

ARTIFICIAL LEGS AND ARMS.

MARKS' PATENTS of 1854, 1863, 1865, 1880, 1886, 1887, 1892, 1893, 1895, cover all the accredited improvements in artificial legs and arms, and make the Marks' Artificial Limbs peerless. Rubber feet remove jar and make the stump-bearings easy. Rubber hands extend the limits of accommodation.

Light, Durable, Practical. Do not get out of order, and are inexpensive to wear. Appreciated by over twenty thousand wearers and thousands of surgeons of prominence.

The limits of the utility of Marks' Artificial Limbs are unbounded. Persons wearing them engage in every occupation and profession.

This cut is from a photograph of John J. Winn, Signal Quartermaster on

who lost his leg above the knee, and arm above the elbow, by the explosion of a shell while the steamer was engaged in the attack on Forts Jackson and St. Philip, under the command of

ADMIRAL FARRAGUT

April 22, 1862. The following letter tells what the old warrior knows about Artificial Legs and Arms:

MR. A. A. MARKS.

DEAR SIR,—I write you this simply to say that my experience with your Artificial Limbs, together with considerable experience with other kinds, induces me to prefer yours by all odds. The special point I desire to mention is the simplicity of construction in your leg, whereby I can take it apart, lubricate and adjust with my one (natural) hand, and put together again without any help. My good solid weight of two hundred and forty pounds gives the leg a good trial, and yet I feel a confidence in it that I had never had in any other kind.

Yours sincerely,

JOHN J. WINN.
