THE ROUND ALTAINED ATEL DOUBLES OF THE

DOMINION EXHIBITION.

The Agricultural Show.

Wednesday was devoted chiefly to the department of the great exhibition which was of interest to all, but more particularly to farmers, who crowded the grounds in large numbers and watched the proceedings with interest. From an early hour the ring fence in the centre of the grounds was surrounded by spectators, who critically examined the horses as they were brought before the judges to show their breeding and their paces. Ringwood and Medway, two horses belonging to the famous stud of D. & J. Bergin, of Cornwall, were greatly and justly admired and excited great enthusiasm among concessurs in horse fiesh. They are both thoroughbred stallions and of the purest blood, especially Ringwood, which has a pedigree almost illustrious enough to make even a Campbell of Argyle blush for his descent. He is about 15 years old, a splendid chestnut, and was bred by Mr. H. C. Mitford, Rockland county, in the State of New York, and has proved to be remarkably successful at the stud, some of his stock being well known trotters. Midway, another stallion from the same farm, is a black horse with white feet, and stands 16 hands 1 inch high. He was foaled in 1874, and was bred by General Withers, of Fairlawn, Lexington county, Kentucky. His pedigree also is of the most formidable proportions. The same firm also exhibit some beautiful young horses, all of the best breed, and which will, doubtless, find ready purchasers. The carriage horses of Mr. Hickson and Dr. Craik also attracted a good deal of notice, as did also the representatives of the Prince Edward Island horses. The praises of these horses were loudly sung by all the visitors who understood anything about horse flesh, and many congratulations were heaped upon the inhabitants of the Island Province for their enterprise in sending such a capital exhibit from so great a distance.

The various classes of horned cattle shown were excellent. Especially was this the case

exhibited by Messrs. Dawes & Co., of Lachine. Indeed this firm has a capital show both of horses and cattle, and a good deal of the success of this portion of the Exhibition, from an agricultural point of view, is due to these gentlemen. Several of the cattle sent from Mr. Hickson's farm were capital, and merited special attention from the agriculturist. The Durhams, though rather few in number, were of a high order of excellence, Mr. George Whitefield being a leading exhibitor in this class. The same remark applies also to the Galloways and to the Alderney cattle.
The sheep, especially the Leicestershire and other long-wooled varities, were beautiful

with the Ayrshires, of which a number were

and other long-wooled varities, were beautiful objects, but we imagine that a good many of the entries were not sent. At all events colle, 2nd, Chas Robinson, Lacolle, 3rd. those that were sent were quiet sufficient to warrant the conclusion that the farmers of this province have excellent judgement in sheep, and that they can fairly compete with their brethern in the other provinces in this respect. There was not a large number of pigs exhibited, and most of those that were sent were from the near neighborhood of Montreal. Some very useful animals, however, were displayed.

The poultry and pigoons were both numerous and of high merit, especially when it is remembered that there was an outside exhibition of very much the same kind. The house in which they were gathered was thronged by visitors, amongst them being cotte, St Hubert, 3rd. several funciers, who were warm in their appreciation of the merit of the show. Some of the classes, especially the Dorkings, were | Ness, Howick, 2nd; A Mousseau, Berthier, veiy good, as also were the Aylesbury ducks.

Not a stall on the grounds was empty, and indeed more might have been filled if they Corners 1st Frs Dagenais, Ste Rose, 2nd; A were there. The show of yearlings was superior to anything yet seen, which speaks well for our future brees of cattle and the attention paid to stock raising by our agricul-turist, which indeed is small wonder, when it is considered stock will in the future form one of our chief branches of export trade.
