Raisa Cheeser, Says McCarthy.

For some reason or other the McCarthy movement makes no perceptible headway. It has been already proved to the satisfaction of those who have watched the movement that a new party cannot be formed on a platform whose planks are personal jealousy, religious animosity and amateur politics. Mr. McCarthy continues to forcibly impress his audience with the fact that he (McCarthy) has had a quarrel with Sir John Thompson, and, true Irishman that he is, he will yet make the Premier regret the indignities he has suffered at his hands. One has to listen to the Third Party leader for but a few minutes in any of his addresses to discern the fact that the sole exciting cause of Mr. McCarthy's hostility to the Government is Mr. McCarthy's dislike of Sir John Thompson. Mr. McCarthy admits he is no chicken in politics. He has had a long experience in political life and it is not within the past few years that he has acquired his political views and his principles of life. What a peculiar coincidence it is that Mr. McCarthy never championed the cause of the farmer until after his estrangement from Sir John Thompson. That estrangement furnishes the key to all Mr. McCarthy's subsequent conduct. He champions the cause of the farmer because he thinks he can use the farmer to strike back at the Premier who neglected to sufficiently respect his (McCarthy's) counsel. If D'Alton McCarthy is at heart the friend of the farmer, it is in the fact that he allowed himself to be come well advanced in years before he began to champion his cause. It is not difficult to understand his Irish impetuosity and his cynical pride leading him on to quarrel with Sir John Thompson, but to think of D'Alton McCarthy as being seriously concerned about the farmer's condition one simply can't rise equal to such a demand on his imagination. Mr. McCarthy is not only an insouciant champion of the farmer, he is also a champion of the cause of a cause that he does not understand. He is a political amateur pure and simple. On Thursday night he told the people of Milton that Canada needed no manufacturers. His advice to Canadians is to leave manufacturing industries severely alone, or at any rate to offer them no encouragement whatever. He believes that Canada is purely an agricultural country and should be developed along that line exclusively. He says to us, "Buy and make cheese and raise cattle. Your market is in England. Never mind manufactures. They are not worth bothering about." Mr. Laurier is an advocate of free trade, but he is guilty of no such simplicity as this. According to the Liberal free trade policy, the cost of manufacture to such an extent that we can not only supply our own market with manufactured products, but we can compete in the markets of the world. Canada is on a par with Mr. McCarthy's schoolboy orator who ridicules the idea of Canada concerning herself about possible war or possible trouble with foreign countries! Make cheese and raise cattle and return to the bucolic simplicity of the Bonaville! According to D'Alton McCarthy, the typical Canadian should be represented as a shepherd with goat-like beard. He wears a cone-shaped hat and carries in his hand a crooked staff. He knoys not the meaning of war and finds effort in his hapless manipulation of the Paudean pipe, otherwise known as the mouth organ. This kind of a party is of godlike dimensions compared with the artificer in brass and iron.

The Civil Service.

We have not always the pleasure of agreeing with our city contemporary of the Civil Service. But when in its comments on a recent robbery of the mails by persons in Government employ, it urges a revision of the Civil Service Act, with the view of making it possible for zealous and efficient clerks to be placed over the heads of drones and incompetents, it has our cordial endorsement. There are men of thirty years of age in the Dominion civil service of this city who will be eighty in the ordinary course of events before they can expect to be promoted to the first class and to be in receipt of the maximum salary attached to that position. In front of them are a lot of useless, cattle-minded stick-in-the-mud, who put in their time and draw their pay, and what is worse, move up a peg as a matter of course when a vacancy above them occurs. Till this sort of thing is altered there can be no hope of a zealous discharge of duty to the public. It may be true that the present course is regarded as the safer one, because the government of the day would be sure to be suspected of favoritism if promotion went solely by merit. But the answer to this is—then take it out of the hands of the government. Let there be a civil service board in each city, composed of the highest officers in it, and let promotions be made by this board on the joint written recommendation of the head and deputy head of the department in which there is a vacancy, calling for promotion of a substitute. Parliament should be asked to sanction an amendment having so sensible a change for its object.

A Tricky Way.

In the course of his remarks at Milton the other night D'Alton McCarthy cited an example of the working of combines. He said the words are full of shining examples of the inguities of the combine. If Mr. McCarthy had selected an actual instance of a supposititious case he would have acted more honestly with his audience and more intelligently on his own account. Suppose a certain amount of cotton can be bought in England for \$10. That price is put down as the basis of the price established by the Canadian combine. But in addition to the \$10 they add the amount of duty and freight less a very small fraction. Putting the duty on this \$10 worth of cotton at \$3.50 and the freight at 40 cents, that allows the combine to charge \$13.75 for an article which costs in England \$10. Mr. McCarthy introduced this merely as a supposed case, but before he got through with it he led the audience to believe that this was a specimen case taken from actual experi-

