INDEX TO ATTRACTIONS.

The numbers refer to the articles.

FILAMENT. See LINES OF FORCE. Definition, 126.

FLUX. The product Fdo, 107.

FOCALOID. Defined, 194. Potentials, 228.

FUNDY. Attraction of the tide in the Bay of Fundy, 38.

GALLOP. Electricity on a circular disc and spherical bowi, 431, note.

Gauss. Mean potential over a sphere, 84. The theorem $\int Fd\sigma = \pm 4\pi M$, 106. Also deduced from Green's theorem, 153. Terrestrial magnetism, 336, &c.

GREEN. Attraction of a stratum, 142, 147. A volume integral replaced by a surface integral, 149, and a surface integral by a line integral, Note A, page 356. Equivalent layer, 154. Infinite and multiple-valued functions, 159, 161. Kelvin's extensions, 163. Green's mathematical papers, 248, note. Green's method of solving electrical problems, 156, 392. Green's theorem on a condenser, 417. Origin of the name "potential," 39, note.

HANSTEEN. Terrestrial magnetism explained by two magnets, 335.

HAUGHTON. Problem on a fluid earth with a spheroidal crust, 313.

HOBSON. Two memoirs on attractions, 248, note.

HOMOEOID, Defined, 194. See ELLIPSOIDAL SHELL.

HOMOTHETIC SUELL. Defined by Chasles, 194.

IMAGE. Defined, 396.

- INDUCTION. Magnetic force and magnetic induction defined, 342. How related, 345, see Note L, page 363. Other names, Note K, page 363. Coefficients of induction, 438. Magnetic induction in a solid, 465. Boundary condition, 468, 493. Induction problems, 486. Surface integral of magnetic induction, 488, Note M, page 364.
- INVERSE PROBLEMS. Find the curved rod such that the attraction of the arc PQ at O (1) bisects the angle POQ, 20, (2) passes through a fixed point, 20, (3) passes through the intersection of the tangents at P, Q, 20. Given the potential, find the body, 164.
- INVERSION. Kelvin's point inversion, 168. Geometrical properties, 172, &c. Inversion from a line, i.e. in two dimensions, 181, &c. The cylindrical transformation $r' = Ar^n$, $\theta' = n\theta$, 184, &c.

IVORY. Geometrical property of confocal ellipsoids, 202. Theorem on attractions, 222. Application to infinite cylinders, 235. Finite cylinders, 236.

JELLET. Potentials for different laws of force, 96.

KELVIN, LORD. Theorems on attraction, 111, note, 121. Attraction of a film, 142, note. Centrobaric bodies, 135, note. Extension of Green's theorems, 163. Method of Inversion, 168. Magnetism, 314, note. Magnetic force and magnetic induction, 342 and Note K, page 363. Solenoids, 347. Lamellar shells, 350. Electricity on a sphere, 403, note. Electricity on a circular disc and spherical bowl, 451, note. On two spheres by successive images, 460, note. Induced magnetism, 465, note. Theorem on dielectrics, 483.

LACHLAN. Theorem on inversion, 179.

LAMB. Potential of an elliptic cylinder, note to 238.

LAMÉ. Poisson's equation in orthogonal and elliptic coordinates, 109, 110.

 LAMELLAR SHELLS. Defined, 350. Theory, 350-354. Elementary rule to find the magnetic force at a given point, 356. Cartesian components of force, 358, see VECTOR POTENTIAL. Potential of a lamellar body, 359. Mutual potential energy of two thin shells expressed by integrations round the rims, 360. Force due to a thin circular lamellar shell, 362. Mutual potential

< 1

R. S. 11.

 $\mathbf{24}$

ar disc at a point and, 23. Elliptic the inverse cube, nes, 30. Confocal ptic discs, special pudition that the disc, 382. See

olution, 154, &o.;

t, &c. and Note C, of force, **218**, and b. Heterogeneous, Note E, page 360. d second approxinduced magnetism

itity on a pertion ent, 381. Elliptio allel chords, 385.

 The converse e surface, 71, 209.
Potential of a grals I and J, 200.
ints, 203. Level ternal point, 208, w, 247.

n ellipsoid, 230;

arating cone, 120. 8, 120. Repelting

tentials are equal and have the same bal axes coincide, d homoeoids, 228. merical values of 173.

is ellipsoids and Electricity on its ±1. Note G,
