SCHOOL CHILDREN

AND THEIR HEALTH.

Hurrah! school has opened agaic! And what of the health of the boys and girls? "Keep a child robust and sound in body until he is eighteen" says medical experts, "and the chances are he will remain so throughout life." How important then that its health should be maintained. A word to Parents. Are your children free from frequent colds, enlarged tonsils, adenoids, decaying teeth? These are serious hindrances to their health. Are they free from eyestrain? Do they hear well? Are they sound in body and limb? If not, then in school they lose a golden opportunity.

"Canada a Land of Opportunities!" we say, and yet in this land are we breeding a race that shows appalling an average of one physical defect for HUGE DIRIGIBLES ON TRANS. each school child in the United States. Fully twenty-five per cent of the it is with Canada? Are your children Z-R-3 type will soon be operated on under-weight? Being underweight trans-oceanic commercial lines, Dr. does not necessarily mean being undernourished. Our schools aim at pelin company and commander of the wholesome citizenship, and whether Z-R-3, predicted. your boy goes into professional life or industrial life, sound health is es- prophecy: sential to his success. What then can we do to make our boys and girls fit gers. for the work of life?

research and confirmed by experience. When the war broke out, over twenty-five per cent of our boys were Z-R-3's trip. physically unfit. We must not repeat that neglect to the rising generation. Systematic medical supervision must be given our children during the years they are at school, Careful medical examination should be given cult to operate, Eckener said. every child entering the school, And the mother should be present to hear NEW COMPANY IS by the beautiful scenery through the what the doctor has to say, and in turn to ask questions for the benefit of the child.
