FRANK SHANNON AND LEONARD MOORE SEVERELY BURNED

N. B. Power System Also Tied Up For Short Time by Accident

after giving the men first aid treatment, sent them to the hospital. Further examination there showed that Shannon was severely burned about the face and will have to remain in the hospital for several days. Moore escaped more easily and, after receiving treatment, was able to proceed to his own home. It was regarded as remarkable that the men escaped as lightly as they did and particularly that their eyesight did not suffer.

The accident had the effect of shutting off all the power and the entire system, motive and lighting, was out of commission. A few minutes' work was all that was required to get most of the system in operation again but it was 11:40 o'clock before the Rothersey line was restored.

An accident which resulted in painful burns to two men and which tied up the entire system of the New Brunswick Power Company for a short time occurred this morning at 10:15 o'clock at Frank Shannon, a foreman, and Leonard Moore, a lineman, were engaged at the power house filling oil switches. While moving one of the heavy pieces of apparatus it tilted and came in contact with three overhead wires, causing a circuit. There was a sudden blaze of flame and both men were badly burned about the face.

Dr. Walker was hastily summoned and,
