Miss Irene Gullen then favored us with a solo, Miss Ivy Cornell, accompanist.
Mrs. Hurley gave an address on "The Dependable Woman," pointing out that the woman who stands ready to do her duty in the nation's great need is the dependable woman. We are really just behind the times. Women are proving their efficiency and their worth, and are not slackers. The old slogan is "On to Berlin," the women are behind them backing them up. Mrs. Hurley made mention of one of the sons of one of our members, Major James, who, in order to be in the fight reverted to the rank of a captain, then, when the commanding officers were killed, stepped forward and led the men. This was winning his honor and we are proud of one of our boys doing this.
A duet by Misses Patterson and Thomas was an enjoyable item. The National Anthem closed the day's programme.

DRINK HOT WATER IF YOU DESIRE A ROSY COMPLEXION

Says we can't help but look better and feel better after an inside bath.

To look one's best and feel one's best is to enjoy an inside bath each morning to flush from the system the previous day's waste, sour fermentations and poisonous toxins before it is absorbed into the blood. Just as coal, when it burns, leaves behind a certain amount of combustible material in the form of ashes, so the food and drink taken each day leave in the alimentary organs a certain amount of indigestible material, which if not eliminated, form toxins and poisons which are then sucked into the blood through the very ducts which are intended to suck in only nourishment to sustain the body.

If you want to see the glow of health on your cheeks, to clear your skin, get clearer and clearer, you are told to drink every morning upon arising, a glass of hot water with a teaspoonful of limestone phosphate in it, which is a harmless means of washing the waste material and toxins from the stomach, liver, kidneys and bowels, before putting more food into the stomach.

Men and women with sallow skins, liver spots, pimples or pallid complexion, are those who wake up with a coated tongue, bad taste, nasty breath, where the bowels are clogged with headaches, biliousness, acid stomach or constipation should begin this phosphate hot water drinking, and are assured of very pronounced results in one or two weeks.

A quarter pound of limestone phosphate costs very little at the drug store, but is sufficient to demonstrate that just as soap and hot water cleanses, purifies and freshens the skin on the outside, so hot water and limestone phosphate acts on the inside organs. We must always consider that internal sanitation is vastly more important than outside cleanliness, because the skin pores do not absorb impurities into the blood, while the bowel pores do.

FORGETFULNESS
COST HIM DEAR

A Finnish bootlegger before the Port Arthur police magistrate recently declared that he had forgotten how to speak English. Whereupon the court fined him an extra \$50 just to stimulate memory.

"Cold in the Head"

Is an acute attack of Nasal Catarrh. Persons who are subject to frequent "colds" and "flu" are subject to frequent attacks of Nasal Catarrh. HALL'S CATARRH MEDICINE will build up the system, cleanse the blood and render them less liable to colds. Repeated attacks of Acute Catarrh may lead to Chronic Catarrh. HALL'S CATARRH MEDICINE is safe internally and acts through the blood. It is the only medicine of the kind. All Druggists 75c. Testimonials free. HALL'S CATARRH MEDICINE will cure you.

"Mother's Tender Flowers"

Watch the tongue of your young! Children droop and wither if you permit constipation poison to be absorbed into their delicate systems. Hurry! Give Cascarets to clean the little clogged-up liver and bowels. Children love harmless Cascarets because Cascarets taste like candy—only 10 cents a box! Grand!

When a child's tongue turns white, breath feverish, stomach sour, mothers can always depend upon safe old "Cascarets" to gently, yet thoroughly clean the little liver and bowels. Cascarets are just dandy for children. They taste like candy and no child need be coaxed to take them even when cross, bilious and sick. Each 10 cent box contains directions and dose for children aged one year old and upwards.

You Need ALL These Safeguards

- 1—Pasteurized
- 2—Bottled
- 3—In Sterilized Bottles.
- 4—From a Modern, Sanitary Dairy.
- 5—From a Dairy Open to Inspection.

Don't take chances with your milk supply. Milk is too important, too vital a part of your daily fare for you to trifle with it. Begin to-day to get milk you are sure about—milk that is protected by every safeguard known to modern, scientific dairying.

Five years ago we began to pasteurize Hygienic Dairy milk. We have pasteurized all our milk since then. We did it because we believed it was necessary—it is a safeguard enforced by law in the big cities. But no law compelled us—this added safety, this costly equipment grew out of our ideal to provide better milk for Brantford.

Note the other safeguards we offer. This milk comes to you in the modern, sanitary way—in bottles. It is bottled by machinery—human hands do not touch it. It comes to you in bottles that are not merely washed, but sterilized each time before use.

Most important to all it comes to you from a big modern dairy—a dairy that contains the finest, up-to-date equipment—a dairy that maintains high standards of cleanliness—a dairy that is always open to your inspection.

You don't pay any more for milk from the Hygienic Dairy. But you get milk of richer quality. And you get peace of mind. For you are sure it is pure milk, safe milk, wholesome milk. Isn't it worth the trouble—to get this better value.

Besides, isn't it more satisfying to deal with a big responsible institution, with a big reputation to maintain?

Begin to-day. Phone and our driver will call. Or tell your neighbor that you want him to start calling.

Dyspepsia is an advanced stage of indigestion, arising from the stomach refusing to perform its normal functions. Digestion consists in the changing of foods from an insoluble form, so that they may pass through the walls of the alimentary canal and become part of the blood. The stomach keeps the food in almost constant motion for a considerable time to accomplish this purpose, and should this organ not be kept in good condition, indigestion results, to be followed in due course, if not relieved, by dyspepsia. You can keep the stomach performing its functions, and even relieve and cure dyspepsia if you get a Box at 50c from
