

THOMAS HALL

INVITES THE ATTENTION OF

FARMERS

To the fact that he is manufacturing a larger number of those

IMPROVED

THRASHING MILLS & SEPARATORS

than was ever offered to the public by him.

With increased facilities for carrying on their manufacture, and an experience of nearly twenty years in the business, he flatters himself, that with combining all late improvements, he will be able to offer the farmer an article worth really more to him than his money.

These Machines have of late been introduced into the Lower Provinces, and on account of superior workmanship and ease on horses, are taking the lead from all others.

Any Machine is the practical combination of all its different parts, and the better that combination, the better the Machine is, for it will run smoother, be easier driven, last longer, and give best satisfaction.

So any farmer desirous of purchasing a good article, will find it in pocket to patronize a man who has spent the greater portion of his lifetime at the business; and as a natural consequence, must have derived more or less of the benefits arising from that practice, which makes perfect.

FANNERS,

an article, easy on crank, and warranted to clean 60 bushels grain per hour.

CARTS, TRUCKWAGONS,

and Agricultural Implements generally,

TO BE HAD AT

SUMMERSIDE STEAM FACTORY,

Water St. East.
