# Copper Strip FEED CUTTER

FOR CUTTING STRAW, HAY AND

These machines cut Easier and Faster than any other of like price, using same power, and cutting as short as this. The large sizes will cut faster than any other Cutter, without regard to price. They are easier sharpened and repaired than any other self-feeding Feed Cutter; will generally cut well from 3 to 5 years without grinding, make a clean, uniform cut, and do not clog.

All parts of the machines are easily and cheaply replaced by the farmer, and the knives and coppers are made so that if they are ever broken or worn out, they can for a few cents each be duplicated and put on at home.

The Copper does not Dull the Enives and is Durable.
