MR. JARREL FELLOWS.

DRAW Sirk: I came to this country in May, 1869. I found a countryman of mine laboring under some affection of the lungs. I recommended your Syrup, tried at the Drugslets in Harbor Grace, but they thought I was inventing the name at their oxpense. However, in Aprill, 1870. Mr. Edgar Joyce rapidly wasted away with every symptom of quick bonsumption, so that he was unable to walk across the room, having no appetite, hains in the left side, norvous system unstrang dry, hecking coutel de. Fortunately I learned that your Syrup could be obtained at Mr. Dearins, in St. John's, and immediately procured some (slowed one to W! H. Thompson, who ordered a supply from you at conce). This was Tueaday afternoon; at night he took the prescribed dose, and in the morning he described the very results notified on the wrapper. His appetite soon began to return, and a voracious out twas, too; the dry, hacking cough charged into lose but violent attacks, finally disappearing altogether; pains loft his aide, his hand assuined its usual steadiness, and before he finished too hottles his health was quite restored, and to-day not a more healthy person is to be found on our streets; and it is the opinion of all, had he not been fortunate in getting your valuable Syrup of Hypophosphites, he would now be in his grave.

He happened to be in W. H. I hompson's the day your first shipment arrived, and took at once four bottles to the Labrador, which he was very anxious to do, but had no occasion to use them hinself. No other medicine will be ever prescribe, recom-

The Weekly Taiburk, appents also to Trachers Students, and persons of inquiring minds, by the charaoter of its literary contents, which include reviews of all the works proceeding from the neater minds of the old or of the New World, with liberal extracts from those of especial internst. Imaginative Literature also claim attention; but in a subordinatedegree, "Homo Interests" are discussed weekly by alkey typecfally qualified to instruct and interesther own sex, and the younger portion of the other.
