Untoward weather conditions at critical times consulted in cutting our cotton crop down a million bales, untimely warm weather in the winter and untimely cold weather in the spring resulted in great destruction to our fruit crop, and there have been in various sections of the State conditions of flood or drought that resulted in much injury to individual interests here and there. The two particular individuals used to point the present moral may be called, for brevity's sake, "A" and "B." "A" was until yesterday manager of the east end branch of an exceedingly influential bank in Toronto, having seen fluential bank in Toronto, having seen nearly a quarter of a century's service, and, until the catastrophe about to be recited, excellent, irreproachable service it was. "B" is the son of a highly respectable cattle dealer. "A" and "B" were hardly birds of a feather, but mutually gianced with favor on the "dope" sheets. This brought them together. "B" was the older nand, but "A" was in touch with more ready money. They doubled well.

When "A" first began to utilize the bank's money is a matter of conjecture. It is known, however, that he covered up his shortage quite expeditiously for some time. Then the exposure followed. Although "A" and "B" had their hands into the bank cash over \$15,000 deep, matters have been adjust-

This and his long service have something to do with his employers' leniency. Besides, the assurance has been made that the bank loses nothing. The loss has been fully covered.
