GERMAN RCES REPULSED ON LAND AND SEA

Earl Kitchener Has Been Appointed Secretary of State for War

The Great Dislocation and **Canadian Finance**

The outstanding feature of the great dislocation now on in Europe is the determination of the free-governing nations of that continent, backed by imperial Russia, to put down the "Caesarism" of the German emperor. It is a fight for free government in the twentieth century against the feudal system of the fourteenth century; the fight of democracy as against espotism. Never was there such a mighty struggle on these lines before. The right of the people against despots has been fought time after time in individual countries, but in this case the fight has spread all over Europe and its effects are and will be felt in Asia, in America and in the furthermost parts of the world.

And England leads the fight against the German despot and against his great military machine; England is at the head of the confederacy of nations that have taken up the challenge that has been hurled at them by the military madman of the world, now in Berlin.

Another fight has been going on in a much smaller area, but of world-wide significance; and that is the determination of the United States securing the first army division in a officers, non commissioned officers that no government on the American continent be recognized that is based very short time. The commanding and men will be selected in the folon assassination as instanced in the case of Mexico. There were a good recruiting officers. The enlisting many jeers hurled at President Wilson when he laid down this principle, will start tomorrow and will be enbut after some months of patient waiting Huerta is a fugitive, the Pana- tirely voluntary. ma Canal is about to be opened and a new set of conditions will prevail have the same status as British regulars. The instructions that have experience but are not now mempay the expenses of eight nurses. sination. There is no doubt now that President Wilson has been supported in this position by the government of Great Britain.

To our mind the United States is as much interested in the vinding of free government in Europe as it is interested in the vinding. cation of free government in Europe as it is interested in the vindication of free government in America as against despotic rule. And somehow we think that Great Britain and the United States are closer together in promoting the welfare of the world than ever they were heretofore.

And now we come to the question of banking and finance, and what is likely to happen in view of the surprising condition of things financial in Europe. It looks to us as if New York is to become almost immediately a greater money centre than it has hitherto been, and more a money centre for the American continent, and, as long as the war continues, certainly more of a money centre for Canada.

The United States is at this very moment reconstructing its whole The United States is at this very moment reconstructing its whole barking system, based on two principles: (1) Of doing away with the over-concentration of money in the one city of New York, and in place of the British Cabinet occasioned by the It having a distribution of reserves in twelve leading cities of the Union, resignations of Lord Morley and John at which point national reserve banks are about to be established. These with their colleagues concerning the national reserve banks will have the power of discounting commercial government's policy were filled today. at which point national reserve banks are about to be established. These paner held by any and all of the local banks in their respective reserve paper held by any and all of the local banks in their respective reserve districts; and for the first time the United States will have in operation a banking principle long recognized in Europe, viz., that of rediscounting banking principle long recognized in Europe, viz., that of rediscounting banks by means of a national organization. And also with this council, and that of the Right announced in the house of commons that Earl Beauchamp, first commissioner of works, has been appointed to the place of Lord Morley as lord president of the council, and that of the Right announced in the house of commons that Earl Beauchamp, first commissioner of works, has been appointed to the place of Lord Morley as lord president of the Right announced in the day conductive to the general belief that the Kaiston Morley as lord more and also with this council, and that of the Right announced in the day conductive to the general belief that the Kaiston Morley as lord more provided to the place of Lord Morley as lord more provided to the place of Lord Morley as lord more provided to the place of Lord Morley as lord more provided to the place of Lord Morley as lord more provided to the place of Lord Morley as lord more provided to the place of Lord Morley as lord more provided to the place of Lord Morley as lord more provided to the place of Lord Morley as lord more provided to the place of Lord Morley as lord more provided to the place of Lord Morley as lord more provided to the place of Lord Morley as lord more provided to the place of Lord Morley as lord more provided to the general belief that the Kaiston and the place of Lord Morley as lord more provided to the place of Lord Morley as lord more provided to the place of Lord Morley as lord more provided to the place of Lord Morley as lord more provided to the place of Lord Morley as lord more provided to the place of Lord Morley as lord more provided to the place of Lord Morley as lord more provided to the place of Lord Morley as lord more provided to the place of Lord Morley great reform another principle is coming into effect and that is the withdrawal of all bank notes in the United States, even those that were prac-drawal of all bank notes in the United States, even those that were prac-succeed he Right Hon. John Burns as in Belgium, in Holland, in the North Sea and in the Mediterranean tell of tically national notes inasmuch as they were guaranteed by United States president of the local government board, premier Asquith also anbonds and printed by the national treasury.

By reason of the outbreak of hostilities in Europe and by reason of the dislocation that has taken place in our own banking arrangements sanction.

