POETRY.

GOD SAVE THE PLOUGH

BY MRS. SECORNEY.

See how the shining sheaf
Marketh earth's bosom fair,
Crowning her brow—
Broad in its furrow springs,
Health and repose it brings,
Treasures unknown to lungs—
God save the plough!

Look—in the warrior's blade,
While o'er the tented glade,
Hate breathes its vow—
Wrath, its unsheathing wakes,
Love, at its lightning quakes,
Weeping and woe it makes—
God save the plough!

Ships o'er the deep may ride,
Storms wreck their bannered pride,
Waves when their brow;
But the well-loaded wain,
Gathering the golden grain,
Gladdened the household train;
God save the plough!

Who are the truly great?
Mnions of pomp and state,
Where the crowd bow?
Give us hard hands and free,
Culturers of field and tree,
Best friends of Liberty;
God save the plough!

POTATO SEED FOR NEXT YEAR.

The destruction of the potato crop is already so extensive that even if there were not every chance of a further loss during the winter, there will most likely be much difficulty in procuring seed next year. This might be in a great measure obviated by the general adoption of a plan which, although it has been frequently recommended, does not appear to be so well known as it deserves. It has been proved that the crown of the potato, if used exclusively for seed, will produce an earlier and frequently a better crop, than if sets from any other part of the tuber be employed, it is, therefore, only necessary, in preparing potatoes for food, or before employing them for any other purpose, to cut off this end and preserve it, in order to accumulate a supply of the best kind of seed.—Gardner's Chron.

MANURE FOR TURNIPS.

We understand that the Lincolnshire farmers have been and are using large quantities of sulphuric acid, as digestive for bones in manuring for turnips, this season, and are most sanguine of the results. They complain that the admixture of the vitriol is attended with some trouble, but are willing to incur that for the sake of the advantage yielded thereby. Our informant states, that a good crop of turnips will always ensure a good after-crop of barley; and he adds, that four strikes of bones, digested with about 70 pounds of the acid, will serve for an acre. From ten to fifteen strikes of bones, employed alone, are said to have been commonly used before this new process was put into practice.—Stanford Mercury.

KEEP BEES.—Bees cost nothing for their food, neither for their pasture in summer, nor for their provision in winter.
