It's easy to thoroughly clean the Frictionless Empire

Beware of separators with complicated skimming devices. It's impossible to get into the corners and crevices of such devices and clean them thoroughly.

You cannot get cream in perfect condition—cream without a taint—from a separator that cannot be thoroughly cleaned.

The few, simple, smooth cones of the Frictionless Empire are as easily cleaned as a glass tumbler—and you can clean them just as thoroughly.

Cream separated by the Frictionless Empire is sweet and clean—first quality. It makes the finest butter you ever tasted.

Your ten-year-old daughter will enjoy turning the Frictionless Empire. So nearly frictionless it almost runs itself. Unless you stop it with our brake it will run for half an hour after you quit skimming. It's the only separator with ball bearings on both top and bottom of bowl-spindle.

Years of service prove their worth. Empire separators in constant use for ten to fifteen years have cost on the average only thirty cents per year for repairs. Samuel

Gilmour of Rocklyn, Ontario, says he bought an Empire, 325 lb. machine, in 1896, and it has not cost him one cent for actual repairs. He has kept on an average 15 cows.

Some day you'll own an Empire. The sooner that day arrives the better for you. And whether you choose the Frictionless Empire (cone method) or the Empire Disc you are buying certain satisfaction. There's Empire Quality in each machine, and a binding guarantee as good as a gold bond.

Get our new 25c. book. It gives unbiased information about the cone and disc methods, which are the only two standard methods of cream separation. Contains many valuable dairy pointers. We will send you one copy free, provided you tell us the number of cows you keep. Also name of this publication. Send for this book immediately. Ask for book No. 82 Extra copies 25c. 3

All Soils Look Alike To Champion Disc Drill

Take the "Champion" into a particularly "dirty" field, where vine roots, corn roots, weeds, tangled grasses or straw manure abound. If you've never before seen it work, you'll marvel at the way its sharp, carefully tempered steel DISCS either cut through or roll over everything that may lie in their way. They will not gather anything before them. You'll marvel at the way the high-grade, cutlery steel SCRAPERS (designed after years of experimenting) keep the discs scrupulously clean. Each hour you'll grow more enthusiastic over the manner in which the FORCE FEED MECHANISM produces its steady, even flow of seed—and never a seed even slightly bruised. The DUST PROOF BALL BEARINGS, on each disc wheel, which require oiling but once a year—they'll interest you, too. And the high wheels, with low down grain box—you'll quickly see this means an EASY Machine to operate. Perhaps you'd like to read about the "Champion" Disc and "Champion" Hoe Drills, so write for special drill catalogue F52

N. B.—If you buy from us you purchase from a company that is familiar with soil conditions in every part of Canada and a company whose policy is to give you the greatest value for your money.

The Tireless Accurate Iron Hand

You can operate the Aspinwall No. 3 Potato Planter without the assistance of another man. The Aspinwall No. 3 not only plants one-third faster than machines requiring two men. The hand that handles the seed on the Aspinwall No. 3 is the iron hand. Unlike the human hand, it never gets tired. It drops 99 per cent. good. You can use different sizes of seed and vary the distance of planting without requiring change of pickers. No other planter can compare with it in accuracy or handle as large a range of seed.

Send for our catalog F1. We are largest manufacturers of potato machinery in the world, and we can give you valuable facts on profitable potato culture.
