## Remarks on Accounts.

**L**AST year we began with a balance of \$204.81, but close with a deficiency of \$95.91; our expenditure therefore has exceeded our receipts by \$300.71.

Last year the average cost of each child (boys and girls) for board, clothing, tuition, fuel and everything, was about \$103; this year the average cost of each pupil, (boys only) has been about \$120.

The cause of this increase in expenditure is that now we have boys only we have to spend double the money on clothing, (\$815 against \$412), and have also to pay for laundry work and mending which was formerly done by the girls. Another cause for the present deficiency may be

that we have handed over to the Girl's Home a good proportion of the money given us for general purposes. Last year the general contributions in Canada placed to the credit of the Shingwauk Home, amounted to \$533.73. This year it is only \$396.55.

We have forty-eight hungry boys now in the Home, and we would ask our friends to look attentively over the long list appended in the supplement, and remember that each of those boys will want breakfast, dinner and supper for 300 (at least) consecutive days, that each will wear out shirts and socks and boots just as fast as a white boy, and that each of them will be shaking and shivering if he has not a
