

JORDAN

Jordan's only outlet to the sea is the Gulf of Aqaba. Fishing in Aqaba has been declining steadily and quantities caught are hardly sufficient to cover the local community. Thus, seafood products are mainly imported fresh from Yemen, from where there are frequent flights. Lobster, shrimp and other delicacies are imported frozen and are usually to be found in large supermarkets and luxury hotels. In both cases, the supermarkets and hotels import the seafood directly.

Mr. A. Mamduh Abu-Hassau
