

## CUT DUTY ON METALS; CATTLE ON FREE LIST

Retaliatory Duty on Wheat and Potatoes by United States.

REDRAFTED BILL BEFORE DEMOCRATIC CAUCUS

Domestic Animals For Food to go in Free—Forty-five Cents Per Barrel on Flour—To Senate Next Week.

Washington, June 20.—Important reductions in the Underwood tariff bill rates on iron, steel and other metal products, the addition of cattle, wheat, pig iron, angora wool and many other articles to the free list, and an increase in rates on many classes of cotton goods, and some silk products, were the chief features of the revised tariff bill as it was laid before the Senate Democrats today by Chairman Simmons of the finance committee.

President Wilson's desire as to free sugar in 1916 and free wool at once prevailed in the re-draft of the bill. In the general level of its rates, the "Simmons bill" represents a heavier cut from existing rates in the Payne-Aldrich law than did the bill as it passed the house some time ago. Senate leaders believe the bill will reach the senate itself late next week. Here follow the principal changes made by the senate finance committee in the rates of the house tariff bill as presented today to the Democratic senate caucus.

Added to the free list: Alizarine, single jute yarns, school books, cement, crescent oil, antracite and anthracene oil, glaziers' and engravers' diamonds (fisc cut), miners' diamonds and diamond dust, crude artificial abrasives, fax, hemp, fax and hemp tow, Ambre gum (valued at not more than fifty cents a pound), indigo colors, pig iron, wrought and scrap iron, ferro manganese and iron in slabs, blooms, lumps or other forms, castles, leather, including patent leather for shoes, harness and saddle leather, asphaltum, lime stone, rock asphalt, needles for shoe machines, photographic films and moving picture films, cyanide of potassium, steel lenses, etc., not containing alloy, cattle, sheep, and all other domestic live animals suitable for human food, wool of the angora goat and alpaca, paintings, etc., sculptures, etc., of a "professional character".

Wheat, ten cents per bushel in the Underwood bill, was added to the free list, but the Senate committee retained a retaliatory provision for a duty of ten cents a bushel on wheat forty-five cents a barrel on flour and ten per cent ad valorem on other wheat products when imported from a country that imposes duty on American wheat or wheat products.

A retaliatory duty of ten per cent on potatoes imported from countries imposing duties against the United States also will be inserted. Potatoes were unreservedly on the free list in the Underwood bill.

## ST. JOHN MAN TAKES BRIDE AT BATHURST

Joseph A. McGaw and Miss Carrie Cooper, of Gagetown, Wed.—Will Make their Home in Fairville.

Bathurst, N. B., June 20.—The wedding of Miss Carrie L., daughter of Mr. and Mrs. William Cooper, of Gagetown, to Joseph A. McGaw, a popular employe of the St. John Railway Company, was solemnized Wednesday evening at St. George's church, Bathurst, N. B., Rev. J. A. Cooper, brother-in-law of the bride, officiating.

The rectory was prettily decorated for the ceremony which took place beneath a floral bell, apple blossoms and white lilacs were used in the decorative scheme. The bride was gowned in a becoming costume of ivory duchesse satin, trimmed with duchesse lace and apple blossoms. She wore a veil and orange blossoms, and carried a bouquet of lilies of the valley.

After the marriage ceremony the wedding party enjoyed a car ride to The Points, and on their return refreshments were served in the rectory. A large number of costly wedding remembrances were received, including cut glass and silverware. From the employe of the Street Railway Company they received a handsome dinner set.

Mr. and Mrs. McGaw left Bathurst on the Ocean Limited yesterday, and after a short honeymoon trip will reside at 27 Main street, Fairville.

## A STRANGE TRAGEDY IN GLACE BAY

Charred Body of Woman Found Near Ruins of Burned Shack.

DEVELOPMENTS MAY COME WITH INQUEST

Unfortunate Was Mrs. Jerry Toomey Who Lived in Shack After Her Husband Turned Her Out of Home.

Glace Bay, June 20.—The charred remains of a woman, Mrs. Jerry Toomey, are at the undertaker's room here tonight and death came to her under particularly sad circumstances. This afternoon, the woods below St. Joseph's Hospital were found to be on fire. A couple of boys who were early on the scene reported that a woman had been burned. Two firemen, Robert O'Donnell and James Crook, investigated and found the remains near a shack, which had been burned down. The remains were later identified as those of Mrs. Toomey.

An inquest was begun this evening. The most important testimony heard was that of James MacArthur, of Sydney Mines, who has been working here for some time. According to his own story, he met Mrs. Toomey three weeks ago when she told him she had been turned out of her home by her husband and asked to live with him. The next day he built the shack which was burned down in today's fire and they occupied it. MacArthur says the woman's intention was to seek work in Sydney as soon as she could procure means to do so. When he left for work this morning she was washing.

