CHIEF CLARK UNDERTAKES TO CATCH TWO CROOKS.

He May Succeed, and There are Rumors that He Has—They are seen Everywhere, and the Woods are Full of Them, but who Can Find Them?

The number of suspicious men, travelling in couples, who have been seen in various parts of St. John and Kings counties during the past week equals only the old-time simultaneous appearances in Nova Scotia of Betts, the Wallace murderer, or later is multaneous appearances in Nova Scotia of Betts, the Wallace murderer, or later of Thompson, the Stoneham murderer. It has been a dull day for the papers in which they have not recorded the advent of the fugitives in widely different places, and yet the papers of the numerous group has the fugitives in widely different places, and yet the papers of the numerous group has the fugitives in widely different places, and yet the papers of the numerous group has the fugitives in widely different places, and yet the papers of the numerous group has the fugitives in widely different places, and yet the papers of the numerous group has the fugitives in widely different places. The forested was pure supposition on his part that these men were the shooters of Sheck, and his position gives him no authority to go gunning around the country after tramps who take flight at his approach. one of the numerous group has the heavy hand of justice yet been laid.

Only two men have been wanted, and they are the two who shot Constable Sheck at Bloomfield station, last Saturday In the presence of a gaping crowd of about 20 able-bodied men, two supposed burg-larious tramps fired two shots and quietly walked away. They appear to have been walking ever since, and have been seen two or three times every day.

Here are some of the people who have

Mrs. Woods, of Bloomfield, saw them at 9 o'clock Sunday morning; that night they were seen crossing a pasture between Bloomfield and Norton; the same night, they, having made wonderful speed, apparently, were picked up by Mr. Lemon at Brookville and brought to the one-mile house; Monday morning they were seen milking a cow back of Norton, but the same morning they were seen by policeman Smith near the Marsh Bridge. Observing that they were in a hurry, his detective instincts were aroused and he followed them as far as Union street, but as the scent was getting hot he went in search of saw them on King square at 11 o'clock their track. that morning, they do not appear to have woman in Carleton saw them that afterhe had seen them near Westfield, and the same afternoon one Barney Boyle supplied them with provisions at a place seven miles

this side of Sussex.

The city police are not bound to hurry themselves to outside counties to arrest who have committed a crime outside of St. John, but a pure zeal for justice induced Chief Clark and his men to enter upon the pursuit, while Sheriff Freeze seemed quite content that they should do so, and does not appear to have lost any flesh in pursuing th em in his own proper Accordingly, Captain Rawlings and Detective Ring started out to explore the country around Bloomfield. They found Barney Boyle, who with twenty others had allowed the fugitives to escape in the first instance, and found that Barney had hospitably supplied them with provisions afterwards. They also found the tracks of two men near a spring, and probably took the measure of them a la Gaboriou. But they did not find the men. When they returned to St. John Capt. Rawlings was so sure of his theory that he caused all the approaches to the city to be guarded, despite the fact that the chief was equally

Four miles beyond Westfield, the chief there was none at this instance. The

chief admonished Baxter to keep cool.
"I am cool. Look at that," conti the chief, holding out his hand, which did

not show a tremor.

The men could be plainly seen through the crew, and in a twinkling the chief and and in a twinkling the chief and Baxter, taking opposite directions, made a

When they got there, they saw two me moving down the track a hundred feet away. The chief shouted to them to halt, instead they began to run. The chief and Baxter ran too, but the tramps were lean and agile while the good living which the chief has had, from the excellent menus of the Victoria, rendered a July foot race drew his revolver and fired three shots. Whereupon the tramps sought the forest, one of them shouting to the chief that he could go to a very wicked place. The chief and lowed a path about a mile, when it occurred to them that the forest between Westfield

and Magaguadavic covered a large area. So they returned to Westfield. Then the chief sent a telegram to Sheriff Freeze, telling him to "come on." The sheriff sent a reply telling him to "catch from Sussex to St. John, and is said to have taken a train for Westfield. Burial Ground fence as to which will get Whether he got there or not does not there first.

Wednesday without having met him there Wednesday morning, two strangers answering the description of the fugitives

assaulted and beat a man in the vicinity o the country market. They then disappeared. Chief Clark claims that he missed shoot-

ing the men intentionally, and not because he was a bad shot. It is well he succeeded in his intentions, for had he killed one of the fugitives it would have been the duty of Policeman Baxter to have arrested him

The fact that a man does not choose to halt when another man in plain clothes commands him to do so is not evidence of man is a tramp does not forfeit his life.

Very recently two moneyless tramps, who claimed to have been left by the circus, went to the police station for protection. In the court they were ordered to leave the country at once, with the warning that if they did not they would be imprisoned for six months as vagrants. These men must have walked out of the city, and it is possibly they who were at West-field. The fear of arrest as vagrants was enough to make them run.

Besides, while all descriptions of the shooters place their weight at 125 pounds each, the chief says that one of the men he saw weighed at least 150 pounds.

Since Wednesday, "up to the hour o going to press," a large contingent of the police force has been "hemming the fugitives in" with the expectation of catching them every hour. Meanwhile the two men appear to be moving along with celerity. At last account they had been seen simultanescent was getting hot he went in search of another policeman. In the meantime the strangers disappeared, but as Mr. Lemon to Gagetown. The detectives are on

> SOMETHING NOT EXPECTED. Some of the Hospital Commissioners Remembering their Friends.

The general public hospital can in the main boast of as good management as most institutions whose affairs are conducted by an unpaid commission. Not-withstanding this, some things are done at the hospital that should not be done, and which make the commission open to changes of which the majority of them are wholly ignorant and guiltless.

When the tenders for provisions are asked for by the commission, certain staple articles are included in the schedule which can be figured on by every grocer. The competition is so keen that his prices must be exceedingly close, still it is generally understood that if his tender is accepted

of them as their months of power came round (when all business affairs of the hospital must be referred to him) gave such orders to their friends in the business hat the hospital was supplied for months in advance. In two instances this was more especially true. It is not necessary the orders and who received them in order to make this fact plain, that some of the commissioners have an incorrect idea—to put it mildly—of how the supplies should be purchased. They should understand that the business man who gets the tender on the staples expects by right of custom

position should be used for such purposes, that the word "patronage" cannot be excluded from the commissioners dictionary. If it cannot, why the sooner the people know it the better. At the same time it might as well be known who got the plums and who give them.

What About the Light? The city has not yet prepared the contract for the electric lighting of the streets and until the details are arranged the company can do nothing more than has be a close race between electric light and

The oldest active member of the Instiway. He has a novel way of proving that Shamrock oil can accomplish more than commands him to do so is not evidence of murder or of any crime. The fact that a machine, and many other great inventions that people would not believe in at first, but are now common; and says that if people believe in these inventions there is no reason why they should not believe in no reason why they should not believe in Shamrock oil, when it sells for 50 cents a bottle, but is "given away tonight for a quarter dollar." As further proof of the great qualities of Shamrock oil Mr. Mc-Quade—his name's McQuade everywhere and had to support his mother and two younger brothers when he was thirteen years of age. He accomplished this by running away. One would think this was proof enough of the abilities of Shamrock oil, but he further claims that he was in the service of the United States and got full pay and rations for man and beast. The oil must be uncommonly good.

Mr. McQuade has many pecularities. One of these is that he never likes to expectorate, in Calafornia style, on the same boy twice. He does not appear be fore his audience as an Indian doctor with a large hat and long hair, because he can get a hair cut and a shave for 35 cents, and silk hat cheaper than the broad been in any hurry to get out of town.
