

DEATH ENDS CAREER OF HON. F. D. MONK

Montreal, May 15.—Hon. F. D. Monk, P. C., M. P., died this morning at 8:25 a.m. at his residence, 328 LaSalle street east. He was conscious to the last.

At his bedside were his two sons, P. A. Monk and J. D. Monk, and his daughter, also the dead statesman's brother. Funeral arrangements are not yet completed.

Hon. Mr. Monk was born in Montreal, April 6, 1856. He was the fourth son of the late Hon. Samuel Cornwallis Monk, a judge of the court of Queen's Bench for Quebec, and Rosalie Caroline DeBartch, his wife. His father was of English descent, the family having come originally from Devonshire, and his mother's people from France, settling in New France under the French regime. Mr. Monk was educated at the Montreal College, and graduated in law at McGill University. He was called to the bar in 1878, and created a Q. C. in 1882. He had been professor of constitutional law in the Montreal branch of Laval University, which had conferred upon him the degree of B. C. L. He was married in 1880 to Marie Louise Monk, daughter of the late L. H. Senecal, advocate, who died in September, 1911.

Mr. Monk had been for twelve years a school commissioner for the city of Montreal. He was elected to the House of Commons at the general elections in 1896 and re-elected in 1900, 1904, 1908, and 1911. He was elected opposition leader of the Conservative party in the House of Commons in 1910, but he resigned in 1913. He was appointed minister of public works in Mr. Borden's cabinet upon its formation on October 10, 1911, and resigned his portfolio on October 2, 1912. He was a Catholic.

AN OPEN LETTER TO DR. LANDRY

A subscriber sends the following open letter to Hon. Dr. V. Landry, Provincial Secretary:

In the course of a speech made by you during the recent session of the legislature, you made the following reference to the school system of the province: "I am proud of the educational system of the province, but will not say that it is perfect, and that it is that I do not approve of non-sectarian schools."

Statements made by a member of the executive of the public school system in the manner in which the above quoted statement was made; that is on the floor of the house and in the presence of the representatives of the people of the province, are usually regarded as authoritative by the government, forecasting the policy of that government.

We have here an expression of disapproval of the public school system of the province, by a member of the executive. Not only that, but we also have an expression of preference for separate schools, and both expressions to all appearances, authorized. You do not state your reason for preferring separate schools.

For the reasons already mentioned, I would like to ask you to kindly inform the public through the press whether or not it is the intention of the government to adopt a policy of non-sectarianism for the province, and why you prefer that system to the present system of public schools.

I might say that there is nothing particular implied by this enquiry.

D. C. M.
Upper Blackville, N. B., May 13, 1914.

The Angler's Protest

(New York Sun.)

Speak not to me of days that mark
The conquest of the air.
I have no wish to dwell in space,
I find this world so fair.
I love the field, I love the wood,
The very scent of earth is good;
And—there's my rod and line!

I could not bear to live apart
From gentle, winding streams
Wherein I cast my baited hook,
Then sit me down to dream.
No quicker thrill can touch my soul
Than that which creeps along the pole
At e'en the faintest bite.

So leave me to my good green earth,
My shady woodland nook.
No music of the spheres can charm
Like that of babbling brook.
Go soar aloft in free air,
If you desire, but as for me,
I've simply got to fish!

—Blanche Elizabeth Wade.

The Past is Past

The Committee on the Revision of the Articles of Faith had recommended the adoption of a declaration to the effect that all infants are saved. The recommendation was adopted unanimously.

"Now, Mr. Moderator," said a delegate from Pittsburgh (Pa.), "the Presbyterian declaration of 1868 was a declaration of retroactive effect."

The moderator did not seem to hear him—Christian Register.

To remove oil stains from carpets

Make a paste with fuller's earth and cold water, and spread thickly on the oil spot. Let it dry, then remove with a stiff brush.

ABE MARTIN

Mrs. Tilford Moots has received a postal card from her nephew ABE MARTIN, who was married, but it didn't say what on a feller works harder for a raise than he ever does again.

AGRICULTURE

Individual Fair Play in Connection With Dairy Cows—Cheese Factory and Creamery Plans—Correct Information.

In a herd of twelve dairy cows the average yield last year was 3,750 pounds of milk and 144 pounds of fat. The ten best cows in the district averaged 6,200 pounds of milk and 221 pounds of fat, while the ten poorest gave only 2,515 pounds of milk and 107 pounds of fat.

When it is seen that the difference in the average of these two groups of ten cows is 3,685 pounds of milk, while between the best and poorest individual cow there was actually a difference of 3,685 pounds of milk, it is quite evident that the average is quite unsatisfactory and unfair when it comes to dealing with a living, nervous, sensitive cow.

That difference of \$61.95 between the earnings power of two individual cows is a large sum of money. It is a sum that is not simply one of a team, but an individual whose peculiarities are well known to the owner. It is a sum that is not simply one of a team, but an individual whose peculiarities are well known to the owner. It is a sum that is not simply one of a team, but an individual whose peculiarities are well known to the owner.

Cheese Factory and Creamery Plans

The dairy and cold storage commission has, for many years, furnished plans and specifications for cheese factories and creamery buildings. According to a large number of factories in different parts of the country, that have been built according to these plans, are now in successful operation. The plans are well adapted to the needs of the industry, and the commission is now preparing to issue a new set of plans, which will be more complete and more up-to-date than the old ones.

WYANDOTTES DO WELL IN LAYING CONTESTS

White Leghorns Have Established a Record Almost as Good.

(New York Sun.)

For five or six years experiments have been made in England, Australia, and the United States to determine which of the various breeds of laying hens lay the most eggs. The results have been very interesting, and the White Wyandotte has been found to be the best layer. In a recent laying contest, a White Wyandotte laid 147 eggs in 15 weeks, which is a record for any breed.

For five or six years experiments have been made in England, Australia, and the United States to determine which of the various breeds of laying hens lay the most eggs. The results have been very interesting, and the White Wyandotte has been found to be the best layer. In a recent laying contest, a White Wyandotte laid 147 eggs in 15 weeks, which is a record for any breed.

English poultrymen pay greater attention to the quality of their table poultry than do our American producers.

The former the Dorking is a prime favorite. It is regarded as the best table fowl in the world. It possesses the flavor, the fine skin, the abundance of meat and the white flesh and shanks which are demanded by the best of cooks.

As an egg producer the Dorking is not usually highly considered, though it must be confessed that certain individuals are very good layers. The eggs are of good size, white in color.
