## C. H. E. Exams.

Editor Evening Telegram. Dear Sir,-In the Daily News Tuesday, April 28th, was an editorial headed: "History and Geography" for which I presume the Editor of that paper, Hon. J. A. Robinson, is responsible. It deals principally with the importance of having these

subjects taught practically and with better results in our schools. confirm his remarks the write quotes an extract from the Schoo Report of Mr. Blackall, Superintendent of Church of England Schools, which will certainly open the eyes of most teachers in that gentleman's jurisdiction. But, sir, it is on the closing sentences of that editorial T ask space in your paper to comment The following are the words: "But why blame the teachers' their's is but one duty to get results and the easiest way to get results is to adopt the methods of our forefathers in raising capons. Do away with the cramming system and teachers and scholars alike will find a real joy and interest in this world of ours, and

Now, sir, it is quite clear that the writer of these words is utterly op-posed to the Examinations held under the Council of Higher Education and he uses the columns of his paper to give the public to understand that such are his sentiments. Perhaps he is justified in wielding his sledge of HOLD.

When "Spring cleaning days" engross the busy housewife then the battle in which he died, we lying side by side—he said to "Phil, take this address of my in London, so as to community in London, so as to commun

He also says in his remarks that a teacher's chief business is to get results. I beg to ask him: Where is the man who is not looking for reevidently he is aiming for, viz., a good circulation for his paper. Sir, such a remark is not what we would expect from such a liberal and broad-

minded man. "He goes on to say that familiarty with world History and Cosmoraphy is of vastly more importance

cate with his people. I feel dike f am not coming out of this fight," I laughed at him and said, don't talk such stuff. While the fight was in progress, he was a hero all the time, helping the wounded and doing good in every way. He was struck by a shell on the 23rd, and died instantly. from Dr. Burke's School Report of 1913:—

"The Council of Higher Education, whatever its faults, has done more to stir up an interest in Education in Newfoundland and to create a spirit of emulation amongst our schools than possibly any other agency. It is, perhaps, ideal to have no examinations, such as those which the Council provides, but we find that very great and progressive countries have not up to date abolished examinations, and I must confess, and I do so with humility, that I do not think we have yet arrived at that stage of perfection educationally, when we can afford to throw overboard altegeher the traditions and experiences of such countries."
