# **Resolutions of Progressive Pub**lic Policy Adopted by Provincial Association - " Salary Grab" at Ottawa Not Forgotten-Farmers and the Tariff.

Resolutions denoting the progress of opinion on great public questions were unanimously adopted at the opening session of the Farmers' Association of Ontario in Victoria Hall yesterday. J. Lockie Wilson presided. With such unanimity did the proceedings move that comparatively few of the resolutions drew discussion, not that there was any lack of interest, but difference of opinion there was none, or very little.

In referring to railway taxation Mr. Armstrong, East Lambton, attributed the defeat of Mr. Pettypiece, ex-M.L. A., to his having hedged on his bill. The sentiment, as expressed by the president, was that the municipalities were robbed of their fair share of revenue, and that the principle should be carried further so their all be carried further so that all cor-porations should pay a fair share of taxation.

The motion favoring a progressive royalty on the output of mineral lands, was spoken on by Capt. W. L. Smith, who complained that under present law a man by expending a mere triffe might secure mineral wealth with millions. A fair share should be for the public benefit. The sentiment was warmly endorsed. For Two-Cent Rate.

Capt. Smith struck an even more popular key with his remarks in ad-vocacy of a two-cent passenger rate on the railways. He asserted that the rates were the same as when traffic only netted one-fifth the sum it now did. So great was the business that it was difficult for a traveler in Southern Ontario to get a seat in 3

where," was commented. The original resolution asked that the rallway commission enforce the two-cent measure, using its discretion,

but it wa sagreed that the governnot the commission, had the controlling power. Against the Grab. wireless telegraph, was astonished to- self."

## THE SENTIMENT OF TO-DAY.

That we ask the railway commission to equalize and regu-late express rates upon an equitable basis without waiting for any formal complaints.

That we endorse the federal ownership of long-distance telephone and telegraph lines, and regard the transmission of mes-sages by these means as logically belonging to the federal postal

That we favor the enforcement by federal legislation of a two-cent-a-mile passenger rate whenever the passenger earnings shall exceed \$3000 a mile.

That we commend the federal government for putting express rates under the control of the rallway commission, and the pro-vincial government for its power act, its municipal telephone act, and its reservation of the Gillies limit in the interests of the general public.

That, recognizing the right of ownership that the people of Ontario have in the mineral wealth of this province, we ask the provincial government to levy a progressive royalty upon all mineral output for the benefit of the general public. That no cabinet minister should be connected with any cor-

porations seeking, or likely to seek, legislative favors.

That we are opposed absolutely to the policy of granting bonuses and bounties, either in money or in public lands, to pri-vate corporations, and that the public domain should be reserved for the actual settlers.

That we affirm our belief in the justice of the main principles of the Pettypiece bill, and regard the recent railway taxation act of the provincial government as both unjust to the average taxpayer and as discriminating unfairly between the railways themselves. We demand that the assessment and taxation of corpor-ate property be similar to those of farm and other private proper-ty. We shall be satisfied with nothing less than equalization of taxation

That we are emphatically opposed to the increase of expenditure for military purposes as being both unnecessary and demoralizing, as diverting our national resources into unprofitable channels, and as tending to lower those ideals which should inspire the ris-ing generation—Resolutions of delegates to the Farmers' Association of Ontario.

# "WIRELESS" SOON TU IRELAND MARCONI ASSURES THE WORLD

An opinion given was that the gov-ernments were afraid of the railways. The electric companies had been com-pelled to give a two-cent rate, why not the other railroads? "There's a nigg... in the fence some-where." was commented. "There's a nigg... in the fence some-

Bylaw Fails to Get Required Majority and Company May Go Ahead Without It.

Ottawa, Sept. 4 .-- (Special.) -The proposed extension of the franchise of the Bell Telephone Company was thrown out by the city council last night. This, however, was more thru a mistake than any desire to sever connection with the company. It is claimed that the company can go ahead without a franchise, and that means that the city will lose the present revenue of \$2500 a year and 20 free phones. It was proposed to give the bylaw granting a five years' extension its final reading. If this had been done the city would get \$5000 a year from the company and have desk phones reduced from \$50 to \$47. However, an amendment was added to the motion to pass the bylaw, and between the two the council managed to get mixed up

with the result that the vote did not show the requisite two-thirds required to an exclusive franchise. The bylaw was accordingly knocked out, but a notice of reconsideration was filed and the matter will again come up at next meeting.
