

HOLSTEIN-FRIESIAN NEWS

Farm and Dairy is the official organ of The Canadian Holstein-Friesian Association, all of whose members are readers of the paper. Members of the Association are invited to send items of interest to Holstein breeders for publication in this column.

GOSSIP

GLEN BUELL HOLSTEINS TO BE SOLD

At Glen Buell, on April 7th, the entire herd of Holstein-Friesian cattle, at "Maple Glen Stock Farm," will be disposed of without reserve, as the owner is leaving Alberta. This sale will afford a chance of a life time, as in it will be found animals of both sexes of excellent breeding viz., Inka Sylvia De Kol with a record of

over 95 lbs. of butter in 7 days, made from a 2% udder, which we believe is the largest record ever made under similar circumstances. Her dam was Inka Sylvia, that in 1897 held the world's record for a 3-year-old with over 20 lbs. milk in one day and 21.95 lbs. butter in 7 days. She was also a champion test winner at Toronto and also a show fair, and a member of our gold medal herd. Her dam was the great Carmen Sylvia, that also won the \$150 test at Toronto over all breeds in 1895 and 1897. She was also the dam of 25.57 lbs. tested milk. Four generations of the Sylvia family tested viz., a 2-year-old, 3-year-old, and daughter of Inka Sylvia De Kol will also be sold, one by present stock holder, other Alta Posch and Paul Beets De Kol, sure to bring a combination of breeding. Another high record cow is Rooney Bell 2nd, with a 25.73 lbs. test, in 7 days,

and 100 lbs. 30 days' test, and over 96 lbs. milk in one day. These are the two largest record cows ever placed in public sale by Canada, and ought to be sought after by many good fanciers or beginners for foundation stock, as the best is always the cheapest. Another fancy bred cow is Clintonia Harrold De Kol 3rd, with a 17 lb. 2 record. This is the only heifer in Canada to have so high a record dam. Her heifer calf by Sir Geleiche Walker Segis will be sold. Two cows, sisters to Francis 3rd, 29.16 lb. test, ought to be good blood to obtain one, mostly all from one dam, one from a 26 lb. dam from tested 22 1/2 lb. dam, another by 26 lbs. sire, and another by a son of a 30 lb. cow. Young services bulls of extra breeding are also included, namely one from a 23 lb. dam, and two others sired by a son of a 30 lb. cow, ought to be good herd headers, together with Oakland Sir Maids, whose four nearest dams average over 28 lbs. each 7 day test. His offspring are very desirable, several selling for good money, as high as \$400 being offered for his get in private sale. Take it altogether, this has ever had to obtain some of the highest bred cattle with large records at their own prices, as no cows with such records have ever before in Canada gone under the hammer.

Remember the date and place, April 7th, Glen Buell, Ont. where the R. & W. train will leave Brockville at 9:30 a.m., letting intending passengers off at the farm. The train from Westport will also stop at the farm in morning, and each train stops on returning. Lunch will be served—G.

HOLSTEIN SALE AT BEALTON

The auction sale of pure bred Holstein cattle on the "Maple Stock Farm," Bealton, Ont., March 30, 1910, includes 30 head, 18 females and 12 bulls. These cattle are all in the pink of condition. Careful breeding and good feeding has made these cows a choice lot. They possess good sized square udders and milk from 18 to 30 lbs. a day. There is found in this herd some cows as Aulinda Crown De Kol, No. 6515, R. of M. cow, with 18 lbs. a day, and over 15,000 lbs. for one season. At city prices this is worth over \$200, to say nothing about her calf, which is worth from \$75 to \$100. Lida Patricia, No. 3284, another cow in the herd, made 19 1/2 lbs. of butter in seven days. Many others in the herd are just as good. Most of the matured cows are in the R. of M. Some very promising young heifers will make good records. A number of the cows are in calf by Count Merceon Fatorii—a great sire. The young bulls are the right kind, the kind that will please any person; nearly everyone are good enough for a show ring. Eight of these calves, sired by Sir Oliver Schulling, will be ready for service. He was a grand good sire. He was ready for the show ring at any time, and comes from a strain of heavy milkers. His stock is all true to color, good shape and good size. I sent one of his calves—Doctor Schulling—to Toronto exhibition, and won first prize for a senior bull calf, 1899. Most of the calves we are offering are generally so good. Nearly all of these young bulls are from R. of M. dams—doubtful if a better lot has been offered. Now is your chance to get a good bull to head your herd. The Holstein cow is the dairyman's friend. Why? Because she nets him a good profit, after her living is paid. The Holstein cow has had to work her way up, but she is today at the head of all breeds for milk and butter. She is a hearty, strong constitution cow that ranks so high. Everything offered in the sale will be positively sold. Send for a catalogue and get the breeding of the cattle. Trains will be met at 10 a.m. and 10:45 a.m. at Villa Nova station—William Slaght, Bealton, Ont.

FREE SAMPLE OF AMATITE.

Many Farm and Dairy readers may not know that the makers of Amatite Roofing distribute free samples of their information of prospective purchasers. Some of our readers have probably doubted that roofing could be made so light which would need no painting, and the sample of Amatite is convincing evidence that a practical mineral surface has been invented. Just drop a postal card to the nearest office of The Paterson Manufacturing Company, Ltd., Toronto, Montreal, Winnipeg, Vancouver.

"Farm and Dairy" has been a real friend to me during past years—a friend that has benefitted me more probably than any other—John W. Toews, Alberta.

TORONTO

NORTHERN ONTARIO

The Forest and Mineral Wealth of Northern Ontario has attracted many people from all parts of the civilized world.

One-ninth of the world's reported output of Silver in 1908 was taken from Ontario mines.

New discoveries of undoubtedly richness are being constantly reported from sections far distant from the famed Cobalt. Yet a more certain reward is insured to the Settler who acquires for himself

160 ACRES OF THE RICH AGRICULTURAL LANDS

now open for settlement and made accessible through the construction of Railways and Colonization Roads.

THE FERTILITY OF THE SOIL IS UNSURPASSED

The Timber is in demand at a rising price. Mining, Railway and Colonization Road construction, Lumbering, etc., afford work in abundance to those who have not the means to remain on their farms. Finally, these lands also provide a market for the surplus of prices unequalled anywhere.

Cochran, the Township of the T. & A. Ry., now under construction, is in the same latitude as the southern part of Manitoba, and 500 miles nearer the seaboard.

That the experimental stage is past is clearly demonstrated. The country is rapidly filling up with Settlers from many of the other Provinces, the United States and Europe.
