CURE YOURSELF!

Use the only safe and reliable remedy for all ailments. It is a pure vegetable preparation, and is guaranteed to cure all ailments, whether they be of the stomach, bowels, or any other part of the system. It is a pure vegetable preparation, and is guaranteed to cure all ailments, whether they be of the stomach, bowels, or any other part of the system.

MONEY TO LEND

To pay off mortgages, To buy property. Very lowest rates. Pay when desired. Will also lend on note and chattel. J. M. WHITE, Barrister, King St. West, Chatham.

NOT UNKNOWN IN CANADA.

Dr. Ludwig Mond, Who is to Produce Gas at Two Pence Per 1,000 Feet.

Dr. Ludwig Mond claims the discovery of a method of producing gas at a cost of two pence per 1,000 feet. The gas is derived from coal gas, made by forcing the latter product through incandescent coal. Naturally, with a cheapened gas the industries connected with electrical lighting and steel production must undergo very wide reforms. Perhaps it is premature to speculate regarding the possibilities of Dr. Mond's invention being made available for public use at an early date. It is, nevertheless, a surprising discovery that chemistry should be equal to the task of affording cheaper fuel and lighting. The consideration that the discovery of aniline dyes, itself a matter of chemical research, revolutionized the whole of the dyeing industries, should show us that in the domain of gas reform, so to speak, science may well achieve great and lasting results.

Dr. Mond is not unknown in Canada. He has taken an interest in the nickel deposits of northern Ontario, and is reported to have discovered a method of refining nickel which may also revolutionize that industry. He was born in Cassel, Germany, in 1839, and received his education at the Polytechnic School of his native town and at the Universities of Marburg and Heidelberg. He has made and patented many inventions of great importance.

Great Workers Sleep Little.

Some of the greatest workers of our day have done with much less than eight hours of sleep. Dr. James Legge, Professor of Chinese in the University of Oxford, who has recently died at the age of 82, was, it is said, in the habit of rising at 3 a. m. and allowing himself only five hours of sleep. Brunel, the famous engineer, for considerable part of his life worked nearly twenty hours a day. Sir George A. Elliott, afterward Lord Heathfield, who was in command throughout the great siege of Gibraltar, which lasted four years, during that time slept more than four hours out of the twenty-four. He lived to the age of 84. "As I get old," said Humboldt, "I want more sleep—four hours at least. When I was young two hours of sleep were quite enough for me." On Professor Max Muller hinting that he found this a hard saying Humboldt said: "It is quite a mistake, though it is very widely spread, that we want seven or eight hours of sleep. When I was young age I simply lay down on the sofa, turned down my lamp and after two hours' sleep I was as fresh as ever." He lived to be 89. These examples are, to use the conscripted phrase of the hagiographers, more for admiration than for imitation, but they serve to show that longevity and a small allowance of sleep are not in all cases incompatible.—British Medical Journal.

Dr. Rainsford's Epithet.

That very eminent pastor and preacher, once Dr. Rainsford, has created a sensation by prefixing an epithet to "rot." Two or three generations back to the prefix was the habitual garnish of every English gentleman's discourse. Lord Melbourne constantly used it. It cost him a great effort of self-restraint to refrain from using it, indeed it was said that he did not invariably succeed in refraining, even in his conversation with the Queen. There was a Royal Duke to whose lips it was so familiar that he used to insert it in repeating what had been said to him by other persons; the Archbishop of Canterbury, for instance, or Queen Adelaide. He was sent to consult the Archbishop of Canterbury about an ecclesiastical bill, and on his return told his friends that the Archbishop had said that he "would be pleased if he would have anything to do with it." It may be gratifying to know that the expression "don't care a damn" (not "damn") may be used without profanity. It came from British India, where the "dam" was a small copper coin, going forty to the rupee. But care should be taken in pronunciation not to sound the "n."—Bystander in Weekly Sun.

Remains of an Ancient People.

The archaeological remains are found in the light and sandy valleys and hillsides. The wind is continually shifting this dry sand from place to place. For this reason no definite age can be assigned to the specimens. It is certain, judging from the complete absence of European objects at many of the localities explored, that the remains found at these places antedate contact with the white man. A large number of them must carry us back several hundred years. The modern Indians make small arrow points and disclaim the large kind found in excavations. The work undoubtedly proves that these ancient people and those now inhabiting this region were practically the same.—Science.

Biggest Tin Mine.