ence. It is safe to say that 95 per cent. of the audience went away from the hall under the impression that Mr. McCarthy had spoken authoritatively as to a particular transaction in cotton in England and Canada. They were led to believe a cotton article costing \$10 in England cost exactly \$13.75 in Canada. Although he mentioned at the outset that he was merely supposing a case to illustrate the working of combines, he saw the argument was working well and he ended up by alluding to the supposition as an actual case. Mr. McCarthy must have understood the effect of his ambiguous language. It is not hard to convince an audience if you can imagine your facts to suit the case in hand. Now it is not a fact that there is this disparity in the price of cotton in the two countries, and Mr. McCarthy knows it, too. Those who are attacking the tariff allege that it is full of injustice and robbery. With so much injustice running through the tariff it ought not to be difficult to get scores of specific instances. To give such instances is the only fair and honest way to attack the tariff. But that is not the way the agitators conduct the campaign. They rely on their imagination and fill up the indictment to suit themselves.

There is nothing more remarkable than the unwillingness of the public to assure the absolute safety of money letters by registering them, and yet in most cases they prefer taking chances. There are a dozen offices scattered throughout Toronto where letters can be registered, but the trouble seems to be that the extra payment of five cents that is in the way of this obvious precaution being taken. Public servants should be honest; but at the same time the public should not expose their servants to unnecessary temptation. A master or mistress who leaves money lying about on dressing tables and mantel-pieces is not thought to be doing the square thing by the servants of the house. The contributory guilt of one who posts money in unregistered letters suggests the verdict of "served him right" when it is stolen.

Manufacturers' Life Insurance Company.

The seventh annual report of the Manufacturers' Life Insurance Company, which appears upon another page, shows this precious and progressive home company to be in a solid financial condition. Every department of the company's business shows a satisfactory increase, and the popularity of the investment class of policies issued by the company is shown by the fact that the premiums have averaged up an increase of 10 per cent. in five years. The position of the Manufacturers' Life as regards assets and surplus to policy-holders is on a par with this of the best companies doing business in Canada. The management are to be congratulated upon the splendid results for 1923.

Union Loan & Savings Company.

The stockholders of the Union Loan & Savings Co. held their 20th annual meeting on Wednesday last. The report was an excellent one, the total assets of the company amounting to \$2,700,707.52, of which sum \$2,568,270.01 is invested in mortgages in the Province of Ontario, and has been succeeded by Dr. Gellie, while Mr. McGee's son takes a position on the directors. Mr. John Stark of John Stark & Co. becomes vice-president, an excellent appointment.

FULL OF ENCOURAGEMENT FOR ALL WOMEN IN BED FIVE MONTHS

Had Given Up All Hope of Getting Well—A Remedy Found at Last to Which "I Owe My Life."

Science has fully established the fact that all the nervous energy of one body is generated by nerve centres located near the base of the brain. When the supply of nerve force has been diminished either by excessive physical or mental labor, or owing to a derangement of the nerve centres, we are first conscious of a languor or tired and worn-out feeling, then of a mild form of nervousness, headaches or stomach trouble, which is per-haps succeeded by nervous prostration, chronic indigestion and dyspepsia, and a general sinking of the whole system. In this day of hurry, fret and worry, there are very few who enjoy perfect health; nearly everyone has some trouble, an ache or pain, a weakness, a nerve trouble, something wrong with the stomach and bowels, poor blood, heart disease or sick headache, all of which are brought on by a lack of nervous energy to enable the organs of the body to perform their respective work.

South American Nervine Tonic, the marvelous nerve food and health giver, is a satisfying success, a wonderful boon to tired, sick and overworked men and women, who have suffered years of discouragement and who are in a manner of remediless without benefit. It is a modern, scientific remedy, and its wake follows abounding health. It is unlike all other remedies in that it is adapted to act on the different organs affected, but by its direct action on the nerves centres, which are nature's little batteries, it causes an increased supply of nervous energy to be generated, which in its turn thoroughly cures, as it were, the machine.

of the body, thereby enabling it to perform perfectly its different functions and without the slightest friction. If you have been reading of the remarkable cures wrought by South American Nervine Tonic, accounts of which we publish from week to week, and are still skeptical, we ask you to investigate them by correspondence and become convinced that they are true to the letter. Such a course may save you months, perhaps years, of suffering and anxiety.

The words that follow are strong, but they emanate from the heart, and speak the sentiments of thousands of women in the United States and Canada, who know, through experience, of the healing virtues of the South American Nervine Tonic.

Harriet E. Hall of Waynesboro, Ind., a prominent and much-respected lady, writes as follows: "I owe my life to the great South American Nervine Tonic. I had been in bed for five months with a nervous tumor in my right side, and suffered with indigestion and nervous prostration; had given up all hopes of getting well. Had tried three doctors and had no relief. The first bottle of Nervine Tonic improved me so much that I was able to walk about, and a few bottles cured me entirely. I believe it is the best medicine in the world. I cannot recommend it too highly."

Three women, can you do better than become acquainted with this truly great remedy?

FINANCE AND TRADE.

