, who represents the temperance people before the Royal Commission, is in the city. When seen by The World Mr. Spence illance, which takes piace as Sept. 13. The council of the Alliance will meet a Montreal on Sept. 22.

Speaking of the Prohibition Commission Mr. Spence said: "I would be quite willing to submit the evidence adduced so far to any unprejudiced jury, and would have no doubt as to what the verdict would be."

Verdict would be." werdict would be."
When asked to give his opinion of the commission and its work, he said it was as yet too soon for him to express any opinion. The commission will stin Quebec next week, after which Monreal will be visited.

At the monthly business meeting of the Young Yoman's Christian Guild, the president, Mrs. employment office showed a number of heies in households for girls. The different hes. gymnasium, physical culture, music, shorthand and other classes are arranged for and will shortly be opened. A large number of visitors, were reported from the other side. Final arrangements were made for the social to be held next Monday evening, to which all are playited. Excellent musical and other talent has peen secured for the occasion.

The organizing of a ladies' orchestra is under way and all who wish to join should be on hand next Monday night.

A Cowcatcher for the Trolley. Mr. Walter W. Peay of 163 Lisgar-street has in-inted a wheel guard, or "cowcatcher," for the olley cars, which has been submitted to Mantrolley cars, which has been submitted to Manager Everett and which is pronounced to be the best device for the purpose that has been seen. It is flanged over like the mould board of a plow. When the guard is fastened to the four wheels of the trolley it is simply impossible for any foreign body to gat beeneth the wheels, as no matter what joits the car may be subjected to the cylinder is so constructed that it runs up and down with the movement of the wheel, the flange re-

CRANE & BAIRD GRAIN MERCHANTS. TORONTO AND MONTREAL.

Whitlaw, Baird & Co., Paris, Ont. CHICAGO GRAIN AND PRODUCE. Fluctuations in the Chicago grain and produce markets, as received by John J. Dixon & Co., were as follows:

visions eased off on cholera rumors, but there was no decided weakness or panicky feeling.

John J. Dixon & Co.'s correspondents; Even reports from the Northwest that there had been frost in a good many places and that much damage had been done to spring wheat did not prevent a declining market. The receipts were simply overwheiming and every sort of holder showed discouragement. Arrivals here were simply overwheiming and every sort of holder showed discouragement. Arrivals here were almost 1000 cars. Chicago. St. Louis and Toledo had over 1,000,000 bushels, 20 per cent more than a year ago. The English visible increased over 1,100,000 bushels, causing the little decrease on passage of 408,000 bushels to be entirely overlooked. Paris said that Danublan samples of fine quality were being offered without attracting any bids. Our own advices from the Northwest are that reserves of old spring wheat exceed anything ever before known. To complete the discomfiture of a built the news in regard to the cholers is as alarming as ever. Although cern just barely escaped the frost last night big receipts caused the danger to be very soon forgot ten. There were 935 cars here, with over 60 per cent. going contract. The estimate for Wedness day was 460 cars. Some further decline it likely, but at anything under 50 we think the long side safe. Of course this market is no altogether escaping the cholera scare. The low bulletin estimates that the cat crop in that stat will not be over some further decline in the course of the summer of the price in spite of the will not be contracted the price in spite of the will not be contracted the cat crop in that stat will not be contracted the price in spite of the will not be contracted the price in spite of the will not be contracted the price in spite of the price in spite of the contracted the price in spite of the price in spite of the contracted the c

A WORD IN TIME ON CHOLERA

"TO BE FOREWARNED IS TO BE FOREARMED.

Nearly everyone is conversant with the fact that this dreadful malady is caused by a Bacillus or Microbe, possessing the power of propagating itself by the million, in so short a time that death follows its ravages, often in a few hours, when once it has entered the

Its propagation is more rapid, hence more quickly fatal, in the bodies of weak and sickly persons than in those of robust ones; the disease is more active where there is bad drainage and the drinking water impure; however, none are exempt, as Cholera is no respector of persons; therefore, it behooves ALL TO BE ON THEIR GUARD WHEN THE SPECTOR SYMPTOMS OF BOWEL PAINS ARE FELT, GENERALLY FOLLOWED BY

"TIS TRUE AND 'TIS A PITY," that while the Medical Profession has known the cause of Cholera many years, it yet stands helplessly by uncertain what to do as far as antidotes are concerned, to check the onward course of the malady, where once it has invaded the system. Those who have been through a Cholera epidemic, and have survived it, need thank no one for their escape, but their own nature.

WHAT ARE THE REASONS FOR SUCH A STATE OF AFFAIRS?

We will here state some and challenge medical opinion to the contrary.

In order, to combat such a disease as Cholera, to destroy the germs causing it, ANTISEPTIC remedies of powerful action are necessary; the entire system must be immediately
physically disinfected in the shortest time possible, when the first symptoms are felt, else
medical treatment will be of no avail.

NOW THEN, HAS THE PROFESSION SUCH A REMEDY? OR KNOW OF SUCH A ONE IN ITS "MATERIA MEDICA" ?

They know full well that powerful Anti-Septics must be administered, but they also know full well that if such as are known to them are given too freely they will cause death to be the outcome also; and on the other hand, if not given strong enough and freely enough, the disease will more than neutralize the effects of their remedies.

WHAT THEN IS NEEDED MOST IS A HARMLESS ANTI-SEPTIC, BUT FULLY AS ACTIVE AND POWERFUL AS ANY OF THE MOST DANGEROUS ONES KNOWN. HAVE WE SUCH A REMEDY? YES! RADAM'S MICROBE KILLER IS SUCH A ONE.

If we, in Canada, are to be scourged with this dreadful malady, which, Heaven forbid, it is best for us to know all these things in time, to prepare ourselves accordingly, and avoid best for us to know all these things in time, to prepare ourselves accordingly, and avoid best for us to know all these things in time, to prepared, when first noticed, to drench their if the things in the hands of Educated Medical Ignorance. If those who are attacked by Cholera will be prepared, when first noticed, to drench their if the things in the hands of Educated Medical Ignorance.

If the things in the hands of Educated Medical Ignorance. If the hone are attacked by Cholera will be prepared, when first noticed, to drench their systems internally, thoroughly with Microbe Killer, taken in large doses, as often as every systems internally, thoroughly with Microbe Killer, taken in large doses, as often as every systems internally, thoroughly with Microbe Killer, taken in large doses, as often as every systems internally, thoroughly with Microbe Killer, kept in the home now, may be the "Ounce of Prevention to all that is a solute harmlessness to the human system. It is absolute harmlessness to the human system. Its entire work is accomplished through oxidation, which means destruction to all that is its absolute harmlessness to the human system.

We possess proof, thousandfold, as to the truly phenomenal properties of this scientific we possess a curative, rather preventive. If TAKEN IN TIME, and hereby consider our duty done possess a curative, rather preventive. If TAKEN IN TIME, and hereby consider our duty done possess a curative, rather preventive. If TAKEN IN TIME, and hereby consider our duty done possess a curative, rather preventive. If TAKEN IN TIME, and hereby consider our duty done possess a curative, rather preventive.
