### BANKING BY MAIL

Business may be transacted by mail with any of the branches of this Bank in Canada and the United States, accounts being opened, deposits made or funds withdrawn in this way with equal facility. Every possible attention is paid to out-of-town accounts and general farmers' business. Notes discounted, sales notes collected, etc.

### The Greatest Plow Achievement

The picture opposite tells its own story. The high foot-lift, self-leveling feature is a wonderful improvement over other sulky plows. But still a greater improvement is the adjustment for raising and lowering the heel. With this adjustment the operator can set the plow so all friction is removed from the under side of the landside and share, except right at the point, making it exceedingly light draft. And it enables him to set the plow so it will enter and plow hard ground where other sulky plows cannot be made to plow.

### Self Leveling High Foot-Lift Sulky Plow

J. I. Case Plow Works, Dept. R33 Racine, Wis.

### The Farmer's Friend

For Grinding, Pumping, Churning, and General Farm or Machine Shop Work, the

### Fairbanks-Morse Gasoline Engine

THE CANADIAN FAIRBANKS COMPANY, LTD. 92-94 Arthur St., Winnipeg.

Please send me illustrated Catalogue No. Gasoline Engines. I may want..... H. P. Engine to run ..... Name ..... Province .....

## The Sense of Security

A Man likes to feel that if his buildings burn down he has sufficient insurance to replace them.

In the same way the business farmer likes to feel that when he has gone to all the expense necessary to produce a good grain crop, he has a machine which will successfully harvest it.

We suggest the well-known McCormick binder as being a machine which will do this work with the greatest certainty.

No grain is too tall or too short, too heavy or too light, or too tangled for the McCormick—this machine will work successfully in any field where a binder can be operated.

The McCormick has triumphantly stood the test of time, and today represents the highest attainment in the manufacture of harvesting machines.

This machine is a triumph of structural strength combined with compact solidity and correct style.

The symmetrical design and the excellence of its work in the harvest fields of the world have made the name McCormick a household word in every country on the globe.

When mounted on the binder truck the

machine can be easily transported from one field to another, through narrow gateways, and can be stored in a limited space.

The McCormick knottor is simplicity itself, having only two working parts—fewer parts that move than there are fingers on the human hand.

The binder needle will not wear out, for the reason that the eye as well as the center of the frame and heel of the needle are fitted with hardened steel wearing pieces over which the twine passes.

The McCormick binder is a light draft machine,—it is the machine to buy.

The McCormick line of harvesting machines is complete and includes, besides grain and corn harvesting machines, binder twine, mowers, tedders, sweep rakes, side delivery rakes, hay loaders, stackers. Also a complete line of tillage implements and seeding machines, comprising disk drills, shoe drills, hoe drills, cultivators and seeders, smoothing, spring-tooth and disk harrows, land rollers and scufflers.

Also gasoline engines, cream separators, hay presses, wagons, sleighs, and manure spreaders.

See illustrated catalogue for detailed illustrations and descriptive text of any or all of these machines. Call on the local McCormick agent for information or write nearest branch house for catalogue.

## Get Ready for Spring Roofing

When you build, you want the roofing that will give you the best service—that will last so long that its cost per year is less than any other.

Paroid has proved in actual use on farm and dairy buildings, on factory and railway buildings, on government buildings at home and abroad, to cost less per year than any other roofing.

There are good reasons for it:

It is better made and is made of better materials.

Its basis is a better, tougher, more durable felt—made in our own mills. (Established in 1817.) We are in position to know that it is. You cannot afford to buy a roofing made from a cheap felt nor from a manufacturer who does not make his own felt.

## PAROID

Paroid has a thicker, smoother, more pliable coating than any other ready roofing. It is better all the way through. You can see and feel the difference.

It is the only roofing laid with square, rust-proof caps which do not rust nor work loose and which have the largest binding surface.

Read our offer and let us prove to you its superiority. If your dealer cannot supply you, don't take a substitute. Write to us direct.

### Send Now For Free Samples

and find how to save money on your roofing. If you enclose 4c in stamps for postage, we will send you free our new 48 page book of Complete Plans For Farm, Poultry, Dairy and Live Stock Buildings. It will save you money.

F. W. BIRD & SON, (Established in U.S.A. in 1817) WINNIPEG OFFICE: 937 Logan Avenue Factory and Office.—Hamilton, Ont. Originators of roofing roll containing complete roofing kit. We stand back of every foot of Paroid.

### OUR OFFER

Buy one lot of Paroid; open it; inspect it; apply it to your roof, and if then you are not satisfied, send us your name and address, and we will send you a check for the full cost of the roofing, including cost of applying.
