CANADIAN NORTHERN.

TO PROTECT FISHING INTERESTS OF B. C.

Marine Department Will Supply Two Fast Vessels to Supplement Kestrel.

Ottawa, Jan. 2.—The New England Fish Company, a Boston concern, has been carrying on a large business in Necropolis cemetery.

All morning great crowds of people ber of years. This company was one of the pioneers in this branch of the fishing industry, and was the first to demonstrate that the halibut of the North Pacific could be transported across the continent and placed in the Eastern market of the United States in successful competition with the halibut of the Atlantic. Notwithstanding the of the Atlantic. Notwithstanding the enormous handicap of the express Toronto, Jan. 8.—Rev. Dr. Carman, general superintendent, and Rev. Dr. Sutherland, secretary of missions in the Methodist ender on educational work in the carrying of coals to freight charge, Pacific halibut have dis-placed the Atlantic fish, and this has embark in the carrying of coals to Newcastle experiment of hauling fish four thousand miles by rail to the greatest fish market on the continent.
Competition was made possible because
of the greater abundance of Pacific
halibut, larger catches, shorter voyages
and conveniences to trans-shi ment at

The success of this American company, which has been doing business through a Canadian port, has led to competition, and not a little opposition has been given to the compray, on the ground that it enjoyed sp cial privi-

eges and advantages.
The all-embracing policy of the American government in respect to Can-adian fisheries, and the lop-sided view always held by our neighbors when in- Skeleton Organizations Are ternational questions were at issue, has nad much to do with most of the antagonism expressed to a continuance of the privilege accorded the American company at Vancouver. Our own fishrmen imagine that the Americans are permitted to fish in Canadian waters,

which, of course, is not the case. The privilege they get is confined altogether to certain conveniences extended to them by the customs department. As this privilege has been renewed for a period of two years from the first of the present month, it will be as well to quote the exact language of the order in council authorizing it, which is as follows:

"The minister therefore recommends that for a period of 24 months from the list January, 1908, foreigners or foreign corporations bringing fresh fish in American bottoms to any port in British Columbia shall be permitted to land such fresh fish at such port with course again and the commanding officer of a battalien of the list land such fresh fish at such port with commanding officer of a battalien of the list land such fresh fish at such port with the epidemic ceases.

Washington, D. C., Jan. 8.—The hard the privale day to the industrial world that hard the industrial world that had been renewed for a the industrial world that had the navy nearly all of the men needed to fill the authorized quota, have not being the authorized by the nave needed to fill the authorized by the surface better the corps and the navy nearly all of the men needed to fill the authorized by the nave needed to fill the authorized and the nave nearly all of the men needed to fill the authorized by the surface better to failure to secture recruits, of privates buying their discharges; of non-commissioned of the resulting skeleton organizations that are little more than travesties in American bottoms to any port in British Columbia shall be permitted to land such fresh fish at such port with the epidemic ceases.

REPORTED DECISION OF BRITISH ADMIRALTY

Vessels From Home Fleet for Pacific.

London, Jan. 4.-It is asserted here in well informed naval circles that the Admiralty will shortly request the Dominion government to turn back the ker, president of the street railway men's union, was discharged yesterday.
The company claims that Mr. Theaker
The naval stations of Halifax and

dismissal is due to Mr. Theaker's part at the time when the much discussed "concentration policy" was put in force, The mayor and the president of the trades and labor council have been apwas a wholesale scrap-heaping of obs lete cruisers of first, second and third classes. This affected a considerable economy in maintenance, and it was claimed by the naval school, which supports Sir John Fisher, that the navy as a whole thereby secured more efficiency.

The great "scrap-heaping" of 1904 was followed by the discovery that not enough cruisers were available to supply a sufficient quota to act with the battle fleets, and this led to the breaking up of the cruiser squadrons in Am-

erican waters.

Now the change of complexion of affairs in the Pacific, mainly due to the Japanese troubles in San Francisco and Vancouver, has aroused the Eritish vernment to the need for a squadron in those waters, and a fourth cruiser squadron is to be detached in May from the Mediterranean fleet and will be strengthened by three more cruis-ers of the county class to be drawn rom the home fleet.

The arrival of this squadron in the rthern Pacific necessitates dockyard commodation, and it is said the Adralty is preparing to take advantage of the stipulation made at the time Esmalt was handed over to the Canadian government that the naval por should be returned to its control should Imperial conditions necessitate such
