

THE NEW YORK School of Clinical Medicine

328 West 42nd Street.

This school of special instruction for practitioners of medicine and surgery is modelled upon the plans of the most successful European institutions, modified to suit the practical requirements of American physicians.

No lectures are delivered.

All teaching is individual.

The classes are no larger than will allow each member to personally treat as many patients as he possibly can.

The members of classes act as assistants and operate under the guidance of their teachers. Special attention is given to the most modern methods of diagnosis and treatment of the routine cases which the practitioner encounters daily.

The satisfactory results obtained obliges the school to continually increase its teaching facilities, as will be announced from time to time.

Courses may begin at any time, in classes which are not filled.
