

# LAST POUND SKIMMED as well as First Pound

THE "STANDARD."

We will guarantee that you can take a "Standard" cream separator and skim to the full amount of its capacity, even if the milk is not at its natural heat, and that the last pound will be skimmed equally as well as the first pound. After the skimming is done, open up the

## Standard

bowl and you'll find the inside edges of the discs are not clogged with cream, nor the outside edges stuffed with foreign matter. That is because there is ample space between the discs and the bowl to provide room for more impurities than will accumulate in one hour's skimming. This is one of the greatest improvements in cream separators in recent years. It was suggested by Professor J. H. Gridale, Director of Dominion Experimental Farms, Ottawa, and carried to completion by Standard experts. It means **clea cream, all the cream, no waste.** Our booklet explains this feature and many others more fully. Drop a post card today for a copy.

**The Renfrew Machinery Co., Limited**

Head Office and Factory:

RENFREW,

ONTARIO.

13 Sales Branches: Winnipeg, Man., and Sussex, N. B.

The Spramotor Co. is the only Canadian firm in their line who have an American branch, manufacturing in the United States, where they have been established for twelve years.

There are some Canadians who prefer American machines and buy them, while the Spramotor is being bought by the best people in the United States.

No American Government (State or Federal) go to foreign countries to get spraying machines, believing it good business to patronize their own manufacturers.

Why do the Canadian Governments do this. They are buying and demonstrating in Ontario with American spraying machines.

Making, as we do, the largest range of spraying machines made anywhere in the world, and shipping them into every country in the world, we are looking under the postage stamp for a reason.

We will tell you about it later. Agents wanted.