There is a great mining boom now on in Tasmania. Up until 1872 the minerals were not thought to amount to much, but in that year tin mines were opened on Mount Bischoff, in the northwestern part of the island, and have proved to be the largest tin mines in the world. They paid their first dividend in 1878, and since then have been paying regularly, having distributed in dividends more than \$5,000,000. The total exports of minerals now amount to \$5,000,000 annually, and there are about 6,000 men at work in the mines. Not only tin, but also gold, silver, copper, iron and coal are taken out, as well as small amounts of other metals.

Largest City in the World.

The population of the outer ring of suburbs of London is 2,042,750, as against 1,405,489 in 1891, 950,957 in 1881, and 631,881 in 1871. The total population of Greater London, including the outer ring of suburbs, is now 2,678,754.

The Ralston Health Club With Its Army of Ten Million Members Use

MALT BREAKFAST FOOD

Malt Breakfast food, which contains all the elements in just the proportion needed for perfect nutrition and the building up of the body and brain, is the only true health food in the world. The Ralston Health Club, numbering over ten millions of members, have made Malt Breakfast Food their morning dish. Light, refreshing, delicious and nutritious, are qualities that Malt Breakfast Food alone can possess. Ask your grocer for a package.

The man who seeks to evade fate is just as foolish as the man who tempts fate.

When a boy turns his bulging pocket inside out we marvel at the quantity and variety of articles he has stowed away. Odd lengths of string, marbles, a horse-chestnut, a top, brass nails, hickory-nuts, an apple, and many more articles are garnered by this "snapper up of unconquerable trifles." We think the collection must be hard on a boy's pocket. And it is. But do we ever think of the variety and miscellany of the substances we put into the pocket of our stomach? There is the apple and the nuts, and things besides quite as indigestible as brass nails and with no more food value than so many marbles. And yet we wonder that the stomach "gives out." When the stomach breaks down under the strain of careless eating and irregular meals it can be perfectly and permanently restored to health by the use of Dr. Pierce's Golden Medical Discovery. The action of this medicine on the stomach and other organs of digestion and nutrition is so marked, that relief from disease is at once experienced, and the headaches, liver "troubles," kidney disorders, skin eruptions and other symptoms of a diseased stomach are quickly cured. Whether the original copy of the New Testament had been really found or not, Thereupon Emperor William wrote a courteous letter to the Sultan asking for permission to make a further investigation, and he has evidently received a favorable reply, for the latest news is that one of the best Oriental scholars in Germany has been instructed to go to Damascus and to examine not only the ten books, but also all other available books in the mosque.

To maintain a reputation of honesty requires great tact, but not necessarily an honest character.

Dear Sirs.—Within the past year I know of three fatty tumors on the head having been removed by the application of MINARD'S LINIMENT without any surgical operation, and there is no indication of a return.

CAPT. W. A. PITT,
Gondola Ferry.

Only old new things can be said of love.

How Catarrh Poisons the System

Few people realize the vast amount of ill health that arises from the sorption of catarrhal poisons into the system. Languor, sleeplessness, loss of appetite, indigestion and many other discomforts are caused by catarrh. But to know this is only half. Catarrh is a most deadly disease, and affects more than 90 per cent. of the people to-day. It undermines health and if unchecked will surely and quickly lead to the grave. Consumption can be traced back in most instances to a bad cold of catarrh that was neglected. Don't court this white plague, insure yourself at once against it. A large number of water gives instant relief, and in the course of half an hour the cure is complete. A large 25c. bottle of Nerviline in the house will save doctor bills, and a vast amount of suffering every year. Every time an argument gains you a new friend it loses you two old ones.

Love in a girl of sixteen is hero worship.

Corn! Corn! Corn!

Tender corns, painful corns, soft corns, bleeding corns. The kind of corns that other remedies have failed to cure—that's a good many—yield quickly to Putnam's Painless Corn Extract. Putnam's Corn Extract has been a long time at the business, experience in fact just know to do it. All druggists.

More people have arrived to death from the want of love than from the want of food.

—Humors feed on humors—the sooner you get rid of them the better—Hood's Sarsaparilla is the medicine to take.

Those who respect the restrictions of the law are the least restricted.

PUBLIC INSTITUTIONS have found Pain-Killer very useful. There is nothing equal to it in all cases of bowel troubles. Avoid substitutes, there is but one Pain-Killer, Perry Davis'. 25c. and 50c.

