## Moncton Feels It Is Paying Too Much of County Assessment

Old Question of Separation from County for Municipal Purposes Discussed.

Special to The Standard  
Dorchester, N. B., Jan. 20.—The agitation for a separation of Moncton City from the County of Westmorland, for municipal purposes, was again brought to the front at this afternoon's session of the Municipal Council by Ald. McKinnon, one of the Moncton representatives at the Board. It was claimed by Ald. McKinnon that Moncton was paying more than its rightful share of the county's assessment, both for schools and general municipal purposes. Moncton's county assessment is \$30,000 for general purposes, and over \$14,000 for schools, being more than half of the total assessment for the County. Ald. McKinnon accounted for this by stating that Moncton paid on a hundred per cent valuation, whereas the County, outside Moncton, was assessed on more than fifty per cent of the valuation. A committee, composed of Coun. Campbell, George, and Chapman and Chapman was appointed to meet the City Council of Moncton to discuss claims for adjustment in the 1921 assessment.

The Municipal Council, this afternoon, declared itself in favor of a change in the rule of the road, "turn to the right," but passed resolutions in opposition to a proposal of the Union of N. B. Municipalities for the appointment of provincial board of valuation and the proposed bill providing for pensions for municipal officers. Council adjourned this afternoon six o'clock.

The suggestion that Lenin might come to England, your correspondent learned today, has already put the local Communists in high feather, and a programme for an elaborate reception for the Soviet dictator is being discussed with auxiliary plans for speeches in London and the chief manufacturing centres at which Lenin would address his "comrades" in England and bring them word direct from Moscow, designed to give them new inspiration. Such a manoeuvre, it is extremely distasteful to the English Government, and even more so to the British business element which, while in a delirium of power, has failed to make use of her opportunities to bring order into the world—an omission which history will write as the cause for future wars," says an editorial today in Die Zeit, concerning the Washington Conference.

"America's duty, after she entered the war and secured victory to the United States, was to use all her influence to shape the purpose of the war and the peace which followed," continues the editorial, "so that the new conditions would assure the harmonious operation of the world. This she should do now."

The newspaper believes that America, weighing its judgments and being ready to enforce the law by arms, is the world's sole salvation now.

## How To Clinch The Russian Trade Is Live Question

Conservative English Business Men Wish Full Trade Relations With Moscow.

London, Jan. 18.—How to clinch the Russian trade without being contented is becoming a live question among English officials, more especially since Lenin's Tshiborn and other Soviet leaders have evinced such a desire to come to England to conduct pourprie, rather than to Genoa. The conservative English business men for once as one with the extremists in wishing full and free trade relations with the Moscow government, but at the same time the Conservatives do not want to run the risk of reviving the Communist feeling in Great Britain by having the Russian leaders come to their shores, and that is exactly what the Communists have wanted.
