

Commercial Reports --- Porcupines Come in for More Activity

Public Confidence in Market Shows Signs of Increasing

Porcupine Stocks Adopt Cheerful Tone and Prices Advance Sharply — Sentiment on More Favorable Plane.

World Office. Tuesday Evening, March 5. The mining market appeared almost universally cheerful throughout the session to-day. Porcupine stocks came in for more activity than for some time, and on the whole displayed an attitude of buoyancy such as has not been equaled for some weeks. Most of the cheaper issues shared in the advance which ran practically through the whole list. Closing prices were generally at sharp gains for the session.

The most outstanding feature of the day in respect to the Porcupine stocks was a decided upward movement in West Dome, which sold up 18 points to 60, and closed bid at 57, a net gain of 17 points for the session. The announcement that the inside interests had taken up a large block of treasury shares of West Dome, or, considerably above the market, was held responsible for the movement. The feeling of confidence which this action implied also had a decided influence on the sentiment in respect to the whole market.

The West Dome incident was reflected throughout the cheaper section of the market and advances from a fraction of a point as much as seven points. The latter in Roa were recorded. Domo Extension was up 2 points at 47½; Vipond advanced to 48; Roa was up to 34, and some of the other issues showed similar advances. Porcupine Central and Southern showed further buoyancy, both scoring sharp gains. Hollinger was up above the eleven dollar mark again. The upward movement had a decided effect on market sentiment, and at the close it was felt that the way had been paved for a general recovery throughout the whole list. There is undoubtedly a material short interest outstanding, and a continuation of buoyancy would in the natural order of things inspire a covering movement. On this account, the general feeling is one of confidence in market conditions.

Cobalts were quiet and generally unchanged, with strength in silver-leaf the only feature of any note.

TIMMINS INTERESTS INSPECT HOLLINGER

Porcupine, March 4.—(From Our Man Up North.)—With a keen interest in the work now on at the Hollinger and the privately owned Timmins, L. H. Timmins, Noah A. Timmins, John McMartin and David Dundas of Montreal and Toronto, visited the camp last week. They closely inspected the work on the stamp mill, and observed something as to the time it will take to complete the job. There was nothing new given out before the distinguished gold mining party left for the south. Chas. Fox.

Swastika Annual. The annual meeting of the Swastika Mining Co., Ltd., will be held at the offices of the company, No. 13 Toronto-st., this afternoon at 2 o'clock.

THE ADVENTURES OF KRAZY KAT

A NATIONAL PATRIOTISM

From all present indications the year 1912 will go down in history as the period marking the inception of gold production in the Porcupine Camp. And with the new gold district actually sending out the precious metal, it is highly probable that much of the stigma attaching to the name of Ontario in regard to gold mining will be removed.

In view of this fact it behooves every loyal Canadian to make himself acquainted with the salient facts in respect to the Porcupine Camp, viz.: The story of its discovery, its geological peculiarities, its progress to date, and the possibilities of its future. A concise summing-up of these and other data are supplied in The Porcupine Handbook.

Will Woo Fortune In Unknown North
Porcupine, March 4.—(From Our Man Up North.)—The unexpected discovery of the land of rocks and swamps will be gone over thoroughly by hundreds of prospectors, who are planning their trips. Eight men in each, have reported their intention to cross the great silent trail and tramp north to the eastward, the land of James Bay, and thence on east and north into the unknown wilds of Ungava. This route is chosen in order that the country to be explored side of the bay may be seen. From the 500 Groundhog and Metagami north the tract hundreds of miles from the coast during the last two years, 1,500 and coal deposits found in small quantities.

Aside from those who expect to make a summer dash into Ungava, Baffin's Land is the shining goal that will attract the attention of the men who are unshy unless in the midst of the thicket, plan a hot trip to the north from Halifax. Nothing on their trip is given out except that hosts will be chartered and a two years' trip made.

On to the north is the trend of the men who blaze the way for utilization, and commercial progress.

Chas. Fox.

FOUR PROVEN MINES IN PORCUPINE CAMP
Porcupine, March 4.—(From Our Man Up North.)—Actual development of a very large number of properties, some of them yet in the infant class, is going ahead quickly but steadily. Mine men consider that Porcupine now has four mines whose values are sufficiently demonstrated to allow of men's "mine" class. It is from these mines that must come the stimulus which will bring a healthy tone to speculative activity. And that interest is well-timed upon the starting of production. With production, Porcupine looks for an extended period of uncurtailed prosperity, the reward of the two years' effort in putting Porcupine on the mining map. Already buyers, with a view to getting in position for future trading, are not overlooking the "camp," of which there are many in the district. Chas. Fox.
