

MINERAL WEALTH OF THE ALGOMAS

Deposits of Gold, Silver, Copper, Nickel, Iron, Zinc, and Other Metals Occur in the District.

Some Account of What is Being Done to Develop Some of These Resources—Silver and Nickel Mining in the Front.

Algonia Letter No. 4.—Containing certain data concerning the copper, iron, zinc and nickel and other mining operations in Northwestern Ontario, an account of gold mining in that part of the Province being also included.

Port Arthur, July 1.—(Special Correspondence).—Up to date a great deal has appeared in the press about gold mining in Northwestern Ontario, but the public has to a great extent remained ignorant as to the development of other metallic deposits in this part of the province.

Silver Mining Near Port Arthur. Within a few miles of Port Arthur and Fort William there exists an extensive belt of valuable silver deposits. These deposits are located from 30 to 40 miles from the shores of Thunder Bay, and are approached by the Port Arthur, Duluth & Western Railway, which runs through the district.

The West End Silver Mine. The West End is the mine that is being worked on the largest scale. As its name signifies, it lies at one extremity of the silver belt. This property was first developed by Dannaugh, and by him turned over to a syndicate of capitalists from New York.

Extensive Copper Deposits, Too. Copper is another mineral which will help to bring the Algonia to the front. It is so abundant in the district that it is being worked in some places to a considerable extent.

Deposits of Zinc. There seems to be no end to the variety of minerals to be found in Northwestern Ontario. The latest discovery is a section of the country which produces zinc. It is some 15 miles from the shore of Lake Superior, and north shore of Lake Superior, about 100 miles from Port Arthur.
