## HYBRID QUEENS.

I have still some good Hybrid Queens, mostly  
of the Heddon strain (not purely mated), which  
I will sell at

**2 FOR \$1.00.**

One Queen with one pound of Bees during  
June for \$2.75.

These are splendid bees for honey gathering,  
and I believe superior to the ordinary hybrids,  
being not so cross and better comb builders.

I will have about the 25th June some good  
Queens reared from swarming cells from selected  
Queens which I will sell at the same price as  
those advertised during March, April and  
May.

Address,

**G. A. DEADMAN,**  
Druggist and Apiarist, Brussels.

# W. Z. HUTCHINSON,

ROGERSVILLE, GENESEE, CO., MICH.

HAS received scores of unsolicited testimonials in re-  
gard to the excellency of his little book -

## "THE PRODUCTION OF COMB HONEY."

and it is with pleasure that he publishes the following  
selections:

Success to the little book of fresh and live ideas.—E. E.  
Hasty, Richards, O., March 28, 1887.

It is the best book on the production of comb honey I  
ever read.—F. W. Holmes, Coopersville, Mich., March 29,  
1887.

I congratulate you on getting up such a complete treat-  
ise upon the subject in so small a book.—W. H. Shirley,  
Mill Grove, Mich., March 27, 1887.

Your little work on "The Production of Comb Honey"  
is a valuable acquisition, and coincides with my experi-  
ence.—Dr. L. C. Whiting, East Saginaw, Mich., April 23,  
1887.

It is simply at the head in every respect, so far as it  
goes. All can say that there are larger books—those that  
cover more ground, but NONE that cover their ground  
nearly as well.—James Heddon, Dowagiac, Mich., April 2,  
1887.

You have given us a valuable work. Though terse, it  
lacks nothing in completeness. We need more such  
books—those that give facts in the fewest words. For  
four years I practised essentially the system you give, and  
know its superior worth.—Dr. G. L. Tinker, New Phila-  
delphia, Ohio, April 17th, 1887.

Your book received last night and read through before  
I could sleep. To be sure I knew the most of it from your  
articles in the bee-papers, but it is nice to have it all together  
in a neat little book like yours. You just more than boiled  
it down, didn't you?—Dr. A. B. Mason, Anburndale, O.,  
Mar. 29, 1887.

Friend H.: Have just received your little book. Much  
that it contains will be found new, I think, with the  
majority. The cost in production must in some way be  
lessened. You set out the primary elements by which  
such lessening of cost may be made. I say heartily that  
I think your little book should be studied carefully by  
every producer of comb honey. With kind regards.—  
J. E. Pond, Foxboro, Mass., March 28, 1887.

Your lovely little book gave sister and me much pleasure  
and the author will please accept many thanks. Since  
criticism is invited, permit me to say that we reach the  
conclusion too soon. Had the book been less interesting  
we might not have discovered the fault—might even have  
thought it a merit—but since the book is as good as it is  
pretty, its brevity is a serious fault; a fault which will  
surely be amended in the second edition. With the hope  
that it may receive the cordial welcome that it merits, I  
am yours truly.—"Cyula Lipswik."
