

RECENT REPORTS OF THE New Waterous Traction:

G. A. McCubbin, Chatham, Ontario, writes, August 22nd, '98:
"The 14-H. P. new Waterous Traction Engine I purchased of you this season is giving the best of satisfaction, has all the power that is needed, and is easy on wood—half a cord will run all day, and 10 barrels of water. I draw the separator with it wherever I go; it is easily handled on the road. There was a gang of men threshing with an engine made by another firm and they could give the grain so fast that they had to stop and get up steam, and they came where I was threshing and went in the mow to shut my engine down, but they have not done it yet."

Nicholas Sliney, Richmond Hill, Ontario, writes, 30th August, '98:
"As you have not thought it worth your while to ask for a testimonial, I thought I would say a few words as to the good qualities of my 14-H. P. new Waterous Traction Engine. It is the best firing engine I ever put a stick of wood into. I have run four miles with one fire, which I can prove by two responsible men, and for power we have power to spare at 80 lbs., and I can travel on the roads at the rate of four to five miles per hour with 60 lbs. of steam and draw my tank. I have drawn my machine and tank up the steepest hills I have on my route and did not see much difference. She is as perfect an engine as you will ever get. I cannot say too much about her, and for the small amount of wood she uses. I will give you the names of a few men for whom I have threshed and who were astonished how little I used compared to my Champion and other makes of engines: Newton Bros., John Royle, John Duncan, Wm. Pugsley, Wm. Morton, Wm. Coogrove, and Wm. Rumble, all of Richmond Hill."

Lightest Engine for its power, 14-H. P. Traction, with water and fuel, weighs only 9,300.

Ample Boiler—blows off when running at 1-3 over rated power; maintains its pressure under hardest work with injector full on.

Very Economical—easy on fuel and water; a very quick steamer.

Quickly Set and lined with separator; steering wheel on fly-wheel side.

FOR PARTICULARS, ADDRESS

WATEROUS BRANTFORD, CAN.

A FARMER'S SON!

Needs a business education in order to successfully manage the business affairs of the farm. A training in commercial subjects in the

Hamilton Business College
