| (100) | Convention on Safety in the Use of Chemicals at Work (Geneva, 24 June 1990)  | global (ILO):<br>-not in force- |

II. DRAFT CRITERIA FOR EVALUATION

6. In carrying out an evaluation of the effectiveness of existing agreements and instruments, the Working Group may wish to focus on a number of common criteria, which could also provide guidance in the identification of gaps and possible areas for the further development of international environmental law. (Some of the draft criteria listed may not be applicable to declaratory/non-binding instruments).

A. Participation

- (1) What is the current range of membership in existing environmental agreements and instruments, especially as regards developing countries?
- (2) What is the record of actual participation by member States in programme activities and meetings organized under these agreements and instruments?
- (3) Which incentives (e.g., financial, trade, technology benefits) are available to encourage participation, especially by developing countries?