He couldn't explain how the fire started. The firemen say it would appear the fire started in two places. The whole affair is rather mixed and developments may come at the next meeting of the coroner's inquest which will be held Monday morning.

## RIVER YIELDS OLSEN'S BODY

Corpse of Man Who, with Sweetheart Leaped from Bridge at Three Rivers, Now in Town Morgue.

Three Rivers, Que., June 20.—The body of Hans Olsen, who, with Leda Litten, his sweetheart, flung themselves to death from the C. P. R. bridge here on Saturday, was found floating in the river today. It was towed to shore and removed to the morgue where an inquest will be held. No marks of violence were found on the body. A letter in the Swedish language, discovered in the victim's pocket, was taken in charge by the authorities and a translation may throw some light on the mystery of the double suicide.

The finding of Olsen's body renewed interest in the case, and several boats set out in the hope of locating the woman's remains. These efforts up to a late hour tonight were unavailing.

## REV. J. L. DAWSON TO MOUNT STEWART, P. E. ISLAND

Change Made by Interim Committee of Conference—Minister to Inspect Proposed Terminal for Car Ferry.

Charlottetown, P. E. I., June 20.—The interim stationing committee of the N. B. and P. E. I. Methodist conference have made a change in the last station sheet. Rev. J. L. Dawson will be stationed this year at Mount Stewart, P. E. I., and Rev. C. K. Hudson at Bala Verie. The Minister of Railways and party will leave tomorrow for Cape Trinity to inspect the proposed terminal of the car ferry. They will cross to the mainland tomorrow in boat.

## ENGLISH SUFFRAGETTE GIVING HER LIFE FOR THE "CAUSE."

MISS EMILY DAVISON, PHOTOGRAPHED IMMEDIATELY AFTER SHE THREW THE KING'S HORSE. This remarkable photograph of the throwing of the King's horse in the Derby by Miss Emily Davison, the English militant suffragette, who since has died, was taken immediately after the woman had performed her amazing deed and just before she in falling had reached the ground. As can be seen in the photograph, so surprised were the spectators at the unexpectedness of it all, as horse, rider and suffragette came down with a crash, that they did not realize for the moment just what had occurred and kept on talking, laughing and joking and paying attention to the great race.

## SCHOOL BOY ATHLETICS PLANNED FOR ST. JOHN

Standard Offers Perpetual Challenge Cup for Competition Between Teams—Pupils from Grade 8 Down Eligible—Start Next Fall.

The Standard's Perpetual Challenge Cup for competition between the pupils of the different city schools up to and including grade eight, will be a feature of the plan proposed by C. D. Howard, physical director of the Y. M. C. A., for the revival of all branches of athletics in this city. The scheme includes training the school boys in running, jumping, shot put and, in fact, in all branches of sport. Different games will also be played in season. And it is planned to have football, basketball, hockey and baseball teams from each school in the city. The team representing the school winning the highest number of points will receive The Standard Cup each year.

The proposed plan which reflects great credit on Mr. Howard, has received the unqualified approval of Superintendent of Schools, Dr. H. S. Bridges, and the Board of School Trustees as a body, and to private citizens to whom the plan has been explained. It is safe to say that donations and other cups and prizes will be given in generous numbers. It is already understood that the Telegraph, Times and Globe, following the lead of The Standard, have notified Mr. Howard of their willingness to donate perpetual challenge cups for competition.

School boy athletics, which are very popular in the United States, will be introduced under the direction of Mr. Howard who, in seeking aid for his scheme, visited this newspaper with the above result.

For Junior Lads. It is planned by Mr. Howard and his committee, consisting of representatives of each newspaper, Louis Ritchie, Gordon Willet and others, to include only the boys in the junior or common schools up to the eighth grade, and to have a representative body of students from each school on the different teams.

During the summer the details of the plan will be worked out, and the fall when the schools reopen after the holidays, it is proposed to commence with football and basketball. Shortly after the opening of the school, the King, Edward, Victoria, St. Malachi, Central, Aberdeen, St. Peter's, Dufferin, Douglas Avenue and Newman street schools, and grade eight of the High school will be requested to elect a school captain to represent their institution on the committee. The school principals will also be requested to meet the committee to discuss the details and to arrange, in the best manner possible, the complete revival of athletics here.

After the elections are held it is planned to have each school hold preliminary sport trials, and to conduct try-outs for the basketball and football teams for the fall games.

