who have once had Zam-Buk applied never forget how it soothes and heals their hurts. Wise mothers never use anything else. A touch of herbal Zam-Buk—a balmage made of almost any clean rag—so much tears or worry. Zam-Buk is so pure and so refined that it provides the ideal healer for every sort of wound, abrasion or soreness.

Ask For

Mrs. J. E. Biererth, of Carnduff, Sask., writes:—"My little boy cut the end of his finger and it seemed a case for a doctor. However, I applied Zam-Buk to stop the pain and bleeding and it gave the child such relief that I continued the treatment. Using nothing but Zam-Buk, I dressed the finger each day, and the wound healed perfectly."

The Value of Some Little Used Grasses

On several occasions, particularly through the medium of "Seasonable Hints" issued by the Experimental Farms Branch of the Dominion Department of Agriculture, attention has been called to the usefulness of several grasses which at present are little appreciated in Canada. The grasses to which in the past particular attention has been called as valuable adjuncts to hay and pasture mixtures are Orchard Grass and Meadow Fescue. The former is considered as one of the best for dairy farms in Denmark where, as is well known, dairying has reached a height of perfection unequalled by any other country. The latter grass is also considered extremely valuable in hay and pasture mixtures wherever intensive farming is practised. Our experience is that in Canada, these two grasses would, if added to the standard and often stereotyped mixture of "Clover and Timothy", materially help to increase the value of the hay crops and of the pastures.

But besides these grasses there are several others, the introduction of which into Canadian farming would no doubt prove most beneficial provided that they are used under conditions in which they can prove their real value.

We have especially in mind the use of some grasses which, although of little importance for hay, yet are very valuable as pasture grasses, that is to say may be advantageously put in as bottom grasses in hay mixtures and pastured when the hay has been removed. Among these grasses are the Kentucky Blue grass, suitable especially for loamy soil, the Sheep's Fescue and the Red or Creeping Fescue on light land, the Red Top especially under wet conditions, and the Crested Dog's Tail under similar conditions.

In our opinion it would pay to add these grasses in small quantities to grass mixtures seeded down with the taller growing grasses primarily looked upon as hay producers. Indeed, the experience of countries where the farms are small and where consequently the highest possible returns are imperative to make farming a living proposition, strongly points to the advisability of including four or five or even more grasses in hay and pasture mixtures so as to make it the more remunerative.

How To Introduce A Rotation of Crops

First consider the approximate acreage of grain, hay, pasture and hoed crops which will be required;

HAD RHEUMATISM FOR FIVE YEARS

No Return of the Trouble Since Taking "FRUIT-A-TIVES"

MR. JOHN E. GUILDERSON

P. O. Box 123, Farnsboro, N. S.
"I suffered with Rheumatism for five years, having it so badly at times I was unable to get up without assistance. I tried different medicines I saw advertised and was treated by doctors in Amherst, also in my home town, but the Rheumatism came back. In 1916, I saw in an advertisement that 'Fruit-a-tives' would stop Rheumatism, and took one box and got relief; then I took them right along for about six months and the Rheumatism was all gone and I have never felt it since."

Anyone who would care to write me as regards 'Fruit-a-tives' I would be glad to tell them what 'Fruit-a-tives' did for me."

JOHN E. GUILDERSON,
Contractor and Mason.

next consider the quality of soil which is on the farm. Then decide what rotation would be most suitable.

The following rotations have given good results.

A four year rotation: hoed crop; grain; clover hay, timothy hay. This rotation has proved to be very satisfactory although its acreage of grain is rather too limited for most farms.

A five year rotation: hoed crop; grain; clover hay; timothy hay; grain. This rotation gives a very good proportion of the various crops it is very satisfactory.

A three year rotation: hoed crop; grain; clover hay. This rotation has a very large area of hoed crop and provides no pasture land. It is, therefore, unsuited to most farms. However, if the fertility of the soil is very poor, if additional pasture land is available, and if considerable stock are kept which will consume the hoed crops, the rotation is very satisfactory.

There are, of course, many other rotations but the above mentioned, have perhaps, the most general application. It is quite probable that portions of the farm, on account of being either too wet or too light and sandy, may have to be farmed under a separate cropping system. Under such conditions if this area is not too large it is undoubtedly more profitable to leave it undivided by fences and to reckon the entire area as one year in the new rotation. With such a system, a field of poor soil may be increased in fertility by a short rotation of crops and by larger applications of manure. A field of low wet land may be left longer in hay.

One consideration should not be overlooked. The fields should be made larger in order to reduce the cost of producing crops and to decrease the depreciation and repair of fences. The rotation should be planned so that the horses would be kept busy as much as possible throughout the year because it costs practice of changing the crops on money to have horses standing idle. While almost all farmers follow some their fields from year to year, very few have adopted a definite rotation of crops. The adoption of a suitable rotation will reduce the cost of production and will make more profit.

Truro Steel Plant Sold For \$25,000

Truro Steel Plant 78 750\$ 80870 80588
Truro, N. S. March 16—The plant of the Truro Steel Company, Ltd., was sold here yesterday at a sheriff's sale to C. W. Montgomery for the Halliday Company Ltd., of Hamilton, Ont., for \$25,000. The Halliday Company handling "Aladdin houses," will it is understood use Truro as a distributing point.

Foreclosure proceedings on the part of the bondholders of the Truro Steel Co., which was organized during the war for the manufacture of shells, were begun some time ago, the sheriff's sale resulting.

Germans Have Great Resources Says Briand

Paris, March 16—Premier Briand, replying to interpellations in the Chamber of Deputies regarding the London reparations conference today, said if the Allies remain firm and united, the Germans will discover that they, (the Germans) have astonishing resources, Germany had been vanquished, he declared, but, unfortunately, psychologically this was insufficiently apparent to the German people.

M. Briand told the Chamber he went to the London conference bound to maintain the reparation figures arrived at in Paris, but ready to make concessions, regarding the methods of payment.

"I frankly told our Allies there was a wall against which we were backed," he declared.

The military penalties, the Premier said, had to be effective although inexpensive. Regarding security, he asserted.

"I might say the Allied guns are trained on Essen and we control the movement of the greatest part of the Ruhr coal," Premier Briand continued. "Today it is a begging Germany, disputing foot by foot and trying to arouse the neutral countries by bought newspapers. But the day we let ourselves be persuaded and seem to abandon our efforts, then that day one will see another Germany, one all ready to attempt in the economic domain the imperialist conquests she failed to achieve in the military domain."

SUNNY CORNER

Sunny Corner, Mar. 21—Mrs. Alfred Leach is visiting her niece Mrs. Emma Campbell in Chatham.

Miss Lora Sherrard, Nelson, is the guest of her cousins the Misses Leva and Villa Matchett.

Mr. and Mrs. Willbur Dunnett, of Sillikers, spent the 13th with the latter relatives here.

Mr. and Mrs. Fred Mullin and Mrs. Fannie Mullin were in town for a few days last week.

Miss Ethel Holmes, Halcomb is the guest of Mrs. Agnes Murphy.

WRIGLEYS

"AFTER EVERY MEAL"

Mint leaf, peppermint or luscious juicy fruit. either flavor is a treat for your sweet tooth.

And all are equally good for you. Teeth, appetite and digestion all benefit.

Your nerves will say "thank you." your vim will respond.

WRIGLEY'S is liked for what it does as well as for its BIG value at the small cost of 5c.
