Vol. 29, No. 37 CHATHAM, NEW BRUNSWICK, JULY 21, 1904

D. G. SMITH, PROPRIETOR. TERMS—\$4.50 a Year, (paid in advance), \$1.00.

A Girl's Wit

Introduction by Robert Anderson, Telegraph Inspector at the Rio Manero District.

"I wonder perfectly clear that Rio Manero is situated some five thousand feet above the sea-level on the coast side of Brazil, and that it is built on a tributary of the Rio Negro. Its chief industry is mining."

"Eight years ago indications pointed to the fact that the richest ore lay under the bed of the river, and that, could the water be diverted, Rio Manero would rapidly develop into a prosperous town. An experienced engineer of the name of Hyde was engaged to locate the land, and he reported favorably upon the idea."

"Mr. Hyde's scheme was to throw a dam across the river some four miles above the town and so divert the water to a canal, which would flow into a rocky valley. Prospecting proved that rich ore existed in the valley, and the proposed dam, which was to be built between the sides of a narrow valley, was carried out."

"The ore beneath the old torrent proved far richer than was anticipated, and the electric machinery and turbines provided for the dam, were a projecting ledge, some three or four hundred feet wide, half-way down the side of the mountain, which, driven by the water, required for its construction, would supply the mines with power."

"Money was raised, and Mr. Hyde was instructed to proceed with the dam, which he carried out in a masterly manner."

"The ore beneath the old torrent proved far richer than was anticipated, and the electric machinery and turbines provided for the dam, were a projecting ledge, some three or four hundred feet wide, half-way down the side of the mountain, which, driven by the water, required for its construction, would supply the mines with power."

"I hurried to the switchboard, but found all in order, and I remained there for some time, waiting for the hearing when I expected Grace to ring up about two hours."

"The erection of the electric machinery and turbines provided for the dam, were a projecting ledge, some three or four hundred feet wide, half-way down the side of the mountain, which, driven by the water, required for its construction, would supply the mines with power."

"I hurried to the switchboard, but found all in order, and I remained there for some time, waiting for the hearing when I expected Grace to ring up about two hours."

FARM FIELD AND GARDEN

As a rule if the pigs can be put into condition for the early fall market the result will be eminently satisfactory.

SILAGE FEED FOR HORSES. Cow silage, says Joseph E. Wing, the well-known writer on live stock topics, is a natural food for milk cows and growing cattle. It is useful in the ration of fattening lambs. It may be fed to horses with profit, but it must be fed with extreme caution.

THE PROFITABLE PORKER. With all his selfishness and inclination to make his appetite his desire, regardless of the welfare of his fellow swine, the hog must be given credit of having sold his side nobly as a money producer during the past decade.

At present the market demands for the lighter and medium weight pigs, rather than the heavy hogs which were so much in demand a few years ago, is a fact of great importance to the farmer.

With Swedish delight he gloated over the fact that he had even as I listened like an animal fascinated by a serpent I noticed that Hyde was not alone.

"I'm glad you like my revenge," said Hyde, and now I think you'd better begin."

"I would take two hours for help to get me out of this den," said Hyde, and now I think you'd better begin."

"I've got it all, Hyde," I said, "but I've got a shooting star. I know it may not prove profitable, but I'll give you a try."

"I'll give you a try," I said, "but I've got a shooting star. I know it may not prove profitable, but I'll give you a try."

"I'll give you a try," I said, "but I've got a shooting star. I know it may not prove profitable, but I'll give you a try."

"I'll give you a try," I said, "but I've got a shooting star. I know it may not prove profitable, but I'll give you a try."

"I'll give you a try," I said, "but I've got a shooting star. I know it may not prove profitable, but I'll give you a try."

"I'll give you a try," I said, "but I've got a shooting star. I know it may not prove profitable, but I'll give you a try."

IS SUCCESS A FAILURE? THE OTHER SIDE OF FAME AND FORTUNE.

Fate Gives With One Hand and Takes Away With the Other.

"Splendid misery!" This is what Madame de Sevigne called literary success in the case of a woman.

Her particular sphere is the home; the home-life of the literary woman can seldom be compared, for its own sake, to that of any other woman.

FATE, THE FROLIC. There is no harm in speaking of it; it is known to everyone, and is referred to in books and periodicals over and over again.

There is no harm in speaking of it; it is known to everyone, and is referred to in books and periodicals over and over again.
