The second deposit of \$200 a side for the Gilmore-Bittle fight was made Wednesday night. Each party now has \$250 up. The final deposit of \$250 is due May 22, when the Bittle party will have the opportunity of increasing the stakes from \$500 to \$1000 a side.

Concerning the style of Neil Matterson, Bell's Life says: "So far, the Australian sculler has failed to please the riverside critica, and unless he can show a marked improvement before the day of the race, he will not have an easy task to beat the home representative. His action, though pretty, is not powerful, and he also bends his back in an ungainly manner."

Hello! Gus you look tappy, what's up? Well, Fred, I'll tell you: That dude that has so much cash called on Jennie the other night, and her mother got him to help her put up nome pictures, and he drove the nails in and broke the plaster off their new walls, and she got mad with him and Jennie told me of it. I telephoned R. J. Licence & Co., cor. Bay and Adelaide, and they sent a man up and put up room moulding at my expense (and it only cost six doilars), and now I'm solid with the old lady. She thinks I've a great head.

on Wednesday the question of the quality of coal supplied to the pumping station came up for discussion and was finally tled, Ald. Walker was in the chair, Supt. Hamilton reported: In accordance with instructions, I herewith submit to you the analysis of the coal we are receiving at the Waterworks engine house, as follows:

I think these figures show the coal to be ir quality. W. H. ELLIS would say that the analysis by Dr. Ellis is in favor of the coal, as we cannot get as good results out of the coal in a practical test, but I consider there it more slate and other impurities shan called for by the contract."

The Committee did not agree with the Superintendent's conclusions. Ald. Frankland said they should abide by Dr. Ellis' report. He moved this resolution:

That after receiving the report of Prof. Ellis, it must be declared that Rogers & Co.

In March, April and May, 1885, the old engines pumped an average of 358, 459 gallons of water for every ton of coal burned. In June, July and August, under Rogers' contract, the average was 396, 387 gallons, or nearly 40,000 gallons more water per ton than under the preceding contract. Mr. Foster showed further that in March, 1886, 76,520 more gallons were pumped per ton ef coal
