LICE AND MITES

BY J. R. COTE.

The chicken mite is one of the worst enemies of poultry. One eighth of all the chickens hatched are killed by lice, therefore it is very important to know how to destroy them. Chickens that are infested by lice are very unprofitable. The expenses are more and the returns are less. Lice are very destructive and when once they get a good hold, they breed so rapidly that your whole flock will soon be infested by them. Then it will be a hard task to get rid of them.

The easiest way is to destroy them as soon as they are noticed. One can easily tell when fowls are infested by lice, because they look ill, have pale combing, plumage, and are lazy. Roup and many other diseases are brought on by lice, which so weaken the fowl's vitality that the worst they hide in the crevices during the day time and come out at night to rest and both the fowls. Care should be taken when new birds are put in the flocks, because if they have lice the whole flock will soon have them. Lice are very common diseases. Hatching hens often die on the nest or else leave their eggs when they are bothered by these blood-sucking pests. If the hen survives, the new chicks will immediately be infested and killed by the lice.

There are many different kinds of lice, but the red mites are considered to be the most destructive. They feed on the feathers during the day time and come out at night to rest and both the fowls. Care should be taken when new birds are put in the flocks, because if they have lice the whole flock will soon have them. Lice are very common diseases. Hatching hens often die on the nest or else leave their eggs when they are bothered by these blood-sucking pests. If the hen survives, the new chicks will immediately be infested and killed by the lice.

Another good way is to thoroughly spray the poultry house with kerosene emulsion, or some other good liquid lice killer. If kerosene emulsion is used it will kill all the lice and all the eggs as well. However, be careful not to get the fowls. Dip the old brush or broom in hot water and rub it over the cracks. This will kill all the lice outside and will prevent the house from coming again. Keep the doors closed as long as possible, because the longer the fumes stay in all the more lice there will be killed.

When all the lice are destroyed in the poultry house they must then be destroyed on the hens, because the lice in the house will be soon infested again. Catch each hen and take a handful of fine powder and rub it thoroughly through her feathers. Do this twice a week so as to keep the lice from coming back. A good way to make lice powder is to mix a gallon of gasoline with a pint of carbolic acid and then add enough plaster of paris to make a very thick mash and let it dry; you will have a fine pinkish powder strong in carbolic acid, and this will kill the lice in one or two applications.

A good plan to prevent the lice from breeding is to thoroughly whitewash the inside of your poultry house. The roost and dropping boards should be painted with a liquid lice killer every two weeks, so as to kill any stray lice. Chickens should be dusted through thoroughly with lice powder before they are set. This will stop the lice from bothering the duck and also prevent them from attacking the chicks as soon as they are hatched. The little chicks should have their heads greased up with heated lard every two weeks so as to kill all the head lice. After the chicks get bigger lice powder can be used on them.

When all the lice are destroyed in the poultry house they must then be destroyed on the hens, because the lice in the house will be soon infested again. Catch each hen and take a handful of fine powder and rub it thoroughly through her feathers. Do this twice a week so as to keep the lice from coming back. in a good state of repair, and if a bridge
went out or broke down under the late
government we had the superintendent,
John Petty, there next day with men
and lumber to have repairs at once;
no question about the money, the con-
tractor always got his pay as soon as
the work was done.

Under the present law we have in this
parish a structured superintendent who
is, by the way, a brother-in-law to one of
our Queens county members; then we
have one of our representatives in the
government, a highway board, and an
army of minor officials.
If we apply to a road master to fill a
hole, we are told "the road work is all
done; go to the highway board," and we
are told there is no money. And we are
told the roads are better than they ever
were—when everybody knows they are
going to wreck.

Now, Mr. Editor, I would like to ask
through your valuable paper, what has
become of the increased revenue the present
government gets—\$150,000 more of a
subsidy from the dominion government
than their predecessors—and I see by Mr.
White's letter and others, that they claim
they collect \$1,000,000 more stampage, making
at least \$250,000 extra revenue. Does it
take all this to pay a few structural super-
intendents and game wardens? Thanks
you, Mr. Editor, for space. PETERSVILLE.

MONCTON WEDDINGS

Moncton, N. B., Sept. 14—(Special)—
The home of Hugh Buchanan, I. C. R.
trainman, was the scene of a pretty wed-
ding this evening, when his daughter,
Miss Margaret, was married to Lorne
McFarlane, a well known I. C. R. ma-
chinist and baseball player. The cere-
mony was performed by Rev. D. Mac-
Odrum, pastor of St. John's church, in
the presence of thirty or forty friends.
The house was decorated with flowers for
the occasion. The bride, who was un-
dressed, was attended in cream liberty silk,
and carried a bouquet. She was the re-
cipient of many handsome presents. Af-
ter luncheon Mr. and Mrs. McFarlane left
on a wedding trip to Toronto. They will
reside in Moncton.

J. W. Nairn, the well known I. C. R.
express driver, of Truro, was married
here this afternoon to Mrs. W. H. Giv-
er. The ceremony was performed by Rev.
D. MacOdrum, at the residence of Miles
Wilson, the wedding being a quiet affair.
Mr. and Mrs. Nairn left for their home
in Truro this afternoon.

The marriage of Arthur West and Miss
Pearl Kelly took place at the home of
William West, Sunny Brae, today, the
ceremony being performed by Rev. R. M.
Byron. Mr. and Mrs. West left on the
C. P. R. for Montreal and Toronto.

BETTER PRICES FOR YOUR BUTTER

The richness of butter depends on the pedigree of the cow. The quality of butter depends on the churning.

"The FAVORITE" CHURN means a deliciously smooth butter that will bring the "top" price. And the "FAVORITE" will get every particle of butter fat out of the cream. Hand lever and foot tread—8 sizes.

"Parian" Washer washes a tubful of clothes in five minutes. Write us if your dealer does not handle the "FAVORITE" CHURN and "PARIAN" WASHING MACHINE. DAVID MAXWELL & SONS, ST. MART'S, 71.