THE NEW TESTAMENT.

The Original Said to Be Discovered in Damascus.

Biblical scholars, archaeologists and antiquarians were much startled a few days ago by a rumor that the original copy of the New Testament had been discovered in Damascus. What foundation there is for the rumor is not very clear, the only facts obtainable being the following, which were recently published in a Beyrou paper. A search for ancient manuscripts was made a month or two ago in the principal mosque of Damascus, and among those found were ten beautifully illuminated books of various sizes, some being as large as an old-fashioned family Bible and others as small as a pocket Testament.

Two or three were simply copies of the Koran, but among the others was at least one which was at once seen to be of surpassing value. The learned Orientals who were making the search told the news to the authorities and Nasim Pacha, at once placed a guard of soldiers around the mosque and made them take an oath that they would not allow any human being to enter the chamber containing the newly discovered treasures, and furthermore, that they would not allow as much as a single scrap of paper to be taken away from any part of the building.

The ten books were then placed in a heavy iron chest, which was doubly locked and stamped with the seals of a special guard, whose duty it will be to see that these seals have not been tampered with when the time comes for making a public examination of the books. Naturally these unusual proceedings caused a good deal of talk in Damascus and among those attracted thereby were certain German archaeologists who happened to be traveling to Syria. To one of them, a distinguished Biblical scholar, he thought at once occurred that one of the ten books might be the original copy of the New Testament.

He sent word of the discovery to his friends in Berlin, and the result was that the German Academy discussed the matter thoroughly and expressed the hope that steps would be taken to ascertain without delay whether the original copy of the New Testament had been really found or not. Thereupon Emperor William wrote a courteous letter to the Sultan asking for permission to make a further investigation, and he has evidently received a favorable reply, for the latest news is that one of the best Oriental scholars in Germany has been instructed to go to Damascus and to examine not only the ten books, but also all other available books in the mosque.

How Zulu Women Sew.

The skill of the Zulu of South Africa in sewing fur is a household word in South Africa, and some of the tribes compete with them. The needle employed in the manufacture of the Zulu is of the ordinary needle women. In the first place, it has no eye; in the second, it is like a skewer, pointed at one end and thick at the other.

The thread is not of cotton, but is made of the sinews of various animals, the best being made from the sinews in the neck of a giraffe. It is stiff, inelastic, with a great tendency to "kick" and tangling up with anything near it. Before being used it is steeped in hot water until it is quite soft, and is then beaten between two smooth stones, which causes it to seep rate into filaments, which can thus be obtained of any strength and thickness. Thus, the seamstress has a considerable amount of labor before she commences with the real work in hand.

Finally she squats on the ground, (for no native stands to work, or do anything else, who can possibly help it), and, taking her needle, bores two holes in the edges of the rug or garment on which she is working. The thread is then pushed through the butt of the needle, drawn tight, and two more holes are made with a little result, the seamer proceeding very slowly, but fast enough for a country where time is of no value whatever.

The skin upon which the seamstress is working is dampened with water before she commences, and the damp thread and hide dry out it brings the work very closely together.

Something About Armies.

Until the time of Charles XII. of Sweden the artillery was not considered a part of the army; the men serving in it were not soldiers, but regarded as mechanics; the officers had no army rank. Charles XII. gave artillery officers a rank and regularly organized the artillery into companies. The battle of Pavia demonstrated the superiority of the gun in the hands of the Spaniards. The musket carried a two-ounce ball, and sometimes brought down at one fire two or three mailed knights. The French sent a flag of truce to negotiate against the use of such barbarous weapons.

Alexander, says Pearson's Weekly, had four kinds of cavalry—the cataphracti, or heavy armed horse; the light cavalry, carrying spears and very light armor; the acrobatae, or mounted archers, used for outpost, patrol, and reconnoitering duty; and the dimachoe, or troops expected to act either as cavalry or infantry. Alexander the Great reorganized his father's army. The file or lachos of sixteen men was the unit; two files made a two-dilochi; two dilochies made a tetrachy; two tetrachies made a syntagmas; sixteen of these a small phalanx; four of these a tetra-phalangarchy, otherwise known as a large phalanx.

The Greeks attacked in a phalanx, the spears interlocked and shield overlapping. After the first onset the spears were dropped and the day was decided with the sword. The cavalry attacked the enemy in the rear, if possible, and in case of victory, undertook the pursuit.

