**Reciprocity.**

We direct the attention of our readers to the letter from the Hon. John Harvey in reference to some remarks we made yesterday on Reciprocity. We pointed out that any overtures for Reciprocity would be more welcome to Newfoundland, if Reciprocity between Canada and the States should collapse. There is no argument in Mr. Harvey's letter which bears on that position, which after all, was the main position. But, we went on to express a doubt as to the desirability of reciprocity for Newfoundland should the pact now under discussion at Washington and Ottawa be ratified. Mr. Harvey expresses the strongest conviction that it would be desirable. The opinion is weighty as it is the opinion of a fish exporter, and Mr. Harvey may be able to provide reasons in addition to those which he furnishes in his letter which may sustain his position.

As to those he furnishes, they are important, but not conclusive in our opinion. He tells us that Porto Rico consumes 200,000 quintals of fish per annum. His point that Newfoundland may be handicapped in that market to the extent of 84c. per quintal is well taken and an important contribution to the consideration of the matter, but on the other hand he does not tell us the extent of the loss that Newfoundland may sustain from this handicap, although he expresses the fear that Nova Scotia may swallow our fish industry, if Canada obtains reciprocity and Newfoundland does not. The opinion is worthy of attention, but Mr. Harvey should buttress it with facts and arguments.

So far as we can gather, Newfoundland last year provided but a small proportion of the 200,000 quintals consumed in Canada. We are informed that some 18,000 quintals went directly there from Newfoundland and some 8,000 quintals more were re-shipped either to Porto Rico or Cuba. The Canadian Trade Commissioner informs us that the fish products, including codfish and haddock, dry and salted shipped to Porto Rico from Canada for 1910 was 101,309 cwt. It would appear then that a very large portion of the cod consumed in Porto Rico comes neither from Canada or Newfoundland. As to the possibility of Nova Scotia supplying the 200,000 quintals, Mr. Harvey says are required in Porto Rico, it is interesting to note that the total yield of the Nova Scotia dry cod fishery is given in the Dominion report for 1909-10 as 500,000 quintals.

As Mr. Harvey is largely interested in banking, his opinion on the relative cost of banking in Newfoundland and Canada is weighty, but it would be more weighty if accompanied by reasons. This matter seems to us worthy of discussion and we thank Mr. Harvey for his letter and hope to hear again from him, also from others like Mr. Harvey.

**Destitution Yarns are Untrue.**

We learn by the Prospero to-day that the stories circulated of privation and destitution on the French Shore are untrue. During the winter Messrs. J. & T. Moore sent down 60 barrels of flour by the Prospero, and this was ample for any families who might become short of this. In the extreme cases Mr. Boyle, the Relieving Officer, had plenty at his command to supply all the people.

**Bishop of St. George's.**

News was received in town last night making known to his friends that Rev. M. F. Power, Parish Priest of Harbour Breton, had been chosen as Bishop of St. George's. The information came as a surprise to everybody who gave the subject any thought, not that the new Bishop is not eminently qualified, but owing to the fact that in the discussion of all the possible candidates his name had not been mentioned. Father Power's humility and piety kept him in the background of opinion, but Rome never fails to find out the man possessing those qualities and hence the reason of the many surprises in filling episcopal vacancies. The new Bishop, however, is not alone distinguished by his humility and modesty, but is a deeply learned theologian and a beloved priest. In Harbour Breton he was esteemed and loved by all denominations a fact that was amply demonstrated since the destruction by fire of his Presbytery at Harbour Breton. The Bishop-elect is son of ex-Councillor Power of this city to whom as well as Mrs. Power and the family we extend congratulations. He is the second Bishop of the name in Newfoundland, and on the mentioning of the name of the new Bishop of St. George's the memory of the older and middle aged people of the country will go back to that great ecclesiastic and eloquent prince of the church who filled the See of St. John's from 1870 to 1900. The new Bishop of St. George's was educated at St. Patrick's Schools, St. Bonaventure's College and St. Francis Xavier University, Antigonish. After leaving the last mentioned institution he accompanied Bishop McNeil to Rome and spent six years at the Propaganda. Bishop Power was 34 years of age on the 17th February last and was born in St. John's West. His mother was a daughter of the late Mr. Thomas Kelly, of Brigus, a well esteemed emigrant from Ireland, who carried on business for many years at Brigus. Bishop Power is the eldest of a family of thirteen children, eight of whom are living, five brothers and three sisters. He was ordained at Rome in 1906, on March the 10th. Leaving there he travelled in France, England and Ireland during the summer of 1906, and returned to Newfoundland in August, shortly after which he was sent by His Grace Archbishop Howley to take charge of the parish of Harbour Breton, where he labored in the mission up to the present month. Mrs. Power, his mother, has been at Ottawa all the past month with two of her sons and two daughters. Her son Anthony is settled down there in a real estate business and is also Vice-President of a foundry. The cablegram acquainting Father Power of the honor conferred on him came late last night, and was sent by his old teacher, the Rector of his college at the Propaganda. Ex-Councillor Power, the father of the Bishop, is being overwhelmed with congratulations to-day. He himself is a highly esteemed citizen and was elected three times as Councillor in No. 4 Ward, and for part of a term filled the responsible office of Mayor of the city.