Russian Fleet Bottled Up. two great principles, that of rediscounting for our banks with national notes and increasing the issue of national notes in sums sufficient to meet any emergency. Gold payments in this country have been suspended, and payment in national notes is about to take their place; and we believe that the ultimate result will be that as soon as parliament can be convened. we will have embodied in our banking law a permanent system of rediscounting commercial paper thru one or more banks acting for the nation. and we will practically substitute national notes for bank notes. At the present time we allow the banks to issue notes as against their own capital: but we believe this plan will be changed and in its place the nation GERMANS HURLED BACK will lend its notes to the banks, at least to an extent equal to their capital. at a moderate rate of interest; and that we will have, much earlier than anybody expected, Canada with a system of national rediscounting and na-Fierce Fighting Around Liege tional notes as the currency and method of the country in general use.

To our minds, the banks in this country ought to accept these two Canadian Press Despatch. principles and accept them gladly. They will simply have to readjust themselves to it as the banks have done in all other countries.

Having got to this principle of national notes and rediscounting as contained in the order-in-council passed two days ago on the advice of our minister of finance, it remains to be seen what the attitude of the banks of the United States, and especially of the Government of the United States, will be toward the national notes of Canada now about to be issued in larger quantities, backed by the entire credit of the nation and by large gold reserves at Ottawa.

We believe that these national notes of Canada will hereafter be the common currency of Canada, and we also believe that they will soon have the standing of the national notes of the United States and have practically a par currency in the banks and banking centres of the United States. We imagine that our government and our bankers are working at that problem at this moment. At all events that is what appears to be the thing desirable in this crisis, namely that Canada have the closest and best possible relations with the United States in money matters based on the recognition of our national notes in the same class as those of the United and the women of any other race

Great events bring great changes: when rediscounting and national A BARGAIN IN LADIES' PANAMAS. lotes as outlined above, were introduced in the discussion in parliament ess than two years ago, the proposition got a cold reception. Since that time Mr. Wilkie of the Imperial Bank has declared for the rediscount principle, and on the co-operation of all the banks, as decided on Monday last. It is now in effect in Canada. We believe that we have suddenly and most advantageously improved our financial position both in our own country abroad; tho it may take a little time to make the readjustment. One thing that will need to be done is to issue our national notes in other convenient denominations than the ones, twos and fives and multiples of to sell. Come in and see them as to sell. Come in and see them as to sell. Come in and see them as to sell. In conflicts Germany has suffered even greater reverses. Word comes from the British Isles that

GERMAN TROOPS FLED IN DISMAY

Belgian Victory at Liege Was Most Complete, and German Loss Was Very Heavy-Belgian Aeroplanes Were Superior---Germans Butchered Residents of Vise After its Capture-German Staff Officers Cut to Pieces.

Special Direct Copyrighted Cable to The Toronto World.
BRUSSELS, Aug. 5.—The Belgian army won a notable victory in the terrific fighting at Liege today, when the savage onslaught of the German forces was triumphantly repulsed and the kaiser's men forced to retire with heavy losses. Many brilliant military exploits marked the day's engagement. Among the most noteworthy was the Further mobilization orders will successful charge of a single squadron of the second regiment of the e issued later.

Belgian troops against six complete German squadrons. The Germans fled in dismay.

Belgian Aeroplanes Superior.

The marked superiority of the Belgian aeroplanes over those of German construction was demonstrated during the fighting. The Belgian airmen manoeuvred their machines more ably, and their aim was better than that of the Germans.

The conduct of the German troops following the capture of Vise volunteers. He offers his services in is said to have been outrageous, the men butchering the defenceless any way they can be used.

Lady Drummond has also sent a the "Cal the buildings had been ransacked."

The torch was applied after the buildings had been ransacked.

Germans Cut to Pieces.

A group of German staff officers, accompanied by a small detachment of troops, was surprised today at Argenteau by a small force of Belgians and literally cut to pieces.

BRUSSELS, via Paris, Thursday, Aug. 6, 1.38 a.m.—The fortified position of Liege had to support on Wednesday the general shock of the German attack. The Belgian forts resisted the advance fiercely and did not suffer. One Belgian squadron attacked and drove back

six German squadrons.

Eight hundred wounded Germans are being transferred to the Sensational Rise in Foodstuffs City of Liege, where they will be cared for.

Prior to the attack on Liege, General von Emmich, commanding the German army of the Meuse, issued a proclamation calling for an open road thru Belgium for the advance of his forces, and suggesting that prudence would show it to be the duty of the Belgian people to accede to this in order to avoid the horrors of war.

The Germans committed outrages against the civil population of the Town of Vise, eight miles northeast of Liege, burning the city and shooting many of the residents.