After this the names of the boys making the best showing will be handed into the committee for registration with the M. P. A. A. A. Will Have Expert Instruction. When the teams to represent the ten schools eligible for the games, have been chosen and registered, they will be instructed by capable men in the sport for which they have been entered. The fact that over a thousand boys ranging between the ages of 12 and 18 years will be affected by the plan, gives assurance of plenty of pupils and suitable material from which to pick the future athletes of St. John, while the lads who are not naturally strong will have a golden opportunity to gain health and strength in many exercises under first class supervision.

Besides football and basketball for next autumn, a big junior outdoor meet is planned, although this cannot be assured on account of the lack of suitable grounds. An indoor meet will be held during the winter, and another large field day in the spring. Baseball, of course, will be the big feature for the spring and with ten teams in the league it is confidently expected that the affair will go with a swing. During the summer months Continued on Page Two.

## JUDGMENTS GIVEN IN EIGHT CASES BY THE SUPREME COURT

Fredricton, June 20.—The Supreme Court, Sir Frederic Barker presiding, met today and delivered judgment in eight cases as follows: Brown et al. vs. Barker. Appeal dismissed with costs. Barker, C. J., giving judgment of court, and Barry, J., from whose judgment appeal was taken, no part. In re expropriation of lands of E. Byron Bell by the St. John and Quebec Railway Company. Appeal dismissed with costs. Barker, C. J., delivering judgment. McKewen, J., taking no part.

In re agreements for lands between John Beardon and the St. John and Quebec Railway Company ex parte George Shea. McLeod, J., gives judgment of court, to set aside an order of the court of November, 1912, and all proceedings thereunder with costs. The Railway Company to have the liberty to take out of court the money paid on application to the registrar. Banff, Alta., June 20.—Eva Ballen and Lilly Sutherland, each twenty-five years of age, and employed at the Banff Springs Hotel, were drowned late yesterday afternoon when a ton

## SHERBROOKE MURDER IS STILL A MYSTERY

MURDERER OF INDIAN SENT UP FOR TRIAL

Case Will Come Up on the Second Tuesday of October.

COMMITTED ON EVIDENCE OF HIS FATHER-IN-LAW

Witness Says Attack was Made Without Least Provocation on Part of Victim—Large Crowd at Trial.

Special to The Standard. Gagetown, June 20.—The preliminary hearing of the case of Charles Medley McIntyre, the negro charged with the murder of Gabe Sabatis, an Indian, whom he struck over the head with a stick, was concluded here in the magistrate's court this evening and McIntyre was sent up for trial before the Supreme Court on the second Tuesday of October.

The hearing was begun at 2 o'clock this afternoon and the court house was thronged. The prisoner was brought into the court by Sheriff Williams and was represented by F. A. Guthrie, of Fredericton. John H. Dunn appeared for the Crown.

Eight witnesses were subpoenaed, but after hearing the evidence of Charles McIntyre, father-in-law of the prisoner, the court decided that it was unnecessary to take the depositions of the other witnesses and accordingly committed the prisoner for trial in the higher court. To this proceeding the counsel for both sides agreed.

According to the evidence of the one witness examined, Charles McIntyre, the attack on Sabatis was committed without aggravation on the part of the Indian. The witness told the court that he saw both men at the spot and that the prisoner told the Indian to get it away quick. He (witness) said he heard Sabatis make no objection, and in fact did not even see him move his lips.

Continuing, he testified that after the blow had been struck the prisoner ran away and went to his (witness) house and procured a loaded rifle, and then went to his own house. Witness followed him home and succeeded in getting the rifle from him. The prisoner asked him if the Indian got to his feet after he had struck him. When witness told him that the Indian was dead, the prisoner told him he (witness) could help him out as he could say that he (the prisoner) did not strike the blow.

The testimony of the prisoner's father-in-law being concluded, the magistrate decided that the testimony was so clearly against the prisoner that it was unnecessary to call the other witnesses and these were accordingly subpoenaed to appear before the Supreme Court when the case comes up in October.

Favorite Pupil Squealed. They got him when a favorite pupil squealed. This afternoon he sent word to Judge Swann that he wanted to confess. Seven closely written typewritten pages, locked in the desk of Judge Swann contain what he said.

Time and again, Justice Swann said, Rader declared with names and dates, that he paid men in the police department to let him remain free. One time, Rader said, he paid only \$150 to avoid arrest when caught stealing a truckload of merchandise worth \$10,000. The only time he was "stung" he said was when a detective refused to divide a million dollars reward for recovering stolen goods. Rader says he stole the goods and, not being able to sell them, handed them over to the detective to claim the reward.

A dozen or more burglars have told the police from time to time of Rader's school, but somehow he eluded arrest and kept on teaching his trade.

## HARVARD WINS IN GREAT RACE, DEFEATS YALE

Varsity Eight Carrying Crimson Colors Has Easy Victory Over Sons of Old Eli at New Haven.

