THEN COMES MACHINE-

BUILDING Years ago we overcame the uncertainty of hand-building our tires. Now no weak spots can occur in No-Rim-Cut Tires.

Our Gift to Automobile Owners

-- The No-Rim-Cut Tire. 10% Oversize

THE words "Goodyear" and "No-Rim-Cut" are insepar-

The No-Rim-Cut Tire, at no increase in cost, gives the car

owner nearly double tire mileage. It has won the tire market

It avoids rim-cutting—a tremendous saving to car owners. It is 10% larger than Clincher tires of the same rated size. That adds 25% to

A sale of over 2,000,000 No-Rim-Cut Tires in Canada and the United States shows clear-

Three Mighty Features

ly that the old style tires have lost in the race—that No-Rim-Cut Tires are supreme.

able in the minds of the Canadian Car owner.

for that very reason. It is built on a new principle.

The fabric is of even strength at every point. To insure equal tension over every inch of every layer of fabric we invented the Goodyear Tire Building Machine. Automatic weights stretch the fabric equally as it is laid on the carcass of the tire. We are sure of the uniform strength of every part of

That is Big Feature No. 2.-A tremendous step towards perfection-and increased mileage.

CURING UNDER AIR PRESSURE

Goodyear Tires are cured twice. While this process is expensive it adds many miles to the life of our tires, because it insures uniform toughness through the whole tire. First, the thick tread and the fabric casing are each partially cured. Then the tread is laid on to the carcass, the tire is inflated on a rim and the curing process completed.

See what this double cure does. The thick tread is as thoroughly toughened as the thin side walls. The tire is cured under the same strain as it will meet in actual

service. We believe curing under air pressure is an exclusive process with us. It costs us 50c more per tire. But it adds mileage to No-

The HAYNES is manufactured in Kokomo, Ind., by the oldest makers of motor cars in America. For twenty years the Haynes Company have been developing their product, until today they stand in the front rank of the most advanced and yet conservative builders of automobiles in the world. These cars are universally classified with the highestpriced machines in America, and the above model is the first of this line to enter the "moderate figure" list. For beauty of design and finish, luxurious comfort, durability of materials, utmost efficiency with silence of motor, plus completeness of equipment, these cars are unexcelled by any on the market at even a much greater price. You will agree with us that the Haynes is the easiest riding car you ever rode in, and yet this has been accomplished without the excessive weight that makes the upkeep run into such long figures.

We have just received word that the output of Model 4 is practically sold out for this season, but can guarantee immediate delivery on our lotment of six cars only in June.

Model 23-6 cylinders, 60 horsepower, motor 41/4x51/2, wheel base 130 inches, electric starter, electric lights, tires 36x41/2, full floating rear axle, 12-inch Turkish upholstery, demountable rims, etc., left-hand drive, centre control. Price, \$3,400.