The butterfly invariably goes to sleep head downward. It folds and contracts its wings to the utmost. The effect is, when the wings are spread, to show a row of ridges, hardly distinguishable in shape and color, from the seed-heads on thousands of other stems around. The butterfly also sleeps in the top of the stems in the morning when the sunbeams warm them, all these graptid sleepers on the grass tops open their wings, and the colorful benedictions are started with a thousand living flowers of purest aurea.—From the Spectator.

ONE IN FOUR HAS PILES.

The Most Torturing Disease That Man Has Ever Known—The Safest and Most Certain Cure is Dr. Chase's Ointment.

Of the grown-up persons you meet from day to day one in four suffers more or less from itching, bleeding or protruding piles. Mock modesty leads many to suffer in silence, others dread the surgeon's knife, and, believing an operation to be the only cure, neglect to be treated. Some have found out by actual trial that piles can be promptly relieved and thoroughly cured by the use of Dr. Chase's Ointment.

If you are a sufferer from this exasperating ailment and will once make a test of Dr. Chase's Ointment you will be grateful to the end of your life for having read this advertisement. It will certainly cure you, no matter what forms of piles you have, so long as you give it an honest trial.

It has been frequently remarked by persons who have used this preparation that it has probably relieved more suffering from itching skin disease than any remedy that the world has known. While remarkably effective, as a cure for eczema and salt rheum, Dr. Chase's Ointment is unique as the only actual and proven cure for each and every form of piles.

Mr. George Thompson, a leading merchant of Blenheim, Ont., states: "I was troubled with itching piles for fifteen years, and at times they were so bad I could scarcely walk. I tried a great many remedies, but never found anything like Dr. Chase's Ointment."

"After the third application I obtained relief, and was completely cured by using one box."

Mr. F. G. Harding, retired farmer, living at Nilestone, Middlesex County, Ont., writes as follows: "I have been troubled with bleeding and itching piles for four or five years, and suffered intense agony at times. I had tried almost everything, but could get nothing that would give relief. On hearing of Dr. Chase's Ointment I procured a box, and it only required part of it to completely cure me. I am recommending it to all afflicted as I was."

If you have not met with some one who has been cured of piles by Dr. Chase's Ointment, ask your neighbors about it. It is impossible to publish testimonials of persons that all readers know, but by asking your friends you are sure to hear good words for Dr. Chase's Ointment. It is standard the world over and is guaranteed to cure any case of piles, 50 cents a box, at all dealers, or Edmondson, Bates & Co., Toronto.

Before After Wood's Phosphorine.

The Great English Remedy. Sold and recommended by all druggists in Canada. Only reliable medicine for the cure of all forms of Sexual Weakness, all effects of abuse or excess, Mental Worry, Excessive use of Tobacco, Opium or Stimulants. Mailed on receipt of price, one package \$1.00. The self-plaster, six sold cure. Pamphlet free on any address.

The Wood Co. (Ld.), Windsor, Ont.

Wood's Phosphorine is sold in Chatham by C. H. Gunn & Co., Central Drug Store.

The D.P. Emulsion

of Cod Liver Oil.

(Trade Mark.)

For Lung Troubles, Severe Coughs, Colds, Emaciation, &c., &c.

Few systems can assimilate pure Oil, but as combined in "The D.P. & L.", it is pleasant to take, the oil is absorbed, and the body is built up with anything near it. Before being used it is steeped in hot water until it is quite soft, and is then beaten between two smooth stones, which causes it to seep rate into filaments, which can thus be obtained of any strength and thickness. Thus, the seamstress has a considerable amount of labor before she commences with the real work in hand.

Finally she squats on the ground, (for no native stands to work, or do anything else, who can possibly help it), and, taking her needle, bores two holes in the edges of the rug or garment on which she is working. The thread is then pushed through the butt of the needle, drawn tight, and two more holes are made with a little result, the seamer proceeding very slowly, but fast enough for a country where time is of no value whatever.

The skin upon which the seamstress is working is dampened with water before she commences, and the damp thread and hide dry out it brings the work very closely together.

Until the time of Charles XII. of Sweden the artillery was not considered a part of the army; the men serving in it were not soldiers, but regarded as mechanics; the officers had no army rank. Charles XII. gave artillery officers a rank and regularly organized the artillery into companies. The battle of Pavia demonstrated the superiority of the gun in the hands of the Spaniards.