New Haven, Conn., June 20.—For the sixth consecutive year, Harvard's varsity eight oared crew triumphed over the Yale oarsmen in the long four mile race that closed the annual inter-university regatta here this afternoon. Preceded by the two crimson victors of the afternoon and the two wins of Thursday, it marked a Harvard sweep that has been equaled but once or twice in the long history of Yale-Harvard rowing. Tonight bands of Cambridge students are parading the streets shouldering new brooms emblematic of the crimson sweep of the Thames River.

The first defeat administered to Yale was so crushing and complete that the English stroke and rowing methods imported from Oxford are being held up to ridicule this evening in a manner which many an oarsman thinks unjust at this time. Sweeping down the river with a steady and consistent stroke, Harvard crossed the finish line eleven lengths ahead of the Blue, in 21 minutes and 42 seconds. The Ell eight rolled and splashed across in Harvard's wake, just thirty-eight seconds late, as badly defeated a crew has been seen on the Thames river course in some year.

Except during the first mile the race was merely a procession, with the Crimson oarsmen increasing their lead steadily. It was not that the Yale sweepers broke or failed to get speed out of their English stroke, but Harvard surpassed them in every department of the art of rowing.

Police Now to Engage in New Line of Research Work.

NITRO-GLYCERINE NOT USED IN BOMB

Neither Was the Explosive Manufactured at Plant Near City of Sherbrooke—Chief Feels Arrest Will be Made.

Sherbrooke, P. Q., June 20.—At the end of three days, following the tragic death of Mrs. Blodgett in this city, nothing has transpired sufficient to justify the authorities in arresting any person as the possible sender of the bomb, the opening of which caused such a fatality. This, however, does not indicate that no one is suspected nor that there is no clue.

Chief McCaskill, since his arrival, has pretty well covered the town and as a result of many conferences and inquiries is at work upon a line of investigation, which may lead to an arrest. The difficulty in regard to this is that there is at present very little more than a small clue which for the most part consists of hearsay and suspicions based upon opinion and rumor all of which demand some link to connect the person and the deed.

The evidence which may constitute that link is rather slender, but it may be broadened out by dint of expert knowledge and persistent efforts.

An Important Point. The substance of which the explosive was composed was one important point upon which the authorities are proceeding. It has already been ascertained that the package did not contain nitro-glycerine, which is the most common preparation used for such criminal acts, but that there were two other chemicals of equally dangerous nature used.

A visit paid to Capelon, where there is an explosive plant, owned by Mr. George M. Howard, has convinced the detectives that the explosive material was not obtained there. The remnants of the material that were found in the body of the victim have been placed in the hands of Dr. Parisseault, health inspector for the province, to be analyzed but it is not expected that the result of that analysis will be before Monday night.

While Chief McCaskill believes his presumptive suspicions are well worth following up, he has not yet succeeded in establishing the connecting link, and was not in any way disposed to admit that an arrest was imminent, though he hopes that it will be effected ultimately.

## AUSTRALIAN TEAM IN PHILADELPHIA

Antipodean Cricketers Scored Big Lead on Opening Day's Play in Quaker City.

Philadelphia, June 20.—The Australian cricketers overwhelmed the gentlemen of Philadelphia today in the opening day's play of their first match in this city. The visitors had scored 300 runs for a loss of only three wickets when stumps were drawn for the day, while the Philadelphians' side was retired for a total of their English bats.

L. A. Cody scored 97 runs for the visitors before he was retired, while W. Hardley had scored 110 and was not out when the game was called for the day.

Methods imported from Oxford are being held up to ridicule this evening in a manner which many an oarsman thinks unjust at this time. Sweeping down the river with a steady and consistent stroke, Harvard crossed the finish line eleven lengths ahead of the Blue, in 21 minutes and 42 seconds. The Ell eight rolled and splashed across in Harvard's wake, just thirty-eight seconds late, as badly defeated a crew has been seen on the Thames river course in some year.

Except during the first mile the race was merely a procession, with the Crimson oarsmen increasing their lead steadily. It was not that the Yale sweepers broke or failed to get speed out of their English stroke, but Harvard surpassed them in every department of the art of rowing.

Using a trifle quicker stroke, Coach Wray's pupils drove their long knife-like racing craft through the water at a faster pace and with less lost motion, yet, in the end, they failed to show the symptoms of excessive exertion. As the shell sped across the water, finishing with a racing sprint that carried the stroke up to 40 to the minute. As the shell sped across the water, finishing with a racing sprint that carried the stroke up to 40 to the minute. As the shell sped across the water, finishing with a racing sprint that carried the stroke up to 40 to the minute.
