## Haig kills red Mom

WASHINGTON (UPI) — U.S. State Secretary Alexander Haig shot his own blindfolded mother to death today in front of a group of Republican Senators after announcing that "tendencywise, her leanings are in the Communist directionality."

Haig said he realized his family was in danger of "political contamination" when, in a routine mail check the FBI discovered a copy of *Redbook* addressed to his mother. FBI officials immediately notified Haig, as they do in all such cases.

But rather than subject his mother to the usual witchhunt procedures, he decided to make her an example of how America should deal with internal subversives, he said.

Immediately after the execution, Haig set down his Uzi submachinegun and dictated a letter to his surviving family members announcing, "There'll be no more communist sympathizing. I'm in control now."

The Senators, led by mentor Jerry Foulwell, then set fire to the body in ritualistic fashion

## Body parts in city water?

The Department of Health and Welfare has confirmed earlier statements that "it is entirely possible" that dehydrated human body parts have been finely mulched and sifted into the Edmonton water supply.

Suspicion ran rampant after several thousand people reported calcium poisoning. City Police suspect foul play.

"It's bizarre, but the high natural calcium levels in the water main, for example, could only have been caused by huge amounts of crystallized human bones," translating into hundreds of human bodies, according to chief of police Bob Looney.

"We suspect foul play," the chief said. Police suspect there are three sources of the bodies: one is unnatural death but Looney says it would be impossible to trace Edmonton's thousands of homicides and missing persons per month, mostly children; the second is natural death - with mortuaries supplying the raw material; the third is grave-theft.

Police are combing Edmonton cemeteries for illegally dug graves, and large mortuaries are being similarly investigated.

The city's three largest morticians have accused Edmonton's host of small, independent crematoriums of the calcium poisoning, charging they did it to subvert the Big Three's lucrative business.

Meanwhile, Edmonton hospitals are overflowing with victims of calcification which causes bone stiffness, premature baldness and worsens even the mildest arthritis.

So now Edmontonians have an even *better* reason not to drink the water!

## SUNrise again

Uni-Sun circulation manager Joe Fudgett announces another BIG rise in SUN readership.

Our new system of tabulation shows that 25,847 people read the Uni-Sun.

Of that total 4,985 buy it at a newstand., 7,620 read it over other people's shoulders on the bus, 220 read crumpled, day-old copies left in the sauna and 13,022 peek at the Sunshine as they pass by a drugstore.
