CHARACTERISTICS OF OUR TIMES

CHARACTERISTICS OF OUR TIMES

God Said: "I Will Show Wonders in lands, and of a population of 340," These things I say because I want you to be alert. I want you to be watching all these wonders unrolllands, and of a population of 340,-000, 215,000 were drowned. Only those saved who had climbed to the top of the highest trees! Did you ever see a cyclone? No? Then I pray God you may never see on. I saw a cyclone on the ocean, and it swept us 800 miles back from our ourse, and for thirty-six hours during the cyclone and after it we extired at 9 o'clock that the barometer had fallen, but at 11 o'clock at night we were awakened with the shock of the waves. All the lights out. Crash went all the lifeboats. Waters rushing through the skylights down into the cabin and down on the furnaces until they hissed and smoked in the deluge. Seven hundred people pray-ing, shricking. Our great ship poised a moment on the top of a mo tain of phosphorescent fire and then plunged down, down down until it seemed as if she never would again be righted. Ah, you never want to

see a cyclone at sca.

But look at the disasters oceanic. But look at the disasters oceanic. Shall I call the roll of the dead shipping? Ye monsters of the deep, answer when I call your names. The Ville de Havre, the Schiller, the City of Boston, the Melville, the President, the Cimbria, the Oregon, the Mohegan. But why should I go on calling the roll when none of them answer and the roll is as long as the white scroll of the Atlantic surf at white scroll of the Atlantic surf at Cape Hatteras breakers?

Look at the disasters epidemic. scarlet fevers and the typhoids of our time. From Hurdwar, India, where every twelfth year 3,000,000 devotraids have struggled in every prosective the cases. They have their existence has been a miserable one.

But now I turn the leaf in my subject, and I plant the white lifes and the palm tree amid one nightshades and the myrtle. This age no more characterized by wonders of disaster than by wonders of blessing—tlessing of longevity, the average of homan life rapidly increasing. Forty years now worth 400 years once. Now I can travel from Manitoka to Now I can travel from Manitoba to New York in less than three days three months. In other words three days now are worth three months of other days. The average of human life practically greater now than when Noah lived, with his 950 years and Methuschah lived his 969 years. Blassings of intelligence. ## not loosen and are driven by reins they must answer. I preach no fatalism. A swarthy engineer at one of the depots in Dakota said, "When will you get on the locomotive and take a ride with us?" "Well," said I, "now, if that suits you." So I got on one side of the locomotive, and a Methodist minister, who was also invited, got on the other side, and between us were the engineer and the stoker. The OF HIS PARAMO
