

THE LISZT

SHOWING ACTION

Showing the action with hammers and keys in position. They are of the very best Canadian make, possessing all the latest modern improvements.

The action embodies the full brass flange.

The hammers are of the best German felt.

The keys are made of the best ivory and the sharps are of ebony.

The pedal action used in this piano is a patent, non-squeakable, spring action, which obviates that disagreeable noise so often found in pianos.
