PERSONALITIES.

By the upsetting of a canoe in the River Otonabee, about three miles from Peterboro, Mr. John Archer found a watery grave. The deceased was the son of the late Mr. Archer, who was a deaf gentleman of considerable means. The young man had only recently returned from England to reside in Peterboro with his mother, who is a hearing lady, having resided for some years in England with his grandfather in Wiltshire. Mr. Archer was an undergraduate of Oxford University and was the only son of his widowed mother. Mrs. and Miss Archer have the sympathy of the entire community in their sad bereavement.

A special from Washington gives a sad reason for the non-appearance of Mrs. Cleveland, wife of the President, in society, a fact which has been much commented upon in social circles. It states that little Ruth Cleveland, the first born child of President and Mrs. Cleveland, has an impediment in her speech, and that her hearing is sadly defective. The facts it states have been withheld from the public out of respect for the feelings of the parents of baby Ruth. The affliction is such that the child is said to be almost deaf and dumb. The trouble became known through the servants, and the fact that baby Ruth is rarely seen, and never quoted as saying any smart things, is regarded as confirmatory evidence. It is understood that everything possible is being done for the child, and that Mrs. Cleveland spends hours in trying to teach it to articulate. The little one's mind is said, in some quarters, to be backward, but that is believed not to be the case.

From Lunenburg, the name Mr. Henry C. White, Brighton, Mass., writes, and makes mention of a number of deaf mutes who live in his town. Referring to Canadians there he says: "Mr. and Mrs. Willey have a pretty home on Washington Avenue. Mrs. Willey's folks are among the substantial, well-to-

do citizens in the place. Mr. Willey is a machinist by trade. He has saved enough money out of his earnings to buy an orange grove of five acres in Ocala, Florida, whither they intend to retire after a few years. Mr. Willey and his wife were both educated in Halifax, Nova Scotia, and have picked a mastery of the American system of signs, which was very different from the English method in use at Halifax. Mr. Willey is proud of the fact that he has a grand uncle living in Chelsea, Mass. at the age of ninety-five years, with his mental machinery still in good running order. He hopes to congratulate his uncle on his one hundredth anniversary. Mrs. Thomson works in the watch factory. She was originally educated at Donaldson's Hospital in Edinburgh and was taught by the universal combination of speech, signs, and the double hand alphabet. George White, from Lunenburg, is a first class carpenter. His sister, also uneducated, died two or three years ago. Why are there so many uneducated Canadians in the States, when Canada has such good schools, especially the one at Lunenburg? Are they from Ontario?" E.

TORONTO TOPICS.

Field over from last paper.

From our own Correspondent

It is reported that Miss L. Henry has gone to Winnipeg on a visit if not to stay altogether.

Mr. Chas. Wilson has purchased a handsome house on Delaware Avenue for the sum of \$1,800. They will move into it in the course of a few days. We admire his energy and enterprise. It looks as if Delaware Avenue will become one of the finest streets in the city.

The deaf-mutes arranged for a picnic to the Humber on the 24th, but owing to the rain it did not come off. In the evening, however, Mr. and Mrs. Riddell had a party and all the gay old and young fellows were there. It is needless to say an enjoyable time was spent. The success of the evening is largely due to Miss Mary Moore, who is becoming a general favorite with the deaf mutes at large in the city.

It is estimated that there will be about thirty deaf-mutes from this city at the Convention. We would strongly urge all who can well afford it to go, and they will not regret it afterwards.

We have no doubt an inventive genius in our midst in the person of W. Terrell. He has invented a door bell for deaf mutes. Though it may be called a bell it is in reality more of a hammer which is attached with a wire to the front door button, which when pressed the hammer gives a knock on the floor, where it is placed, and can easily be felt by almost any deaf-mute. Mr. Terrell is thinking about taking out a patent for it and we think when it is placed on the market it will have quite a large sale. We think Mr. T. should take a model of it to the Convention, to show as an example of his inventive ability.

We learn that the wife of our old friend J. H. Rhodes was very sick lately but think she has quite recovered again. It seems as if Johnnie has retired from the deaf-mute world. We fear he is engaged too much in domestic affairs such as rocking the cradle and administering physics, etc.

Mr. Chas. Elliott has returned from his visit to London and Hamilton, much improved in health. While in the latter city he met quite a number of the mutes there and had a fine time generally.

Now that summer is here the house parties of the winter will be a thing of the past. We presume that the young people will use their superfluous energies in rowing, walking, bicycling, etc.

Mr. Arthur Brown, Pennington, was in the city visiting his sister Mrs. B. Mason, last week.

Mrs. Boughton is going to spend a few weeks at her parental home this summer with her children. We presume J. W. will be going to teach during her absence.

Mr. and Mrs. Jones have removed to Milton, and Mr. Holmes to England.

The New York Institution has a new gymnasium, and hereafter the pupils will receive regular drill in physical culture. The sum of \$1,500 has been expended in apparatus, and a qualified instructor appointed.

The Texas school is doing better this year in the way of oral work than ever before in its history. They will have each pupil educated by the method best adapted to the pupil's ability, whether it be manual, oral, or both.