Margins on wheat were called freely yesterday. The Chicago market was in a somewhat panic condition, and the May option sold down to 80 1/2, a decline of 3/4 for the day, and the lowest price on record. The tickers appeared extremely anxious. The reports are that outsiders unloaded freely, and many deals were closed on speculators, who were watched closely by speculators, who were apparently extremely anxious. The reports are that outsiders unloaded freely, and many deals were closed on speculators, who were apparently extremely anxious.

However, a good deal of wheat was bought by Toronto operators, and the chances are that it will show more profit before long. Reports from the west are that Partridge has covered most of his short line, and this left the market without support. The exports of the day were large, and a rally in prices at least was confidently expected. What is getting to be about the cheapest thing on earth, and yet there are people starving to death.

The bondholders of the Duluth and Manitoba Railway, running from Winnipeg Junction, on the Northern Pacific, to Winnipeg, met a few days ago. This road is in the hands of a receiver. A resolution was passed appointing a committee of six to represent the interests of the bondholders in the receivership proceedings. The following committee was appointed to look after the interests of the bondholders: Messrs. Charles S. Fairchild, chairman; John Livingstone, Hugh L. Cole, E. S. Dick, Charlesmagne Tower and James L. Hanks.

The sugar clause of the Wilson tariff bill meets with bitter opposition from the friends of the Southern sugar interests. Delegates from the Louisiana sugar, rice, stock and other exchanges and business associations, at a meeting in New Orleans, adopted resolutions calling upon the Senate to reverse the action of the House on sugar. The resolution states that 500,000 people will be thrown out of employment and \$100,000,000 capital impaired or wiped out if free sugar stands.

A London despatch yesterday said: "The English bondholders of the Erie, who have hitherto opposed the present plan of re-organization, have withdrawn opposition and have notified the reorganization committee that they are in perfect accord with the scheme as formulated by them."

There is some enquiry from Canadian speculators for Postal Telegraph stock. The lowest price sellers seem willing to take is 65.

AFTER FIFTY YEARS.

Two Sisters Meet After Being Separated Half a Century.

In September last an advertisement appeared in The Toronto Globe asking the whereabouts of Catharine and Bridget Clark, formerly in the neighborhood of Calabona, but who had removed from there to the neighborhood of Galt's about 1845. The sister, Mrs. May McCormack, was the person writing for the information. In December some friends of Mr. Samuel Sipe of the S.B. concession of Beverly told him of the advertisement and asked him if his wife's name was not Bridget Clark. Mr. Sipe answered that the affirmative, and after further inquiry concluded to go to Iroquois, the home of Mrs. McCormack and personally see her. After spending a few days with his newly-found relatives, he induced Mrs. McCormack to come back with him. The meeting of the two sisters, who had been separated for 50 years, can more easily be imagined than described. The other sister, Catharine, had been dead for a number of years. Mrs. McCormack left for home on Monday after a pleasant visit to a host of friends and acquaintances. She had been a short time ago unaware.

This is a Short Tip.

When a man wants his horse shod he does not go to a blacksmith shop; but he does not always go into the right shop. No one can make any mistake by getting his horse shod at W. H. Hunter's, Little York. He has the best horse shod in Canada. His prices are below the ordinary rates.

It Made Her Well.

Paine's Celery Compound Saves From Death.

Mrs. Pelletier of Quebec Suffered Continuously for Fifteen Years—Was Paralyzed on Right Side for Six Years—Endured Terrible Agonies Night and Day—Three Bottles of Nature's Healer Gave Grand Results—Paine's Celery Compound Restores the Sick.

MRS. L. PELLETIER.

"I take great pleasure in letting you know all the good that I have derived from your Paine's Celery Compound. For fifteen years I have been a dyspeptic, and have tried a great many medicines without deriving any good results. I was also paralyzed on my right side for six years, and was unable to write or do any work. Last winter I was confined to my room with pains in my stomach, back and head; also with inflammatory rheumatism. A friend brought me a newspaper and directed my attention to the almost miraculous benefits that resulted from the use of your Paine's Celery Compound. I then decided to try three bottles, and have from the use of the remedy experienced grand results. The pains have disappeared and I feel a great deal stronger. I fully believe that I have at last found the precious remedy. I owe you unbounded gratitude, and will proclaim it to all the world so that our poor, suffering humanity may derive all the benefits that your medicine can give. It certainly has no equal in merit as a reliever of pain. This is the testimony of Mrs. L. Pelletier, 56 Bridge-street, Quebec; her portrait appears above. A most decisive victory over disease of long standing has never been put on record by any other medicine. Mrs. Pelletier's experiences of failure and uncertainty to all suffers a weighty and important lesson of warning and encouragement—warning against wasting time and hazarding life with medicines that prove failures, and encouragement to use nature's true restorer, Paine's Celery Compound. Mrs. Pelletier's plain and honest testimony should influence and guide thousands of sickly, weary and diseased men and women in Canada.
