The Tale of Perfect Time in a Watch

From Mainspring to Hairspring, between them lies the
secret.
The Mainspring is the power which it transmits to
the active parts of the watch. The Hairspring has the
control and regulates the motion. The fitting is most
delicate; imagine a 100th part of a hair. (Impossible
to cut!) Yet it is enough to interfere in its perform-
ance, so wonderful is the adjustment. The friction
from accumulating dirt, lack of oil, etc., destroy these
perfect fittings. Do not let your watch run to ruin
from neglect. Remember our business is the care of
watches, and our opinion costs nothing.
