

In the local market, the situation continues very strong. Supplies are practically exhausted. Canadian furnaces are well sold ahead, and as a consequence are not anxious to do new business. Consumers requiring material do not seem to hesitate to pay the prices demanded, it being apparently their opinion that delay will only make the situation worse for them. Furnace people do not hesitate to declare that the next six months will see prices \$1.50 to \$2 per ton higher than they now are, for delivery in 1910. Offers to purchase at a fraction below the market are receiving little consideration from holders.

There has been a general advance in local pig iron prices, as will be seen from the following list. Notwithstanding the strength of the pig-iron situation, however, merchants handling finished and semi-finished iron and steel products fail to find the strength uniform throughout their markets. Steel plates, for instance, are almost easy in tone and it is quite possible that the prices quoted for some time past would even be shaded. In bar iron and steel, however, the situation is otherwise, and the mills report that advances are not far away. Following is the list of prices:
