CANADÀ

ply from: (Name of country or hon-governmental organization)

Average biennial growth rate approved by the General Conference: 5.09-6.00%

Question 2			COMMENTS				
				Relevance to Objective 10.1 of the activities covered by the			
groups of paragraphs in 19 C/5 Approved listed in column 2, against each theme Mark X in appropriate column							
			(e.g. reasons for your answers to questions 1 and 2, suggestions regarding activities to be undertaken in 1979-1980 for particular themes, etc.)				
				Highly	Fairly	Only	
				relevant	relevant	slightly	
						relevant	
(7)	(8)	(9)	All of the themes deserve major emphasis, but we find their reflection				
)			in the programme to be uneven.				
	1		In the programme to be direction.				
))	The main problem is the mix of activities outlined under each theme.				
	1		Ol is an example. It includes management of the G.I.P. itself; cooperation				
	x						
	A		with NGO's; studies directed towards the formulation of national information				
)	plans; programs for coordination of regional and international organization				
			activities; and research on information policy questions. The degree to whic				
			some of these activities meet the objective will only be determined by				
	_		the efficiency of the Unesco machinery itself; others are wholly dependent				
	X		on what other organizations do with Unesco subventions; but the amount of				
			the subventions to FID, IFLA and ICA suggests that not much will be achieved				
r - 1		1					
,			beyond the maintenance of the secretariats themselves. It is also difficult				
,			to judge what will be the outcome, and therefore the impact, of meetings				
1	X	1. 1	of experts. If there is one item under 01 to which we would assign priority				
Ţ		1 1					
			it is information coordination within the United Nations System (5.11.5).				
	Į		The promotion of cooperation among international systems will facilitate				
		· .	the development of national infrastructures to the extent that common				
1.1	x		techniques and methodologies can be applied.				
	A		cechniques and methodologies can be applied.				
			This relates to what we would pick out as the most important item				
	Į. •		in theme 02 - subproject 5.12.2 - Bibliographic Control - collaboration				
'.	Ì		그는 것은				
1	1	· ·	with IFLA to promote the adoption of Universal Bibliographic Control.				
			But we would go further than the programme does and suggest that Unesco				
	1.	}	aim at the reconciliation between the UBC standards proposed by IFLA				
	X,		for implementation in libraries, and the UNISIST recommendations for biblio-				
Ę			graphic standards for use in information systems including the international				
. A	<u>}</u> .		systems referred to in 5.11.5. In developing countries there is not				
			likely to be a sharp line between the library community and the information				
	1 !		centre and system community. One common set of technical standards for				
			bibliographic description would immeasurably ease the problem of information				
			exchange, and would reduce the amount of effort that goes into preparing				
	Į. –		bibliographic descriptions. We believe, therefore, that Unesco should aim				
			at reconciling UBC and UNISIST standards in order to present to the Interna-				
			tional Standards Organization detailed technical, bibliographic standards				
			for world-wide adoption by all facilities (libraries, information centres				
			etc.) developing ongoing machine-readable bibliographic files.
