

SOUL=SCIENCE SERIES.

The following Volumes by the same author are about ready for the press, each Volume being complete in itself :

VOLUME I. Soul-Science. Here both science and philosophy are discussed in their application to the soul and its religion; the scientific basis of the Bible; Epistemology, or the science of cognition, or of knowledge and knowledge-taking; modern psychology and religion; the science of comparative religion; and the state of the heathen from a religious point of view.

VOLUME III. The Human Psychine, or Soul and Spirit. Here are discussed the soul, or *psyche*, as an "enswaithment" of the spirit, or, the spirit-body; the subjects treated by the London Society for Psychical Research, including spiritism, faith-healing, hypnotism, telepathy, and automatisms. These are discussed both from the view-point of science and the Bible.

VOLUME IV. The Disembodied Soul, or, Between Death and the Resurrection. This subject is treated from the point of view supplied by the Bible and biblical principles, and, as here discussed, contains a considerable amount of new evidence, as well as additions to evidence already presented by other writers.

* * The present volume is the second in the series.
